stoan. Dial. Eng. var. of STONE.

sense 25 c. b A merchant's or manufacturer's store of goods; hence, store; accumulation; supply on hand; as, to lay in a *stock* of provisions. c *Obs.* Income-producing property; assets; also, funds invested in a partnership or company. d *Slang.* A part interest in something; store; loosely, the value or price of such an interest; as, the ugly rumors sent his *stock* down; I take no *stock* in what he says; she set a great *stock* by him.

10. Stockfish; dried cod. *Obs.*

11. Raw material; that out of which something is manufactured; as, paper *stock*; soap *stock*.

12. A meat broth made in a stockpot whose contents are kept at a simmering point and replenished from time to time; also, a rich extract of the soluble parts of meat, fish, poultry, and, sometimes, of vegetables, used as a basis for soups, gravies, etc.

13. A plain soap which is made into toilet soap by adding perfumery, coloring matter, etc.

14. Livestock.

15. [Cf. STOCKING.] A covering for the leg, or leg and foot; as, upper *stocks* (breeches); nether *stocks* (stockings). *Obs.*

16. A close-fitting wide band or cravat for the neck.

17. *pl.* The better grades of brick burned in a clamp. *Eng.*

18. A beater in a fulling mill for cloth, or a machine for beating or kneading hides to soften them, etc.; also, *pl.*, the mill itself.

19. a Cabbage or colewort. b Any plant of the genus *Matthiola;* as, the gillyflower or common *stock* (*Matthiola incana*); ten-weeks *stock* (*M. incana annua*). c The Mahon stock.

20. A completed part or machine placed in a storeroom for delivery when ordered out.

21. *Agric. Mach.* The wooden or iron frame of a plow, to which the handles, share, colter, moldboard, and land side are secured.

22. *Beekeeping.* A hive of bees.

23. *Bookkeeping.* = STOCK ACCOUNT.

24. *Card Playing & Dominoes.* That portion of a pack of cards or set of dominoes not distributed to the players at the beginning of certain games.

25. *Finance.* a The part of a tally formerly given to the creditor in a transaction, as, in the English exchequer, to the person who had lent the king money on account. See TALLY. b *Finance.* The debt or fund represented by such a stock or a series of them; hence, a debt or fund due from the government to individuals for money loaned at interest, or the securities representing such debt or fund; also, a debt or fund similarly due from a private company or corporation, or the securities representing it. Such stock is not divided into shares, but is divisible and transferable in any amount desired not involving divisions smaller than a specified sum; thus, British consols are *stock*, and any amount may be purchased or transferred not involving fractions of a penny, as for instance £10 8s. 7d. *Stock* in this sense is now little used in the United States, being chiefly restricted to occasional use in relation to municipal bonds (called also *corporate stock*) as some of the securities of the City of New York. In modern British usage *stock* is often specifically used of debts, funds, or capital, bearing interest at a given rate per cent in perpetuity, the principal not being payable, unless at the option of the debtor. c *Chiefly U. S.* Shares or holdings, collectively, in a corporate business enterprise, attested by certificates of ownership, which usually carry on their face a statement of the sum (known as the *par* of the stock) which purports to represent the actual investment of money or its equivalent on each unit share. The aggregate par value of all shares outstanding constitutes the *capital stock* of the company. Certificates bearing no face value are called ***no-par stock.*** See SHARE, *n.*, 3.
☞ *Stock* in the U. S. corresponds to *share* in English usage.

26. *Firearms.* a In portable firearms, the wood part to which the barrel and other parts are assembled and which gives the stiffness and shape necessary for use. Stokes' law (stōks). Also **Stokes's law** (stōk'sĭz). *Physics.* The law, enunciated by Sir G. G. Stokes, Brit. mathematician and physicist that in fluorescence the fluorescent light has a wave length greater than that of the exciting light. There are exceptions, and the spectral lines in the fluorescent spectrum whose wave lengths are less than that of the exciting light are called *antistokes lines.* See FLUORESCENCE, 1.

Stokes's as'ter (stōk'sĭz). See STOKESIA.

Stokes's rule. *Physics.* = STOKES' LAW.

Stokes's theorem. [See STOKESITE.] *Math.* The theorem that the line integral of a vector around any closed curve in space is equivalent to the flux of the curl of that vector through any surface capping the closed curve. If the lines to which the vector is tangent curl around so as to form closed curves, this flux is necessarily different from zero.

Stokes trench mortar. [After Sir Wilfrid S. *Stokes* (b. 1860), Eng. inventor.] *Mil.* A light, muzzle-loading, three-inch mortar, made in four parts for easy transportation. The projectile (*Stokes bomb*) weighs 11 pounds, and is loaded with high explosive.

sto'lon (stō'lŏn), *n.* [L. *stolo, -onis;* cf. F. *stolon.*] **1.** *Bot.* **a** A slender branch or shoot growing at or near the base of the parent plant, and developing a bud and root at the tip or at both node and tip. It may grow above or beneath the surface of the soil, in the former case being either naked or leafy. Cf. RUNNER, 10 a; OFFSET, 6. **b** A runner or rootstock or a piece of either, used to propagate a grass, as Bermuda grass; — usually in *pl.*
2. *Zool.* A more or less prolonged extension of the body wall, from which buds are developed, giving rise to new zooids, thus forming a compound animal in which the zooids usually remain united by the stolon. They are often present in Anthozoa, Hydrozoa, Bryozoa, and ascidians.

sto'lon·ate (-ăt), *adj.* Having a stolon or stolons; arising from a stolon.

sto'lo·nif'er·ous (stō'lŏ·nĭf'ĕr·ŭs; stŏl'ō-), *adj.* [NL. *stolonifer.*] *Bot. & Zool.* Bearing, or developing, stolons. — **sto'lo·nif'er·ous·ly,** *adv.*

stolz'ite (stōlts'ĭt; stōl'zĭt), *n.* [After Dr. *Stolz* of Teplitz, Bohemia.] *Mineral.* Native lead tungstate, $PbWO_4$, near scheelite in form.

sto'ma (stō'mȧ), *n.;* *pl.* STOMATA (stō'mȧ·tȧ; stŏm'ȧ-). [NL., fr. Gr. *stoma, -atos,* a mouth. See STOMACH.]
1. *Anat. & Zool.* Any of various small and simple mouth-like openings, esp. in the lower animals; an ostiole; specif., one of the many minute openings among the cells of a serous membrane affording direct communication with the adjacent lymph channels; also, rarely a spiracle of an insect.
2. *Bot.* **a** A minute orifice in the epidermis of leaves, stems, etc., through which gaseous interchange is effected between the atmosphere and the intercellular spaces of the parenchyma. A stoma is formed by the division of a mother cell into two crescent-shaped guard cells, united at their ends; when turgid they are curved, opening the orifice. The stomata are generally most abundant on the under surface of leaves. See ENERGESIS; RESPIRATION, 2; cf. TRANSPIRATION, 3; LENTICEL. **b** The ostiole in the spore fruit of certain fungi. **c** A stomium.

Highly magnified portion of Epidermis from the lower surface of a Lily Leaf, showing Stomata. Also a single Stoma, more magnified.

stoma. [NL. See STOMA.] A combining form, from Greek *stoma,* the mouth, denoting: **a** *A mouth* or *mouth-like aperture; -stome,* as in cryptostoma. **b** *An animal* or *plant having a* (specified) *type of mouth* or *mouthlike aperture;* — chiefly in generic names, as in Aulostoma.

stoma-. = STOMATO-, as in stomapod.

sto·mac'a·ce (stō·măk'ȧ·sē), *n.* [L., scurvy of the gums, fr. Gr. *stomakakē,* fr. *stoma* mouth + *kakē* vice.] *Med.* Canker of the mouth; ulcerative stomatitis.

stom'ach (stŭm'ăk), *n.* [ME. *stomak,* fr. OF. *estomac,* fr. L. *stomachus* gullet, liking, dislike, vexation, fr. Gr. *stomachos* stomach, throat, gullet, fr. *stoma* a mouth, any outlet or entrance; akin to Av. *staman,* W. *safn.*] **1.** **a** In man and most vertebrates, a dilated, more or less saclike part of the alimentary canal beyond the esophagus, or gullet, in which the earlier stages of digestion take place. In man the stomach lies transversely in the upper left and central part of the abdomen (see DIGESTION, *Illust.*). When moderately distended it is about 12 inches long and 4 inches in diameter. Its walls are composed of an outer serous coat derived from the peritoneum; a muscular coat consisting of layers of longitudinal, transverse, and oblique muscle fibers; an areolar coat consisting of loose connective tissue; and an inner mucous coat in which the gastric glands occur. See GASTRIC GLANDS, GASTRIC JUICE. In some animals the stomach is divided by constrictions into chambers differing in the structure of their walls and in function, as in ruminants (see RUMINANTIA) and cetaceans. In birds there are commonly two such chambers (cf. PROVENTRICULUS **a**, GIZZARD, 1), which are often called *stomachs.* **b** In invertebrates, any digestive cavity, or the chief dilatation of the alimentary tract, or in the higher forms a portion of the alimentary canal more or less closely corresponding to the stomach of vertebrates.
2. The desire for food caused by hunger; appetite. *Shak.*
3. Hence, appetite in general; inclination; desire; as, he had no *stomach* for any further fighting.
4. The seat or source of the feelings; also, a particular disposition or mental attitude; as: **a** *Obs.* Compassion. *Chaucer.* **b** Temper; spirit; valor; temperament. **c** *Obs.* Pride; haughtiness; arrogance. *Shak.* **d** *Obs.* Anger; violence of temper; spleen; resentment.

Stern was his look, and full of *stomach* vain. *Spenser.*

e *Obs.* Sullenness; stubbornness; willful obstinacy.
5. The mouth; the gullet; the throat. *Obs.*
6. The belly; the abdomen; — a common but erroneous use.

Syn. — Alien; rare; uncommon, unusual. — STRANGE, SINGULAR, PECULIAR, ECCENTRIC, ERRATIC, ODD, QUEER, QUAINT, OUTLANDISH. That is STRANGE which is out of the ordinary, familiar, or natural order; SINGULAR often suggests that whose strangeness puzzles one or piques one's curiosity; as, "a soldier, full of *strange* oaths" (*Shak.*); "some *strange* mysterious dream" (*Milton*); "sad and *strange* as in dark summer dawns the earliest pipe of half-awakened birds to dying ears" (*Tennyson*); "T is *singular* that even within the sight of the high towers of Antioch you could lose your way" (*Shelley*); "Pleasure was a by-product of the *singular* chemistry of life" (*Stevenson*). That is PECULIAR, as here compared (cf. SPECIAL), which carries distinctive qualities to an extreme; the word is often a mere synonym for "odd" or "queer"; ECCENTRIC implies divergence from the beaten track; ERRATIC adds to *eccentric* a stronger implication of caprice; as, a *peculiar* trick of expression; "She was a person of some odd and *peculiar* habits, wore a *singular* dress, and affected wild and solitary haunts" (*Scott*); "his [Carlyle's] taste for the *eccentric,* amorphous, and violent in men" (*Lowell*); the workings of his mind were *erratic.* ODD often differs little from *singular* or *peculiar;* it sometimes suggests an element of the fantastic; that is QUEER which is (esp. oddly) abnormal, or which is dubious or questionable; as, "great men whose *odd* habits it would have been glorious piety to endure" (*G. Eliot*); "His tail cocks up in a very *odd* way" (*Barham*); "our sense of the *odd,* the humorous, the grotesque" (*Lowell*); "Now Elkanah Settle sounds so *queer;* who can expect much from that name?" (*Boswell*); "Alice was not much surprised at this, she was getting so well used to *queer* things happening" (*L. Carroll*); a *queer* transaction. That is QUAINT which is pleasantly odd or (esp.) old-fashioned; that is OUTLANDISH which is uncouth or bizarre; as, "the language . . . *quaint* and old-fashioned" (*Cowper*); an *outlandish* custom. Cf. ANOMALOUS, FANCIFUL, ECCENTRICITY.
Ant. — Accustomed, natural, usual, familiar, wonted.

They rarely have capsules. Several species are virulently pathogenic *S. pyogenes,* the type species, causes various acute diseases in man and animals, affecting the sinuses, lungs, brain, and spinal cord, middle-ear bones, joints, blood, etc. *S. scarlatinae* causes scarlet fever; *S. erysipelatis,* erysipelas; *S. puerperalis,* puerperal septicemia; *S. mastitidis,* mastitis of cows; and *S. equi,* strangles. *S. lactis* is usually the chief agent in souring milk; *S. kefir* is active in ripening Cheddar cheese and occurs in kefir; and *S. cremoris* is used as a starter in the manufacture of cheese.

2. [*not cap.; pl.* STREPTOCOCCI (strĕp'tō·kŏk'sī).] Any microorganism of this genus, or, broadly, any coccus occurring in chains.

strep'to·ly'sin (-lĭ'sĭn), *n* [*strepto-* + *lysin.*] *Immunol.* A hemolysin produced by certain streptococci, as *S. pyogenes.*

Strep'to·neu'ra (strĕp'tō·nū'rȧ), *n. pl.* [NL., fr. *strepto-* + *-neura.*] *Zool.* A large subclass of mollusks, including the majority of marine, some freshwater, and the operculate land gastropods, in which the loop of visceral nerves is twisted into a figure 8, the right half crossing (in dextral forms) above the left. The sexes are usually separate and most forms have an operculum. Syn. *Prosobranchia.*

One of the Streptoneura (*Viviparus*), showing anatomy. *a* Rostrum; *t* Tentacles; *e* Esophagus; *b* Gill; *h* Auricle of Heart; *v* Ventricle; *u, u'* Aortas; *u''* Afferent Vessel; *w, w* Veins; *n n n* Nervous System.

strep'to·neu'ral (-nū'răl), *adj. Zool.* Streptoneurous.

strep'to·neu'rous (-rŭs), *adj. Zool.* Of or pertaining to the Streptoneura; having, or designating, a nervous system with a twisted visceral loop. Cf. EUTHYNEUROUS.

strep'to·thri·co'sis (-thrĭ·kō'sĭs), *n.; pl.* -COSES (-sēz). [NL. See STREPTOTHRIX; -OSIS.] *Med. & Veter.* Infection with a streptothrix; actinomycosis.

Strep'to·thrix (strĕp'tō·thrĭks), *n.* [NL., fr. *strepto-* + *-thrix.*] *Bacteriol.* **a** A formerly recognized genus of somewhat moldlike higher bacteria with branched filaments which abstrict conidia. It comprised species of *Actinomyces* and *Leptothrix.* **b** [*not cap.; pl.* -THRICES (-thrĭ'sēz).] Any of the microorganisms included in this genus. — **strep'to·thri'cial** (-thrĭsh'ăl), *adj.*

stress (strĕs), *v. t.;* STRESSED (strĕst); STRESS'ING. [Abbr. fr. *distress,* and fr. OF. *estrecier,* fr. (assumed) VL. *strictiare,* fr. L. *strictus,* past part. of *stringere.* Partly also fr. STRESS, *n.* See DISTRESS, *v.,* STRAIN, *v.*] **1.** To distress; overtax; inconvenience; afflict; also, to distrain. *Obs. exc. Scot. & Dial. Eng.*

2. To subject to the action of external forces; to put pressure upon or cause strain to; esp., to overstrain.

3. To subject to phonetic stress; to accent.

4. To place emphasis on; to make emphatic; emphasize.

stress, *n.* [Abbr. fr. *distress,* and fr. OF. *estrece,* fr. (assumed) VL. *strictia,* fr. L. *strictus.* See DISTRESS, STRESS, *v.*] **1. a** *Obs.* Distress; affliction. "His heavy *stress.*" *Spenser.* **b** *Obs. exc. Dial. Eng. Law.* Distress; distraint.

2. Pressure; strain; constraining force or influence; state or condition of strain, esp. of intense strain; as, *stress* of circumstances; *stress* of weather; — used chiefly of immaterial things; hence, urgency; importance; weight; emphasis; significance; as, to lay *stress* on a particular argument.

The faculties of the mind are improved by exercise, yet they must not be put to a *stress* beyond their strength. *Locke.*

3. Intense effort; strained activity or exertion toward the accomplishment of anything.

4. *Mech.* Mutual force or action between contiguous surfaces of bodies, or on both sides of any arbitrary section line or surface, caused by external force, as tension, compression, shear, or a combination of these; the cohesive force or molecular resistance in a body opposing such action. Specif., intensity of this force, commonly expressed in pounds per square inch.

In rigid bodies, *stress* may be defined as resistance to alteration of form; in fluids . . . to alteration of volume. *A. B. W. Kennedy.*

5. *Music.* = ACCENT, *n.,* **8 a & c.**

6. *Phonet.* Force of utterance given to a speech sound, syllable, or word, increasing its relative loudness; accent. Of many possible degrees of stress, or accent, only two, the *primary* (ˈ), and the *secondary* (ˌ), as in *as'pi·ra'tion,* need ordinarily be distinguished. Cf. ACCENT, *n.,* 1. See *Pron.* §§ 60–69.

☞ Since stress (force) in English is usually the chief element of accent, the terms *stress* and *accent* are often synonymous.

7. *Pros.* **a** Emphasis or weight given to accented or long syllables in verse; more narrowly, emphasis given syllables with respect to their normal syllabic or word accents and natural quantities as distinguished from that emphasis imposed by a metrical scheme. **b** Any syllable in a foot or similar group of syllables which carries the ictus or rhythmical emphasis; as, a verse of four *stresses.*

-stress. [*-ster* + *-ess,* prop. a double feminine. Cf. -STER.] A suffix denoting a *feminine agent,* now esp. *one who does something with skill* or *as an occupation,* as in seam*stress,* song*stress,* spin*stress.*

stress accent. *Phonet.* Accent produced by force only, independently of pitch or length; — called also *emphatic* or *expiratory accent.*

stress diagram. A diagram which results from the graphical analysis of the stresses in a framed structure.

stress'er (strĕs'ĕr), *n.* One who or that which stresses.

stress group. *Phonet.* A division of speech, from one zero of stress to the next or, sometimes, from one maximum to the next. *R. J. Lloyd.*

stress sheet. *Arch. & Engin.* A skeleton drawing of a structure, as a roof truss or a bridge, showing the stress to which each member will be subjected.

stress'–strain' curve. Deformation curve.

stretch (strĕch), *v.;* STRETCHED (strĕcht); STRETCH'ING. [ME. *strecchen,* fr. AS. *streccan;* akin to D. *strekken,* G. *strecken,* OHG. *strecchen,* Sw. *sträcka,* Dan. *strække* G. *strack* straight, and perh. to E. STARK. Cf. STRAGGLE, STRAIGHT, STRAKE, STREEK.] *Transitive:* **1.** To reach out; as, the tree *stretched* its branches over the road; extend; put forth; esp., to extend (oneself, one's limbs or body) in a reclining position; as, he *stretched* himself out on the bed.

4. Liability to increase in size as a result of tension, moisture, etc.

5. A sentence or term of imprisonment. *Colloq.*

6. Course; direction; as, the *stretch* of seams of coal.

7. A walk to relieve the fatigue of prolonged sitting; as, to take a *stretch* over the countryside in the evening.

8. Either of the straight sides of a racecourse with curving ends; specif., the *homestretch,* or the *backstretch.*

9. *Math. & Logic.* A distance along a line; hence, the interval between any two elements in a one-dimensional series; a segment of a series or of any set of things arranged in linear order.

10. *Mech.* Theoretically, simple linear tensile or compressive strain parallel to a given direction without change of dimensions in directions at right angles to this direction; technically, elongation, temporary or permanent, produced by a pulling stress. Tensile stresses are usually considered positive, and compressive stresses negative but this procedure is not uniformly observed.

11. *Naut.* The run on one tack.

12. *Spinning.* The outward run of a mule carriage away from the rollers.

—***at, or on, a stretch.*** During a single prolonged period of time without intermission or interruption; as, we worked ten hours *at a stretch.*

Syn. — Firm, sound; lusty, sinewy, muscular. — STRONG, STOUT, ROBUST, STURDY, STALWART. STRONG, the most general term, denotes literally the possession of great physical power, whether active or passive — strength to do or strength to endure; as, *strong* as a horse; a *strong* constitution (so, figuratively, a *strong* mind; a *strong* appeal). STOUT adds to *strong*, in its literal use, the implication of thickness or weight, sometimes of portliness (cf. STOUT); in its figurative sense it implies a certain resolute, sometimes even dogged, quality (cf. STANCH); as, a *stout* stick; "an old man, *stout* of heart, and *strong* of limb" (*Wordsworth*); "as a boy at school takes his flogging, *stoutly* and in silence" (*Thackeray*); *stout* resistance. ROBUST suggests the vigor and soundness of health, together with a toughness as of oak; it often emphasizes power of endurance; as, a *robust* physique; "His preaching was ingenious and pithy, like the preaching of the English church in its *robust* age" (*G. Eliot*); "the immense learning and *robust* sense of Selden" (*Coleridge*); "his [Johnson's] . . . innate *robustness* of soul" (*Frederic Harrison*). STURDY suggests something which stands firm and unyielding; it connotes a certain solidity, often of physique and character alike; as, "a square and *sturdy* little urchin" (*Hawthorne*); "How bowed the woods beneath their *sturdy* stroke" (*Gray*); "*sturdy* patriots" (*G. Borrow*). STALWART implies largeness of frame, and, in its figurative sense (*U. S.*), thoroughgoing allegiance or partisanship; as, "a *stalwart* man, limbed like the old heroic breeds" (*Lowell*); a *stalwart* farmer; a *stalwart* Republican. Cf. POWERFUL, COGENT. **Ant.** — Feeble, faint, infirm, frail, fragile, delicate, frangible, flimsy. See WEAK.

— *by or with a or the strong arm or hand.* By force rather than of right or by reason; by overmastering power; as, to govern *by the strong arm;* to put down discontent *with a strong hand.* Cf. STRONGHAND. — *to be strong for or on.* To be markedly prejudiced in favor of. *Colloq.*

Gr. *strongylos* round.] *Zool.* A genus of parasitic roundworms, the type of a family, **Stron·gyl'i·dae** (strŏn·jĭl'ĭ·dē) (see STRONGYLE, 1). *Strongylus equinus,* the type species, is a common parasite of the horse. The name has been broadly or incorrectly used as the generic name of many or most other members of the family, esp. of the stomach worm *Haemonchus contortus* (parasitic in sheep) and its near allies. — **stron'gy·loid** (strŏn'jĭ·loid), *adj. & n.* — **stron'gy·lid** (-lĭd), *n. & adj.*

stron'ti·a (strŏn'shĭ·ȧ), *n.* [NL. See STRONTIANITE.] *Chem.* **a** Strontium monoxide, SrO, a white solid, resembling lime and baryta. **b** Loosely, strontium hydroxide.

stron'ti·an (-shĭ·ăn; -shăn), *n.* Strontium, esp. in the form of some compound, as strontia or strontianite.

stron'ti·an·if'er·ous (-ĭf'ĕr·ŭs), *adj.* [*strontian* + *-ferous.*] Containing or yielding strontian.

stron'ti·an·ite (strŏn'shĭ·ăn·īt), *n.* [From *Strontian,* in Argyll Co., Scotland.] *Mineral.* Native strontium carbonate, $SrCO_3$, an orthorhombic, pale-green, white, gray, or yellowish mineral, in masses of radiating needle-shaped or spear-shaped crystals, in fibrous massive forms, etc. H., 3.5–4. Sp. gr., 3.68–3.71.

strontian white. = STRONTIUM WHITE.

strontian yellow. **a** Strontium chromate or a pigment of the same color. **b** A color, yellow in hue, of high saturation and very high brilliance. Cf. COLOR. — **stron'ti·an·yel'low,** *adj.*

stron'tic (strŏn'tĭk), *adj. Chem.* Of or pert. to strontium.

stront'i'on (strŏnt'ĭ'ŏn), *n.* [NL.] *Chem.* Ionic strontium, Sr^{++}.

stron·tit'ic (strŏn·tĭt'ĭk), *adj.* Strontic.

stron'ti·um (strŏn'shĭ·ŭm; -tĭ·ŭm), *n.* [NL. See STRONTIANITE.] *Chem.* A light bivalent element, one of the alkaline-earth metals, always naturally combined, chiefly in strontianite (carbonate) and celestite (sulphate). Symbol, *Sr;* at. no., 38; at. wt., 87.63. It is isolated, by electrolysis of the fused chloride, as a soft, yellowish metal, similar to calcium. When pure it is silver-white. Strontium compounds color the test flame crimson, and some, as the nitrate, are used in fireworks.

strontium hydroxide. *Chem.* A white solid, $Sr(OH)_2$, dissolving in water to form a decidedly alkaline solution. It forms a crystalline octahydrate. See STRONTIUM PROCESS.

strontium nitrate. *Chem.* A colorless salt, $Sr(NO_3)_2$, crystallizing from hot strong solutions in anhydrous form, and from cold solutions in prisms containing four molecules of water. It is used in fireworks, flares, etc. See STRONTIUM.

strontium oxide. Specif., = STRONTIA **a**.

strontium process. A process of refining sugar by adding a solution of strontium hydroxide to the molasses, precipitating a sucrate, which is removed, washed, and decomposed into sugar and strontium hydroxide.

strontium salicylate. *Pharm.* The strontium salt of salicylic acid, $Sr(C_7H_5O_3)_2 + 2H_2O$ used in the treatment of rheumatism and as an intestinal antiseptic.

strontium white. Strontium sulphate, $SrSO_4$, used as a pigment.

strontium yellow. Strontium chromate, $SrCrO_4$, used as a yellow pigment. It has little body.

strop (strŏp), *n.* [See STRAP.] **A** strap; specif.: **a** A strap for sharpening a razor. **b** *Naut.* = STRAP, *n.*, 11 **a**.

Hist.* One of a class of ascetics, principally in Syria, who lived on the tops of pillars; — also *pillarist, pillar saint.* (Saint) Simeon Stylites of Antioch (d. 459) was the most famous of these ascetics, some of whom existed in Russia and among the Ruthenians in the 16th century. — **sty-lit'ic** (stĭ-lĭt'ĭk), *adj.* — **sty'lit-ism** (stī'lĭt-ĭz'm), *n.*

styl'ize (stīl'īz), *v. t.;* STYL'IZED (-īzd); STYL'IZ-ING (-īz'ĭng). **1.** To conform to a style; to conventionalize; specif., in sculpture or the pictorial arts, to cause (the object represented) to conform to a style of expression rather than to the appearance of nature.
2. *Theater.* To design according to a stylistic pattern, esp. so that the mise en scène, costumes, etc., are illustrative of the idea of a play.
— styl'i-za'tion (-ĭ-zā'shŭn), *n.* — **styl'iz-er** (stīl'īz-ĕr), *n*

sty'lo- (stī'lō-), **styl-.** A combining form, Greek *stylo-, styl-*, from *stylos*, meaning *pillar*, as in *stylo*bate, *style.* Specif.: **a** *Bot. & Zool. Characterized by a style* or *stylar process*, as in *stylo*spore, *Stylo*ps. **b** *Anat. Styloid and*, as in *stylo*hyoid, *stylo*mastoid.

sty'lo (stī'lō), *n.; pl.* STYLOS (-lōz). Short for STYLOGRAPH.

sty'lo-au-ric'u-la'ris (stī'lō-ô-rĭk'ū-lā'rĭs), *adj.* [NL., fr. *stylo-* + *auricularis.*] *Anat.* An inconstant muscle slip extending from the root of the styloid process to the cartilage of the external auditory meatus.

sty'lo-bate (stī'lō-bāt), *n.* [L. *stylobates, stylobata*, fr. Gr. *stylobatēs*, fr. *stylos* a pillar + *batēs* one that treads.] *Arch.* The continuous flat coping, or pavement, on which a row of columns is supported; esp., the uppermost step of a stereobate supporting a peristyle. See SUBBASE; ORDER, *n.*, 18, *Illust.*

Sty'lo-chus (stī'lō-kŭs), *n.* [NL., fr. *stylo-* + Gr. *ochos* holding.] *Zool.* A genus of polyclad flatworms with an oval flat body, short tentacles and pharynx with several accessory lobes. *S. ellipticus* is one of the commonest marine planarians south of Cape Cod.

sty'lo-glos'sal (-glŏs'ăl), *adj.* [*stylo-* + *glossal.*] *Anat.* Connecting the styloid process and tongue; designating, or pertaining to, a muscle (the **sty'lo-glos'sus** [-ŭs]) so situated.

sty'lo-go-nid'i-um (stī'lō-gō-nĭd'ĭ-ŭm), *n.* [NL., fr. *stylo-* + *gonidium.*] A pycnospore.

sty'lo-graph (stī'lō-gräf), *n.* A stylographic pen.

sty'lo-graph'ic (-grăf'ĭk), *adj.* **1.** Of, pertaining to, or used in, stylography; as, *stylographic* tablets.
2. Designating a kind of fountain pen having a fine writing point fitted with a needle which by the pressure of the point on a surface is pushed back to release the flow of ink.

sty'lo-graph'i-cal (-grăf'ĭ-kăl), *adj.* Stylographic. — **sty'lo-graph'i-cal-ly,** *adv.*

stylographic pen. A pen having a conical point like that of a style, with a reservoir in the handle for ink; hence, loosely, any fountain pen. Cf. STYLOGRAPHIC, *adj.*, 2.

sty-log'ra-phy (stĭ-lŏg'rä-fĭ), *n.* [*style* + *-graphy.*] A mode of writing or tracing lines by means of a style or similar instrument on cards or tablets.

sty'lo-hy'al (stī'lō-hī'ăl), *n.* [*stylo-* + *hyoid* + *-al.*] *Zool.* An element of each side of the hyoid arch between the epihyal and tympanohyal which appears as a distinct element of the anterior cornu of the hyoid bone in many mammals. See STYLOID PROCESS **a.**

sty'lo-hy'oid (-oid), *adj.* [*stylo-* + *hyoid.*] *Anat. & Zool.* Pertaining to the styloid process and hyoid bone; designating, or pertaining to, (1) a slender muscle (the **sty'lo-hy-oi'de-us** [-hī-oi'dē-ŭs]) connecting the back part of the styloid process and the body of the hyoid bone, (2) a ligament connecting the tip of that process with the lesser cornu of that bone, or (3) the hyoid arch. — *n.* The stylohyoid muscle.

sty'lo-hy-oi'de-an (-hī-oi'dē-ăn), *adj.* Stylohyoid.

sty'loid (stī'loid), *adj.* [NL. *styloides*, fr. Gr. *styloeidēs*, fr. *stylos* pillar. See STOIC (cf. STYLE); -OID.] Styliform; *Anat.*, pertaining to or designating certain bony processes.

styloid process. *Anat.* **a** A long, slender process from the lower side of the temporal bone of man, corresponding to the tympanohyal and stylohyal of other mammals. **b** An oblique conical projection at the outer part of the distal end of the radius. **c** A projection on the inner back part of the distal end of the ulna, extending a little beyond the head of the bone. **d** A conical projection at the back part of the upper end of the fibula.

sty'lo-lite (stī'lō-līt), *n.* [*stylo-* + *-lite.*] *Geol.* A small, longitudinally grooved column, of the same material as the rock (usually limestone) in which it occurs. A single column is due, in some cases, to the slipping, under vertical pressure, of a part capped by a shell, through adjacent parts not so capped; but one or more layers may be affected by stylolitic structure throughout, where there is no capping object. — **sty'lo-lit'ic** (-lĭt'ĭk), *adj.*

sty'lo-man-dib'u-lar (-măn-dĭb'ū-lĕr), *adj. Anat.* Designating a ligament connecting the styloid process (sense **a**) and the angle of the lower jaw.

sty'lo-mas'toid (-măs'toid), *adj. Anat.* Designating a foramen (the termination of the facial canal) on the lower surface of the temporal bone between the styloid and mastoid processes, also the artery and vein traversing it.

sty-lom'e-ter (stī-lŏm'ē-tĕr), *n.* [*stylo-* + *-meter.*] An instrument for measuring columns.

Sty-lom'ma-toph'o-ra (stī-lŏm'ä-tŏf'ō-rä), *n. pl.* [NL., fr. *styl-* + *-omma* + *-phora.*] *Zool.* A suborder of Pulmonata having the eyes situated at the tips of retractile tentacles. It includes the common land snails and slugs, or Geophila. — **sty-lom'ma-toph'o-rous** (-rŭs), *adj.*

Sty'lo-nych'i-a (stī'lō-nĭk'ĭ-ä), *n.* [NL., fr. *styl-* + *-onychia.*] *Zool.* A genus of hypotrichous ciliates having an unsymmetrical body with three strong styles at the posterior end and a row of membranelles at the anterior end. They are common in stagnant water and move by swimming or by leaps. See HYPOTRICHA, *Illust.*

2/3

One of the Stylommatophora (*Urocoptis costata*).

sty'lo-pha-ryn'ge-al (-fă-rĭn'jē-ăl; -fär'ĭn-jē'ăl), *adj. Anat.* Pertaining to the styloid process (sense **a**) and the pharynx; designating a slender muscle (the **sty'lo-pha-ryn'ge-us** [-ŭs]) connecting the base of that process and side of the pharynx.

Sty-lop'i-dae (stī-lŏp'ĭ-dē), *n. pl.* [NL., fr. *Stylops* + *-idae.*] *Zool.* A family of Strepsiptera including numerous species parasitic on bees. — **sty'lo-pid** (stī'lō-pĭd), *n. & adj.*

sty'lo-pized (stī'lō-pīzd), *adj.* Infested by a parasite of the genus *Stylops* or a related genus. — **sty'lo-pi-za'tion** (-pĭ-zā'shŭn; -pī-zā'shŭn), *n.*

sty'lo-pod (stī'lō-pŏd), *n. Bot.* A stylopodium. *Rare.*

sty'lo-po'di-um (-pō'dĭ-ŭm), *n.; pl.* -DIA (-ä). [NL. See STYLE, sense 9; -PODIUM.] *Bot.* The conical swelling or expansion at the base of the style in plants of the carot family.

Sty'lops (stī'lŏps), *n.* [NL., fr. *styl-* + Gr. *ōps, ōpos,* the eye.] *Zool.* **a** See STREPSIPTERA. **b** [*not cap.*] Any insect of the genus *Stylops,* or family Stylopidae, or often by the order Strepsiptera.

Stylops (*S. spencei*). Much enlarged.

Sty'lo·san'thes (stī'lō·săn'thēz), *n.* [NL., fr. Gr. *stylos* pillar + *-anthes.*] *Bot.* A genus of herbs (family Fabaceae), widely distributed in warm regions. They have pinnately trifoliolate leaves and yellow flowers in small terminal or axillary clusters. *S. biflora,* one of the pencil flowers, is common in the southeastern United States.

sty'lo·spore (stī'lō·spōr; 181), *n.* [*stylo-* + *-spore.*] *Bot* A pycnospore. *Rare.*

sty·los'po·rous (stī·lŏs'pō·rŭs; stī'lō·spō'rŭs; 181), *adj. Bot.* Pertaining to, or of the nature of, a stylospore.

sty'lo·ste'gi·um (stī'lō·stē'jĭ·ŭm), *n.* [NL., fr. *stylo-* + Gr. *stegos* cover.] *Bot.* The inner corona in certain asclepiads, as *Stapelia.*

sty'lo·ste'mon (-stē'mŏn), *n.* [NL., fr. *stylo-* + Gr. *stēmōn* warp.] *Bot.* An epigynous stamen. *Obs.*

sty'lo·typ·ite (stī'lō·tĭp·īt), *n.* [*stylo-* + *typ-* + 1st *-ite,* 5.] *Mineral.* A sulphantimonite of copper, silver, and iron, occurring in black orthorhombic crystals. H., 3. Sp. gr., 4.7–5.2.

-sty'lous (-stī'lŭs). [See -STYLE.] *Bot.* A combining form, Greek *-stylos,* denoting *having* (such or so many) *styles,* as in tri*stylous.* Corresponding nouns denoting *state* end in **-sty'ly** (-stī'lĭ).

sty'lus (stī'lŭs), *n.* [L. See STYLE.] **1.** An instrument for writing. See STYLE, *n.,* 1.
2. In a phonograph, a pointed piece which is moved by the vibrations given to the diaphragm by a sound, producing an indented record; also, a blunter piece which follows this record, vibrates the diaphragm, and reproduces the sound.
3. A hard pointed piece, as of glass or other material, used for tracing or writing on carbon paper so as to make impressions on the paper beneath the carbon.
4. An indicator or pointer, as the gnomon of a sundial.
5. *Bot.* = STYLE, *n.,* 9.
6. *Zool.* **a** A style or stylet. **b** A uniradiate sponge spicule sharp at one end.

sty'mie (stī'mĭ), *n.* Also **sti'my** (stī'mĭ). [Appar. fr. earlier Scot. *stymie* one with poor sight, one who makes awkward motions, fr. *styme* a glimpse, glimmer, in *not to see* a *styme* not to see at all, of uncert. origin.] *Golf.* A condition which exists on the putting green when the ball nearer the hole lies in the line of play of the other ball. The balls must be played as they lie in a match between two players, unless they are six inches or less apart, in which case the ball nearer the hole may be lifted. Stymies are not played in three-ball or four-ball matches or in medal or stroke play.

sty'mie, *v. t.* Also **sti'my.** *Golf.* To play one's ball into a position where a stymie results for (an opponent or an opponent's ball).

Sty·m·pha'li·an (stĭm·fā'lĭ·ăn), *adj. Gr. Myth.* Pertaining to Lake Stymphalis (now Zaraka) in Arcadia, haunted by man-eating birds (**Stym·phal'i·des** [stĭm·făl'ĭ·dēz]) slain by Hercules (which see). — **Stym'pha·lid** (stĭm'fă·lĭd), *n. & adj.*

Sty·phe'li·a (stĭ·fē'lĭ·ȧ; -fēl'yȧ; 159), *n.* [NL., fr. Gr. *styphelos* rough; — from the stiff hairs of the corolla tube.] *Bot.* A large genus of heathlike shrubs (family Epacridaceae), mostly Australasian with a few found in the Pacific islands. They have small axillary flowers, with the calyx and corolla usually colored alike.

styph'nate (stĭf'nāt), *n. Chem.* A salt of styphnic acid.

styph'nic (-nĭk), *adj.* [Gr. *styphein* to contract.] *Chem.* Pertaining to or designating a yellow crystalline astringent acid, $(NO_2)_3C_6H(OH)_2$, obtained by the action of nitric acid on resorcinol, and otherwise; 2, 4, 6-trinitroresorcinol.

styp'sis (stĭp'sĭs), *n.* [LL., fr. Gr. *stypsis* a steeping in an astringent. See STYPTIC.] Application or use of styptics.

styp'tic (-tĭk), *adj.* [L. *stypticus,* fr. Gr. *styptikos,* fr. *styphein* to contract.] Producing contraction, as of the blood vessels; stopping bleeding; having the quality of restraining hemorrhage when applied to the bleeding part; astringent. — *n.* A styptic medicine. The chief styptics are alum, tannic acid, and the salts of iron, copper, and zinc.

styp'ti·cal (-tĭ·kăl), *adj.* Styptic. — **styp'ti·cal·ness,** *n.*

styptic bur. = VELVET BUR. *W. Ind.*

styptic collodion. Collodion containing an astringent, as tannin, used on cuts and wounds to stop bleeding.

styptic colloid. *Med.* A preparation of astringent and antiseptic substances with some colloid material, as collodion, for ready use.

styptic cotton. *Pharm.* A medicated cotton made by soaking purified cotton in a solution of ferric chloride, glycerin, and water, and drying. It is applied locally to stop bleeding.

styp·tic'i·ty (stĭp·tĭs'ĭ·tĭ), *n.* [ML. *stypticitas.*] Astringency.

styp'tic·ness, *n.* Stypticity. *Rare.*

styptic pencil. *Pharm.* A cylindrical mass of some styptic substance, as alum, applied to small wounds to stop bleeding.

styptic weed. The senna *Cassia occidentalis.*

Sty'ra·ca'ce·ae (stĭr'ȧ·kā'sē·ē), *n. pl.* [NL. See STYRAX.] *Bot.* A family of shrubs and trees (order Ebenales), comprising 6 genera and about 125 species, of wide distribution; the storax family. They have flowers with a 5-lobed corolla and ten stamens, and a dry or drupaceous fruit. *Styrax* and *Halesia* are the principal genera. — **sty'ra·ca'ceous** (-shŭs), *adj.*

styr'a·cin (stĭr'ȧ·sĭn; stī'rȧ-), *n.* [See STYRAX.] *Chem.* A white crystalline compound, $C_{18}H_{18}O_3$, extracted from storax and balsam of Peru; cinnamyl cinnamate.

Sty'rax (stī'răks), *n.* [L. *styrax, storax,* storax or the tree yielding it. See STORAX.] **1.** *Bot.* A large genus of widely distributed shrubs and trees typifying the family Styracaceae. They have pubescent or scruffy leaves and flowers in pendulous racemes, the petals distinct or slightly united. *S. benzoin* and *S. officinalis* yield resins (see BENZOIN, 1; STORAX, 1). *S. americana,* the spring orange, and other species are cultivated for ornament.
2. [*not cap.*] A plant or flower of this genus. **b** Storax.

sty'rene (stī'rēn; stĭr'ēn), *n. Chem.* **a** An unsaturated hydrocarbon, $C_6H_5CH{:}CH_2$, obtained by the distillation of storax, by the decomposition of cinnamic acid, and otherwise, as a fragrant, aromatic, mobile liquid; — called also *phenylethylene, vinylbenzene, styrole, styrolene, cinnamene,* etc. **b** The bivalent radical $C_6H_5CHCH_2$-, of which styrene (sense **a**) is the hydride.

Styr'i·an (stĭr'ĭ·ăn), *adj.* Of or pertaining to Styria, a province of Austria (see *Gaz.*). — *n.* A resident or inhabitant of Styria.

sty'ro·gal'lol (stī'rō·găl'ōl; -ŏl), *n.* [G. See STYROL, GALLIC (acid), 2d -OL.] *Chem.* A yellow crystalline compound, $C_{14}H_8O_6$, formed by heating cinnamic acid and gallic acid with concentrated sulphuric acid.

sty'ryl (stī'rĭl), *n.* [*Styrax* + *-yl.*] *Chem.* **a** The univalent radical $C_6H_5CH{:}CHCH_2$-, found in certain derivatives of styrene, etc. **b** Preferably, the univalent radical $C_6H_5CH{:}CH_2$-, of which styrene is the hydride. — **sty·ryl'ic** (stī·rĭl'ĭk), *adj.*

stythe (stīth), *n.* [E. dial., also *stife.*] *Mining.* Choke damp.

Styx (stĭks), *n.* [L., fr. Gr. *Styx, Stygos;* akin to Gr. *styx* (in pl.) frost, cold, *stygein* to hate, fear.] *Gr. Myth.* The principal river of the lower world, which, according to some accounts, flowed round it seven times and had to be crossed in passing to the regions of the dead; also, the nymph of the river, daughter of Oceanus and Tethys, by whom the most solemn oaths were sworn. The name was also given to a stream in a wild region of Arcadia, probably closely associated in popular belief with the infernal Styx.

Styx'i·an (stĭk'sĭ·ăn), *adj.* Stygian.

su'a·ble (sū'ȧ·b'l), *adj. Law.* Capable of being sued; subject to be called to answer in court. — **su'a·bil'i·ty** (-bĭl'ĭ·tĭ), *n.* — **su'a·bly** (sū'ȧ·blĭ), *adv.*

suade (swād), *v. t.* [L. *suadere.*] To persuade. *Archaic & Dial.*

Su·ae'da (sū·ē'dȧ), *n.* [NL., fr. Ar. *suwayd.*] *Bot.* A genus of herbs and shrubs of the goosefoot family (Chenopodiaceae). The species are common on seacoasts and in alkaline regions. Syn. *Dondia.*

Sua'kin gum (swä'kēn). [From *Suakin,* Egyptian seaport on the Red Sea.] = TALHA GUM.

suan pan (swän pän). [Chin. (Pek.) *suan'-p'an²,* lit., reckoning board.] *Math.* An abacus, employed by the Chinese, containing balls movable along rods held by a wooden frame; — called also *swan pan.*

su'ant (sū'ănt; sŭ'ănt), *adj.* [AF., pres. part. See SUE to pursue.] **a** Smooth; even; regular; steady. **b** Equable; agreeable. **c** Placid; quiet; grave; demure. — **su'ant·ly,** *adv. Both Now Dial.*

su'ant (sŭ'ănt). Variant of SEWAN.

sua'si·ble (swā'sĭ·b'l; -zĭ-), *adj.* [L. *suadere, suasum,* to persuade.] Capable of being persuaded; easily persuaded.

sua'sion (swā'zhŭn), *n.* [L. *suasio,* fr. *suadere, suasum,* to advise, persuade; akin to L. *suadus,* persuading, persuasive, *suavis* sweet. See SUAVE; cf. DISSUADE, PERSUADE.] Act of, or an instance of, urging, convincing, or persuading; persuasion; as, moral *suasion.* — **sua'sion·ist,** *n.*

sua'sive (swā'sĭv), *adj.* Persuasive; suasory. "Genial and *suasive* satire." *Earle.* — *n.* A persuasive force, speech, influence, etc. — **sua'sive·ly,** *adv.* — **sua'sive·ness,** *n.*

suave (swāv; swăv; 277), *adj.* [F., fr. L. *suavis* sweet, pleasant. See SWEET; cf. SUASION.] **a** Blandly pleasing; agreeable. **b** Smoothly polite, often implying some degree of insincerity; superficially gracious in manner; bland.
☞ COMBINATIONS are:
suave-looking, suave-mannered, suave-spoken.
Syn. — SUAVE, BLAND, OILY, UNCTUOUS, FULSOME, SMUG. SUAVE implies an affable or urbanely persuasive manner; BLAND suggests gently soothing or coaxing qualities; as, *suave* and ingratiating manners; the *suavity* of a diplomat; "the *bland,* emollient, saponaceous qualities both of sack and silver" (*Gray*); "His manners were gentle, complying, and *bland*" (*Goldsmith*); "Mr. Pickwick was . . . producing a constant succession of the *blandest* and most benevolent smiles" (*Dickens*). OILY and UNCTUOUS both suggest fawning, suppleness, or hypocrisy; FULSOME applies esp. to praise, flattery, etc., which is gross or cloying; as, "rills of *oily* eloquence" (*Cowper*); "a man of harsh temper and *oily* manners" (*Trollope*); "Oft at Bible meetings . . . he did his holy *oily* best" (*Tennyson*); "The look [of benevolence] was, perhaps, *unctuous,* rather than spiritual, and had, so to speak, a kind of fleshy effulgence. . . . He . . . smiled with more *unctuous* benignity than ever" (*Hawthorne*); cf. "that kind of *unction* which is nearly [allied] to cajolery" (*Scott*); "He was bedaubing one of those worthies with the most *fulsome* praise" (*Smollett*). SMUG, as here compared, implies bland or unctuous self-complacency; as, "It is edifying to behold him, fresh shaved and with *smug* face, singing out 'Amen' at early chapel" (*Thackeray*); "the *smug* conviction which every man seems to cherish that he is in the secret" (*T. E. Brown*). Cf. CIVIL, SMOOTH.
Ant. — Blunt, bluff, curt, brusque, unceremonious, uncivil, abrupt, churlish, rough.
— **suave'ly,** *adv.* — **suave'ness,** *n.*

sua·ve'o·lent (swȧ·vē'ō·lĕnt), *adj.* [L. *suaveolens.*] Of a sweet odor. *Rare.*

suav'i·fy (swăv'ĭ·fī), *v. t.* [*suave* + *-fy.*] To make suave.

sua·vil'o·quence (swȧ·vĭl'ō·kwĕns), *n.* [L. *suavilo-quentia,* fr. *suavis* sweet + *loquens,* pres. part. of *loqui* to speak.] Sweetness or agreeableness of speech. — **sua·vil'o·quent** (-kwĕnt), *adj. Both Rare.*

suav'i·ty (swăv'ĭ·tĭ; swā'vĭ·tĭ), *n.; pl.* -TIES (-tĭz). [F. and L.; F. *suavité,* fr. L. *suavitas.*] **1.** Sweetness of taste or odor, or of sound. *Obs.*
2. Quality of being blandly pleasing to the mind; superficial agreeableness; urbanity, sometimes with an implication of insincerity; as, *suavity* of manners, of language.

HYPO-.] A prefix signifying, in general, *under, below, beneath,* usually with adjectival or adverbial force, as in *subcellar, subscribe;* — opposite to *super-.* Specif.: **1.** **a** In many words, mostly of Latin origin, *sub-* has the sense of *under, beneath, below, down,* as in *subterranean,* underground; *submerge,* to plunge down. Cf. INFRA-, INFERO-. **b** In many English formations, esp. in terms in biology, medicine, etc., and in a few words of Latin origin, *sub-* expresses *in an inferior degree, an imperfect* or *partial state, somewhat, slightly, less than usual* or *normal, almost, nearly,* as in *subacid,* slightly acid; *subglobular,* almost globular; *subovate, subrigid, subsessile, suborbicular.* **c** In nouns denoting rank, title, position, occupation, classification, etc., *sub-* indicates a rank, title, or position, or the like, *next lower than, subordinate to,* or *inferior to,* that denoted by the subjoined word, as in *sublieutenant, subdeacon, subgenus, subfreshman, subspecies.* Hence *sub-* in various words implies an idea of *repetition,* so as to form subordinate parts or features, as in *subclassify, subdiversify,* etc. **d** Denoting a *subdivision of,* as in *subindividual, subcommittee, subdistrict, subscience.* **e** Denoting *continuation toward a plane below;* — with words denoting processes, as in *subdivide, sublet.* **f** Denoting *immediately posterior to,* as in *subapostolic, sub-Mycenaean.* **g** In many words from Latin, the force of *sub-* is not felt in English, but is used to denote: (1) *Secretly,* as in *suborn.* (2) *Up; away;* as in *subsist, subvert.* (3) *In another's place,* as in *substitute.*
2. *Agric.* Used for *subsoil,* as in *subpulverizers.*
3. *Anat., Bot., & Zool.* *Situated under* or *on the ventral side of,* as in *subhymenial, subcutaneous, subnervian;* also, denoting *a part so situated,* as in *subencephalon.*
4. *Chem.* Denoting that the constituent (of a compound) signified by the term to which it is prefixed is present in *only relatively small proportion,* or *less than the normal amount,* as in *suboxide,* silver *subiodide* (Ag_3I). Prefixed to the name of a salt it is usually equivalent to *basic,* as in *subacetate* (or *basic* acetate), bismuth *subiodide* (BiOI).
5. *Craniom.* Denoting *the index immediately below* (that denoted by the qualified word), as in *subbrachycephalic.*
6. *Geog. & Geol.* Denoting *near the base of; bordering upon;* as in *subalpine, subarctic, subarid.*

sub'in-vo-lu'tion (sŭb'ĭn-vŏ-lū'shŭn), *n.* Partial or incomplete involution; as, *subinvolution* of the uterus. — **sub-in'vo-lut'ed** (-ĭn'vŏ-lūt'ĕd; -ĭd; 119), *adj.*

sub-ir'ri-gate (sŭb-ĭr'ĭ-gāt), *v. t.;* -GAT'ED (-gāt'ĕd; -ĭd; 119); -GAT'ING (-gāt'ĭng). To irrigate below the surface, as by a system of underground porous pipes. — **sub'ir-ri-ga'tion** (-gā'shŭn), *n.*

sub'i-ta'ne-ous (sŭb'ĭ-tā'nē-ŭs), *adj.* Also, *Obs.,* **sub'i-ta'ny** (sŭb'ĭ-tā'nĭ). [L. *subitaneus.* See SUDDEN.] Sudden; hasty.

‖**su'bi-to** (sōō'bē-tō), *adv.* [It. & L.] *Music.* At once; suddenly; — in directions, as *piano subito,* soft at once.

Su-bi'ya (sōō-bē'yȧ), *n.* An archaic Bantu language in Northern Rhodesia.

sub-ja'cent (sŭb-jā'sĕnt; -s'nt), *adj.* [L. *subjacens,* pres. part. of *subjacere* to lie under, fr. *sub* under + *jacere* to lie. See ADJACENT.] Lying under or below; also, being lower, though not directly below; as, hills and *subjacent* valleys; occurring below the surface; as, a *subjacent* fire. — **sub-ja'cen-cy** (-sĕn-sĭ; -s'n-sĭ), *n.* — **-ja'cent-ly,** *adv.*

sub-ja'cent, *n.* 1. That which is subjacent. *Obs.*

2. *Logic.* A converse proposition. *Rare.*

sub'ject (sŭb'jĕkt; -jĭkt; 119), *adj.* [ME. *suget, soget, subget, subiect,* fr. OF. *suget, soget, subject, subget* (F. *sujet*), fr. L. *subjectus* lying under, subjected, past part. of *subjicere, subicere,* to throw, lay, place, or bring under, fr. *sub-* under + *jacere* to throw. See JET, *v.;* cf. TRAJECTORY.]

1. Situated under; lying below; subjacent. *Obs.*

2. Under the power or dominion of another; specif., *International Law,* owing allegiance to, or being a subject of, a particular sovereign or state; as, Jamaica is *subject* to Great Britain. "Esau was never *subject* to Jacob." *Locke.*

3. Exposed; liable; prone; disposed; as, a country *subject* to extreme heat; men are *subject* to temptation.

4. Being under the contingency of; dependent upon or exposed to (some contingent action); — with *to;* as, the treaty is *subject* to ratification.

5. Obedient; submissive.

Put them in mind t.. be *subject* to principalities. *Titus* iii. 1.

6. = SUBJECTED. *Obs.*

Syn. — Subordinate, inferior. — SUBJECT, INCIDENT are sometimes confused in their use. But the terms are really correlative, — *incident* being active and *subject* passive. INCIDENT applies to that to which anything is liable or exposed; SUBJECT applies to that which is liable or exposed to something. Thus, change is *incident* to life; life is *subject* to change; "Most *subject* is the fattest soil to weeds" (*Shak.*); "a malady most *incident* to maids" (*id.*). See APT.

sub'ject, *n.* [Through OF. (F. *sujet*), fr. L. *subjectus,* prop., past part., one who is subject or subjected, *subjectum* that which is spoken of, the foundation or subject of a proposition. See SUBJECT, *adj.*] 1. One who is placed under the authority, dominion, control, or influence of something else; specif., one bound in allegiance or service to a feudal superior; a vassal.

2. Specif., one who is subject to a monarch or ruler and is governed by his law; in a wider sense, one who lives in the territory of, and enjoys the protection of, and owes allegiance to, a sovereign power or state. Primarily and accurately speaking *subject* is used only to denote one who by birth, or now by naturalization, owes allegiance to a monarch or conquering state; but the term is loosely used, esp. in international law, to designate also a citizen (which see) of any other form of sovereign state, as of the United States, and even, in a still wider sense, a citizen of a commonwealth constituting a member of a sovereign state. See CITIZEN, 2; ALLEGIANCE, 2.

It is interesting to notice how the need of some word to express colonial citizenship has evolved the phrase "*subject* of a colony," first made use of by Sir G. J. Turner, L. J., in Low. *v.* Routledge, L. R. 1 Ch. 42, 1865. *Quick & Garran.*

3. The whole number of those owing allegiance to a sovereign or lord; citizens, collectively. *Obs.*

The lists and full proportions are all made
Out of his *subject.* *Shak.*

4. Matter; substance; material from which a thing is formed. *Obs.*

5. Basis for action; reason; cause; motive.

6. One who or that which is subjected to any operation or process; as, the *subjects* in a nutrition experiment. Specif.: a *Psychol.* A person or animal whose mental states or activities are studied or tested. b *Anat.* A dead body for dissection.

7. That concerning which anything is said or done; the thing or person treated of; matter; theme; topic.

This *subject* for heroic song. *Milton.*

8. An organized body of knowledge, as chemistry, algebra, or botany, forming a study (sense 3), esp. when taught in an educational institution; subject matter.

9. *Fine Arts.* That which it is the aim of the artist to represent, as an incident, scene, figure, group, etc.

10. *Gram.* The word or word group denoting that of which anything is affirmed or predicated; the word or words, with or without modifiers, construed as the nominative of a verb. The subject of a sentence is either a noun or a word, phrase, or clause used as a noun equivalent. Where the subject is a noun (or noun equivalent with modifiers), the whole phrase is called the *complete subject,* in distinction from the simple or kernel subject word. A *grammatical* or *formal subject,* as being the subject only in the form of sentence construction, is sometimes distinguished from the *logical subject,* the real subject of predication. Thus in, it is hard to do right, *it* is the grammatical and *to do right* is the logical, subject. A subject may be *compound* (the *winds and waves* obey him).

11. *Hort.* A plant suitable for a definite site or effect; — as, a hedge *subject;* greenhouse *subject.*

12. *Logic.* That term of a proposition which denotes what the proposition is about; also, that such a term denotes; the topic of an affirmation or denial.

In affirmation at any rate, if not in negation, we commonly regard the *subject* as a thing, or class of things endowed with miscellaneous and indefinitely numerous attributes, the function of the predicate being to modify the *subject* by adding on one or more fresh attributes. *John Venn.*

13. *Music.* The principal theme, or melodic phrase, on which a composition or a movement is based; the antecedent, dux, etc., of a contrapuntal work, as a fugue or canon.
The earliest known form of *subject* is the ecclesiastical cantus firmus, or plain song. *Rockstro.*
14. *Philos.* **a** That of which a quality, attribute, or relation may be affirmed or in which it may inhere; the theme of a discourse or predication, the identical reference of related thoughts, or a material, be it physical or ideal, in which differences may appear.
That which manifests its qualities . . . — that in which the appearing causes inhere, that to which they belong — is called their *subject* or substance, or substratum. *Sir W. Hamilton.*
b Hence, substance; substratum; esp., substantive reality; the real, conceived as material or essential being. **c** That which sustains or is embodied in thought or consciousness; the thinking agent; the mind, ego, or reality of whatever sort, which supports, or assumes the form of, mental operations; as, in the idealistic dictum, "No object without a *subject.*" See OBJECT, *n.*, 7.
Augustine intended the "Quod si fallor, sum," to be merely an indirect refutation of the principles of the Academy, and not a direct demonstration of the existence of the thinking *subject.* *Wm. Turner.*
The individuality of the organism corresponds to, though it is not necessarily identical with, the psychological *subject*, while to the environment and its changes corresponds the objective continuum or totum objectivum already described. *James Ward (Encyc. Brit.).*
The philosophers of mind have, in a manner, usurped and appropriated this expression to themselves. Accordingly, in their hands, the phrases *conscious* or *thinking subject*, and *subject*, mean precisely the same thing. *Sir W. Hamilton.*

sub·ject' (sŭb·jĕkt'), *v.*; SUB·JECT'ED; SUB·JECT'ING. [OF. *subjecter*, fr. L. *subjectare*, freq. of *subjicere.* See SUBJECT, *adj.*] *Transitive:* **1.** Literally, to throw under; to cause to lie beneath or below; to make subjacent. *Obs.*
In one short view *subjected* to our eye,
Gods, emperors, heroes, sages, beauties, lie. *Pope.*
2. To bring under control or dominion; to subjugate.
Firmness of mind that *subjects* every gratification of sense to the rule of right reason. *C. Middleton.*
3. To make subservient or submissive. *Milton.*
4. To make liable; to predispose; — with *to*; as, credulity *subjects* a person to impositions.
5. To submit; to make accountable; — with *to.*
God is not bound to *subject* his ways of operation to the scrutiny of our thoughts. *Locke.*
6. To cause to undergo; to submit (a thing or person) to the action or effect (of something); to expose; — with *to*; as, to *subject* a substance to heat, or a person to a test.
7. *Com.* To subject to discount.
—, *Intransitive:* To be or become subject. *Obs.*
Syn. — Subjugate, submit, subordinate.

sub'ject cat'a·logue (sŭb'jĕkt; -jĭkt). *Libraries.* A catalogue in which books, etc., are listed only under the subjects treated, arranged alphabetically or by classes.

sub·ject'ed (sŭb·jĕk'tĕd; -tĭd; 119), *adj.* **a** *Obs.* Placed below; subjacent. **b** Subjugated; hence, submissive. — **sub·ject'ed·ly**, *adv.* — **sub·ject'ed·ness**, *n.*

sub·jec'ti·fy (-jĕk'tĭ·fī), *v. t.* To identify with a subject; to interpret in terms of subjective experience. — **sub·jec'ti·fi·ca'tion** (-fĭ·kā'shŭn), *n.*

sub·jec'tile (-tĭl; -tīl; 155), *adj.* [See SUBJECT; 1st -ILE.] Capable of receiving an impression, as from a picture, engraving, etc. — **sub·jec'tile**, *n. Both Rare.*

subject index. An index of subjects, or topics, rather than of words or items.

sub·jec'tion (sŭb·jĕk'shŭn), *n.* [OF., fr. L. *subjectio.* See SUBJECT, *adj.*] **1.** Act of subjecting or subduing; subjugation; also, *Obs.*, domination; government.
2. State of being subject, or under the power, control, and government of another; a state of obedience or submissiveness; as, *subjection* to the laws.
3. Obligation, as by a contract, pledge, etc.; liability; condition of being under some obligation or necessity. *Obs.*
4. *Logic.* Attachment of a subject to a predicate; — correlative to *predication.*

sub·jec'tion·al (-ăl; -ĭ), *adj.* Of or pert. to subjection.

sub·jec'tive (sŭb·jĕk'tĭv; sŭb-; 66), *adj.* [L. *subjectivus.*] **1.** Of the nature of, or pertaining to, a subject; having the character or quality of a subject.
2. Of or pert. to a political subject; submissive. *Rare.*
3. *Gram.* Designating or referring to the subject; specif., nominative.
4. *Lit. & Art.* Making prominent the individuality of a writer or an artist; also, modified or affected by the personal views, mental and emotional background, etc., of the author, painter, musician, or the like; as, a *subjective* painting or writer.
5. *Philos.* **a** *Obs.* Pertaining to the real or essential being of that which supports qualities, attributes, or relations; substantial; real; objective (in the modern sense. See OBJECTIVE, 9 **b**). Cf. OBJECTIVE, 9 **a**. **b** Of, pertaining to, or determined by, the mind, ego, or consciousness as the subject of experience and knowledge. (Cf. SUBJECT, 14 **c**); as, *subjective* reality; also, characteristic of or belonging to reality as perceived or known as opposed to reality as it is in itself or independent of mind; phenomenal. Cf. OBJECTIVE, 9 **b**.
In the philosophy of the mind, *subjective* denotes what is to be referred to the thinking subject, the ego; objective, what belongs to the object of thought, the nonego. *Sir W. Hamilton.*
It appears to disprove . . . Kant's counter assertion that space is wholly *subjective.* *Bowen.*
c Of or pertaining to whatever in experience or knowledge is conditioned by merely personal characteristics of mind, or by particular states of mind, as opposed to what is determined only by universal reason or the universal conditions of human experience and knowledge; hence, sometimes, not reliable; invalid; as, a *subjective* apprehension; *subjective* evaluation. Cf. OBJECTIVE, 9 **c**.
At the outset, *subjective* and objective express plainly enough a relation between the act of perception and the object perceived. But soon some one understands by it the position of the single individual in relation to the entire mass of persons judging; and then the relation of the specifically human view of the world to the real nature of things; and, finally, the relation of thought to being in general. *R. Eucken (Phelps).*
6. Hence, arising from, concerned with, or belonging to, the individual as contrasted with the physical or social environment. Specif.: **a** Due to conditions within the brain and sense organs and not to external stimuli; as, *subjective* sensations. **b** Affected by the individual's bias and limitations; as, a *subjective* judgment. **c** Requiring the individual's attention to his own states and processes; as, *subjective* observation; *subjective* symptoms. **d** Fanciful; illusory. **e** Excessively or moodily introspective.
— **sub·jec'tive·ly**, *adv.* — **sub·jec'tive·ness**, *n.*

sub·jec'tive (sŭb·jĕk'tĭv; sŭb-; 66), *n.* Nominative.

subjective time. See TIME, *n.*, 24.

subjective utility. See UTILITY, 2.

subjective validity. *Philos.* Validity relative to the conditions of the thinking subject, either to the universal limitations of human experience and knowledge, or to personal limitations (such as ignorance) or circumstances of individual judgment.

subjective value. See VALUE, *n.*, 14 **d**.

subjective verb. *Gram.* Intransitive verb. See OBJECTIVE, *adj.*, 4 **b**. *Rare.*

subjective yellow. A yellow due to a combination of two stimuli ordinarily evoking separately a red and a green.

sub·jec'tiv·ism (sŭb·jĕk'tĭv·ĭz'm), *n.* **1.** *Metaph.* The theory which limits knowledge to conscious states and elements; subjective idealism; also, a theory which attaches great or supreme importance to the subjective elements in experience, as Kantianism with its stress upon the a priori forms of experience, or Protagoreanism, teaching that all truth is relative to human nature.
2. *Ethics.* **a** The doctrine that the supreme good, or the end of ethical conduct, is the realization of some type of subjective experience or feeling, as pleasure. **b** The doctrine that individual feeling or apprehension is the ultimate criterion of the good and the right.
— **sub·jec'tiv·ist**, *n.* — **sub·jec'ti·vis'tic** (-tĭ·vĭs'tĭk), *adj.* — **sub·jec'tiv·ist·ic·al·ly** (-tĭ·kăl·ĭ), *adv.*

sub'jec·tiv'i·ty (sŭb'jĕk·tĭv'ĭ·tĭ), *n.* **1.** Subjective character, quality, state, or nature; specif., in artistic and literary works, individuality of the artist as expressed through his work or performance.
2. = SUBJECTIVISM.
3. In scientific observation, the quality of the investigator which affects the results of observational investigation by reason of the individual and peculiar characteristics and reaction of the media by the aid of which the investigations are conducted. Cf. PERSONAL EQUATION.
4. *Theol.* The testing of religious truth solely by standards which can be applied only by the individual subject making the judgment, as by some subjective impression or feeling, or by an arbitrary individual purpose or will to believe, instead of by some objective criterion accessible to others, such as logical reasoning, history, verification in generally accessible experience, or even some traditional external authority frankly recognized as such.

sub'jec·ti'vo- (sŭb'jĕk·tĭ'vō-). A combining form denoting *subjective and* (see -o), as in:
subjectivoidealistic, subjectivo-objective.

subject matter. Substance; matter from which anything is formed; subject; specif., the matter presented for consideration in statement or discussion, as in a treatise or argument; collectively, the essential facts, data, ideas, etc., at the base of a question under consideration; subject of thought or study.
As science makes progress in any *subject matter*, poetry recedes from it. *J. H. Newman.*

sub'ject–ob'ject, *adj.* Of or pertaining to the relation or situation in which a mind, or subject, knows or apprehends an object.

sub'ject–ob'ject, *n.* **1.** That which is at once subject and object, or knower and known.
2. *Philos.* **a** The relation or situation characteristic of knowledge, in which a subject knows an object; also, the object of knowledge conceived as inseparably related to the known, or the subject as related to something known. **b** With Fichte, the ego as object of its own knowledge; hence, a self-conscious being, such as man.

sub'ject–ob'jec·tiv'i·ty, *n. Philos.* The essential character or status of a subject-object (which see).

subject substantive. *Gram.* A simple subject. Cf. SUBJECT, *n.*, 10.

subject term. = SUBJECT, *n.*, 12.

sub·jic'i·ble (sŭb·jĭs'ĭ·b'l), *adj.* **1.** [L. *subjicere* to subject.] That may be subjected. *Obs.*
2. *Logic.* That may be made the subject of a predicate.

sub·join' (sŭb·join'), *v. t.*; -JOINED' (-joind'); -JOIN'ING. [MF. *subjoindre*, fr. L. *subjungere.* See SUB-; JOIN. Cf. SUBJUNCTIVE.] To add after something else, esp. something said or written; to place immediately after or next to; to annex; append; as, to *subjoin* a reason.
Syn. — Affix. See ATTACH.

2. Formerly, in England, a sum of money granted by Parliament to the crown and raised by extraordinary or special taxation, in distinction from the proceeds of the customs or other taxes levied by royal prerogative. Subsidies came to be granted annually or for fixed periods, consisting usually of a tax at the rate of 4s. in the pound upon the yearly value of land and of 2s. 8d. upon the value of goods, besides other minor sums, as that granted by the clergy. Subsidies were replaced during the Commonwealth with revenue raised by a land tax, and no subsidies were subsequently granted, except those to Charles II before 1670. 3. a A sum of money granted by one state to another, as to a friendly power to aid in the prosecution of a war. b A grant of funds or property from a government, as of the state or a municipal corporation, to a private person or company to assist in the establishment or support of an enterprise deemed advantageous to the public; a subvention. In practice subsidies are chiefly granted in aid of transportation enterprises, as to ship, canal, air-transport, or railroad companies, bounties on sugar being next in importance. A subsidy may be a simple gift or may consist in the payment of an amount in excess of the usual charges for any service, as in carrying the mails, or of funds to aid in establishing or maintaining a service or equipment larger or more powerful than the state of trade would warrant, as the building and keeping in service of vessels designed for use as cruisers and auxiliaries in war. *Subsidy* is often inexactly used to designate an entire payment for services, as for carrying mail, which properly speaking includes compensation for actual services and a subsidy proper, consisting in the sum paid in excess of the compensation.

Syn. — SUBSIDY, SUBVENTION, BOUNTY have various technical senses, for which see defs. In ordinary usage, SUBSIDY is the general term, and often carries a derogatory implication; SUBVENTION applies esp. to grants for artistic, literary, or scientific, rather than commercial, purposes; BOUNTY emphasizes the idea of a premium.

sub'stance (sŭb'stăns), *n.* [OF., fr. L. *substantia*, fr. *substare* to be under or present, to stand firm, fr. *sub* under + *stare* to stand. See STAND.] 1. That which underlies all outward manifestations; the reality itself, whether material or spiritual; substratum; the subject which possesses attributes; that in which qualities inhere; the abiding part of any existence, in distinction from that which is accidental to it; the permanent and identical in any process of change; that which constitutes anything what it is; the real essence or nature of a thing. In metaphysics *substance* may denote: a The *subject;* that which is, or of which something may be predicated. Substance in this sense is conceived as a real or ontological subject rather than a merely logical one. b The *essence;* that which makes a thing what it is, or gives it its essential nature. Substance in this sense is always the essence of an existent thing; it is essence plus existence; a real or determinate subject. c The *substratum;* that which supports attributes or modes, or exists as the material of individuation; matter. Substance in this sense is totally indeterminate; all that can be said of it is that it is the basis of determinations of realities. d An *individual reality* or being considered as an existent entity; a subsistent being; hypostasis.

Heroic virtue did his actions guide,
And he the *substance*, not the appearance, chose. *Dryden.*

St. Thomas, following Aristotle, distinguished the first *substance*, which is the individual, or hypostasis, and the second *substance*, which is the universal substantial nature abstracted from the individual. First *substance* really exists as such. Second *substance* does not exist as such, except in the mind. *Wm. Turner.*

Aristotle meant by it [*substance*] any distinct thing; e. g., I, you, an animal, a plant, the earth, the moon, the sun, God. He calls each of these, as existing apart, a thing per se (*kath' hauto*). It is true that, having divided a natural *substance* into form and matter, he called each element "*substance.*" *Thos. Case* (*Encyc. Brit.*).

2. The most important element in any existence; the characteristic and essential components of anything; the main part.

This edition is the same in *substance* with the Latin. *Bp. Burnet.*

sug'ar (shōōg'ĕr), *n.* [ME. *suger, sugre, sucre,* fr. OF. *çucre, sucre, sukere* (F. *sucre*), fr. ML. *succarum* (also *zuzurum*), fr. Ar. *sukkar,* fr. Per. *shakar,* fr. Prakrit *sakkara,* fr. Skr. *śarkarā* gravel, grit, sugar; akin to Gr. *krokalē* pebble, in pl., gravel, beach. Cf. JAGGERY, SACCHARIN, SUCROSE.] **1.** A sweet, crystallizable substance, colorless or white when pure, occurring in many plant juices, and forming an important article of human food; — called specif. *cane sugar, sucrose,* and *saccharose.* The chief sources of sugar are the sugar cane and the sugar beet, the completely refined products of which are identical and form the granulated sugar, loaf sugar, etc., of commerce. The cane juice, obtained by expression, is treated with lime to remove impurities, filtered, and evaporated to crystallization. The mother liquor, or molasses, is removed by draining or (now usually) by a centrifugal. The crude yellowish or brown sugar thus obtained is usually refined at central plants by redissolving, clarifying, decolorizing, and recrystallizing. In the case of beets the sugar is removed by extraction with water (diffusion) and carried to the refined state in one operation. Crude cane sugar is often sold as *brown sugar,* but crude beet sugar has an unpleasant flavor. Some sugar is also made from palm trees, maple trees, etc. Sugar forms fine monoclinic crystals melting at 186° C. (367° F.), which dissolve in about half their weight of water at ordinary temperature. Chemically, it is a disaccharide of the formula $C_{12}H_{22}O_{11}$, formed by union of one molecule of dextrose with one of levulose. It does not reduce Fehling solution and does not ferment directly, but is converted by invertase (or by heating with acids) into the fermentable mixture called *invert sugar.* It is dextrorotatory, a property which is used in estimating the strength of its solutions. Sugar is a food, and also serves as a condiment and preservative for other foods. See FOOD, 1.

2. By extension, any of a class of sweet, soluble compounds comprising the simpler carbohydrates. See CARBOHYDRATE. The simple sugars, those not decomposable by hydrolysis, are called *monosaccharides.* Complex sugars are formed by the condensation of two, three, or four molecules of simple sugars and are called *disaccharides, trisaccharides,* and *tetrasaccharides.* For the structure and classification of simple sugars, see MONOSACCHARIDE. Among the important natural sugars are *sucrose* (see def. 1), or *cane sugar, dextrose* (d-*glucose*), or *grape sugar, levulose* (d-*fructose*), or *fruit sugar, lactose,* or *milk sugar,* and *maltose,* or *malt sugar.* Some of these, and also many others, have been made synthetically.

☞ COMBINATIONS (all adjectives) are:

sullen-browed	sullen-looking	sullen-sour
sullen-eyed	sullen-natured	sullen-visaged
sullenhearted	sullen-seeming	sullen-wise

Syn. — Sour, cross, ill-humored, ill-natured, peevish, fretful, petulant, gloomy, moody, austere, gruff, crusty, churlish, harsh, cynical, spiteful.—SULLEN, SULKY, SURLY, GLUM, MOROSE, SATURNINE, CRABBED, SPLENETIC. One is SULLEN who is (often by disposition) gloomily silent and ill-humored; one is SULKY who is childishly sullen, or inclined to indulge in fits of sullenness; one is GLUM who is silent and dismal, often with a touch of dogged sullenness; as, "*Sullenness* does not imply silence, but an ill-natured silence" (*Tatler*); "In a morning I am always *sullen*" (*Byron*); "Sheridan was generally very dull in society, and sat *sullen* and silent" (*Scott*); "Lethe's *sullen* water" (*Shelley*); "In his pleasantest and most gracious moods he looked like a *sulky* cockatoo" (*Mrs. Gaskell*); "two persons . . . sitting . . . in neat evening costume, sipping a little sherry, silent, genteel, and *glum*" (*Thackeray*); "as *glum* as an undertaker" (*id.*); "He looked *glum* under scolding" (*G. Eliot*). SURLY adds to *sullen* the idea of churlishness or gruffness; MOROSE suggests a sour austerity; as, "Mason replied instantly, in a *surly*, nasal tone" (*N. Nicholls*); "*surly* eyes, brow-hidden" (*Keats*); "a *surly* mastiff" (*Cowper*); "the somewhat *surly* goodness, the hard and unattractive pieties into which she cannot really enter" (*W. Pater*); "should there be any cold-blooded and *morose* mortals who really dislike this book" (*Boswell*); "a *morose*, ill-conditioned, ill-natured person" (*South*); "The *moroseness* of age and infirmity never touched him" (*M. Arnold*). SATURNINE implies a gloomily taciturn and heavy disposition; CRABBED suggests a crusty or peevish moroseness; SPLENETIC adds to *morose* the implication of malice or spite; as, "a tall, dark, *saturnine* youth, sparing of speech" (*Lamb*); "Sheridan's humor, or rather wit, was always *saturnine*, and sometimes savage; he never laughed" (*Byron*); "*saturnine*, sour-blooded persons" (*G. Eliot*); "She is ten times more gentle than her father's *crabbed*, and he's composed of harshness" (*Shak.*); "Divine Philosophy! not harsh and *crabbed* as dull fools suppose" (*Milton*); "more peevish, cross, and *splenetic*, than dog distract or monkey sick" (*S. Butler*); "that *splenetic* temper, which seems to grudge brightness to the flames of hell" (*Landor*); "*splenetic*, personal, base, a wounded thing with a rancorous cry" (*Tennyson*). Cf. PEEVISH, SOUR, BLUFF, MELANCHOLY, SILENT, ACRIMONY, STRICT.

sulph·ac'id (sŭlf·ăs'ĭd), *n.* [*sulph-* + *acid.*] *Chem.* **a** Thio acid. **b** Sulphonic acid.

sulph·am'ate (sŭlf·ăm'āt; sŭl'fä·māt), *n. Chem.* A salt of sulphamic acid.

sulph·am'ic (sŭlf·ăm'ĭk), *adj.* Designating a crystalline acid, NH_2SO_3H, an amido derivative of sulphuric acid; also, designating any of a group of organic derivatives of this acid.

sulph·am'ide (sŭlf·ăm'ĭd, -īd; sŭl'fä·mīd; -mĭd), *n.* Also **sulph·am'id.** *Chem.* **a** A colorless, crystalline, neutral compound, $SO_2(NH_2)_2$, obtained by treating sulphuryl chloride with ammonia gas; the amide of sulphuric acid. By extension, any of several derivatives of it. **b** A sulphonamide.

sulph·a·mid'ic (sŭlf'ä·mĭd'ĭk), *adj. Chem.* Sulphamic.

sulph·a·mine' (sŭlf'ä·mēn'; sŭlf·ăm'ĭn), *n.* Also **sulph·am'in** (sŭlf·ăm'ĭn). *Chem.* Sulphamyl.

sulph·a·min'ic (sŭlf'ä·mĭn'ĭk), *adj. Chem.* Sulphamic.

sul'pha·myl (sŭl'fä·mĭl), *n. Chem.* The univalent radical, NH_2SO_2-, of sulphamic acid. Cf. BENZOYL.

sulph·a·nil'ic (sŭlf'ä·nĭl'ĭk), *adj.* [From *sulphuric* + *aniline.*] *Chem.* Pertaining to or designating any of three isomeric sulphonic acids, $C_6H_4(NH_2)SO_3H$, derived from aniline; amino-benzene-sulphonic; specif., the para acid, a crystalline compound obtained by the sulphonation of aniline and used in the manufacture of certain dyes.

sulph·an'ti·mo·nide (sŭlf·ăn'tĭ·mō·nīd; -nĭd), *n.* Also **-nid.** *Mineral Chem.* A compound which is both a sulphide and an antimonide.

sulph·ar'se·nide (sŭlf·är'sē·nīd; -nĭd), *n.* Also **-nid.** *Mineral Chem.* A compound which is both a sulphide and an arsenide.

sulph·ars'phen·a·mine' (-ärs'fĕn·ä·mēn'; -ăm'ĭn), *n.* [*sulph-* + *arsphenamine.*] *Pharm.* An orange-yellow powder (chemically the disodium salt of 3,3'-diamino-4,4'-dihydroxy-arsenobenzene-N-dimethylene-sulphonic acid), used like neoarsphenamine in the treatment of syphilis.

sul'phat·ase (sŭl'fä·tās), *n.* [*sulphate* + *-ase.*] *Biochem.* An enzyme that accelerates the hydrolysis of sulphuric acid esters, found in yeast and bacteria.

sul'phate (sŭl'fāt), *n.* [F., fr. NL. *sulphas, -atis,* fr. L. *sulphur, sulpur, sulfur,* brimstone, sulphur. See SULPHUR.] *Chem.* A salt or ester of sulphuric acid. Nearly all the normal metallic sulphates are fairly soluble in water, except those of barium, lead, strontium, and calcium.

sul'phate, *v. t.;* SUL'PHAT·ED (-fāt·ĕd; -ĭd; 119); SUL'PHAT·ING (-fāt·ĭng). *Transitive:* **1.** To treat or impregnate with sulphuric acid or a sulphate; to convert into sulphate.
2. *Elec.* To form a deposit of a whitish scale of lead sulphate on (the plates of a storage battery). If the battery is allowed to remain in a discharged condition, or if excess acid (H_2SO_4) is present, the sulphate ($PbSO_4$) appears to harden and hinders the action of the battery by clogging up the pores of the plates.
—, *Intransitive:* To become sulphated.
— **sul·pha'tion** (sŭl·fā'shŭn), *n.*

-sul'phate. A combining form of *sulphate*, as in *disulphate*, hydro*sulphate*.

sul'phat·ed oil (sŭl'fāt·ĕd; -ĭd; 119). Sulphonated oil.

sulphate green. A color, green in hue, of medium saturation and medium brilliance. Cf. COLOR.

sulphate paper. Paper made wholly or partly by the sulphate process.

sulphate process. A process for making wood pulp (**sulphate pulp**) by boiling wood chips under pressure with an alkaline solution of sodium sulphate.

sul·phat'ic (sŭl·fāt'ĭk), *adj.* Of, pertaining to, resembling, or containing, a sulphate or sulphates.

sul'phat·ize (sŭl'fāt·īz), *v. t.;* -IZED (-īzd); -IZ'ING (-īz'-ĭng). To convert into sulphate, as sulphide ores by roasting. — **sul'phat·i·za'tion** (-ĭ·zā'shŭn; -ĭ·zā'-), *n.*

sul·pha'to-, sul·fa'to- (sŭl·fā'tō-; sŭl'fä·tō-). *Chem.* A combining form for *sulphate*, denoting *a sulphate as a constituent*, or *the presence of the sulphate group*, SO_4, esp. in the ammino compounds, as in **sul·pha'to-a·ce'tic, sul·pha'to-car·bon'ic.** — **sul·pha'to, sul·fa'to** (-tō), *adj.*

sulph·az'ide (sŭlf·ăz'ĭd; -īd; 157), *n.* Also **sulph·az'id.** *Org. Chem.* Any of a class of compounds having the general formula $RNHNHSO_2R'$; a sulphonic hydrazide.

sulph·ich'thy·o·late (-ĭk'thĭ·ō·lāt), *n.* Ichthyolsulphonate. See ICHTHYOL.

sul'phide (sŭl'fīd; -fĭd; 157), *n.* Also **-phid.** *Chem.* A compound of sulphur with an element or radical; a salt or ester of hydrogen sulphide; — formerly called *sulphuret.* Excepting the sulphides of the alkali metals, the metallic sulphides are insoluble in water, or nearly so, and many occur as minerals.

sul'phide, *v. t.* To treat with, or convert into, a sulphide.
— **sul'phid·a'tion** (sŭl'fĭd·ā'shŭn; -fĭd-), *n.*

-sul'phide. A combining form of *sulphide*, as in oxy*sulphide*, tri*sulphide*.

sulphide dye *or* **color.** Any of a class of direct dyes for cotton and other vegetable fibers, made by fusing various organic compounds with sulphur and alkali sulphide (or with a thiosulphate). They resemble the vat dyes in being fully developed on the fiber by oxidation in air.

sulphide toning. *Photog.* See SULPHUR TONING.

sul·phid'ic (sŭl·fĭd'ĭk), *adj.* **1.** Of, pertaining to, or containing, sulphide.
2. Sulphitic, or original. *Slang.*

sul'phid·ize (sŭl'fĭd·īz; -fĭd-), *v. t.* To sulphide.

sul'phi·nate (sŭl'fĭ·nāt), *n.* **A** salt or ester of a sulphinic acid.

sulph·in'di·got'ic ac'id (sŭlf·ĭn'dĭ·gŏt'ĭk). Indigo extract.

sul'phine (sŭl'fēn; -fĭn; 157), *n.* Also **-phin.** *Chem.* Sulphonium; also, any sulphonium base or compound.

sulphine color *or* **dye.** A sulphide dye.

sulphine yellow. A color, reddish-yellow in hue, of medium saturation and high brilliance. Cf. COLOR.

sul·phin'ic (sŭl·fĭn'ĭk), *adj. Chem.* Pertaining to or designating any of a series of acids containing the group $-SO_2H$, obtained by reducing the chlorides of sulphonic acids, and in other ways.

sul'phi·nide (sŭl'fĭ·nīd; -nĭd; 157), *n.* Also **-nid.** [Arbitrarily formed fr. anhydro-ortho*sulph*amine-benzoic acid + am*ide* or im*ide*.] *Chem.* An imide of a carboxylic-sulphonic acid; specif., saccharin (sense 2).

sul·phi'no-, sul·fi'no- (sŭl·fē'nō-). *Chem.* A combining form for *sulphinic*, denoting the *presence of the sulphinic acid group*, $-SO_2H$.

sul'phi·nyl (sŭl'fĭ·nĭl), *n.* [*sulphine* + *-yl.*] *Chem.* Thionyl. See THIONYL.

sul'phi·ta'tion (sŭl'fĭ·tā'shŭn), *n.* [*sulphite* + *-ation.*] *Sugar Mfg.* Act or process of treating saccharine juice with sulphur dioxide to bleach it, remove impurities, etc.

sul'phite (sŭl'fīt), *n.* [F. See SULPHATE.] **1.** *Chem.* **A** salt or ester of sulphurous acid. See SULPHUROUS ACID **b.**
2. A person who is spontaneous and original in his habits of thought and conversation. Cf. BROMIDE. *Slang.*
— **sul·phit'ic** (sŭl·fĭt'ĭk), *adj.*

-sul'phite. A combining form of *sulphite*, as in hypo*sulphite*, pyro*sulphite*.

sul'phite (sŭl'fīt), *v. t.* To treat with sulphur dioxide, sulphurous acid, or a sulphite.

sul'phite, *adj.* Of or pertaining to sulphite pulp.

sulphite brown. Brown wrapping paper made from sulphite pulp.

sulphite pulp. A wood pulp for papermaking, prepared by heating wood under pressure with a solution of acid sulphite of calcium or magnesium. Cf. SODA PULP.

sul·phi'to-, sul·fi'to- (sŭl·fī'tō-; sŭl'fĭ·tō-). *Chem.* A combining form for *sulphite*, denoting *presence of a sulphite* or *of the sulphite group*, SO_3, *as an ingredient*, esp. in the ammino compounds. — **sul·phi'to, sul·fi'to** (-tō), *adj.*

sul'pho-, sul'fo- (sŭl'fō-). *Chem.* A combining form (see SULFO-) denoting *sulphur*, as in **sul'pho·chro'mic,** sulphur-colored; esp., *presence of sulphur as an ingredient*, as in:

sulphazotize	sulpholipin	sulphosilicide
sulphocyan	sulphoproteid	sulphostannide
sulphocyanogen	sulphoselenide	sulphotelluride
sulphohaloid	sulphoselenium	

Specif.: **a** Denoting the *presence of the sulphonic acid*

N O P Q R S

group; sulphonic; as in **sul'pho·phen'yl.** The following words all designate sulphonic derivatives of the acids with whose names *sulpho-* is combined:

sulphoacetic	**sulphonaphthoic**	**sulphosuccinic**
sulphobutyric	**sulphophthalic**	**sulphotannic**
sulphocinnamic	**sulphopropionic**	**sulphoterephthalic**
sulphogallic	**sulphosalicylic**	**sulphotoluic**

b Denoting the *presence of the sulphonyl group,* as in **sul'pho·di'chlor·a·mine'.** **c** Designating compounds in which sulphur to some extent replaces oxygen (in this sense better *thio-*), as in:

sulphoantimonate	**sulphocarbonate**	**sulphostannate**
sulphoantimonic	**sulphocarbonic**	**sulphostannic**
sulphoantimonious	**sulphocyanate**	**sulphosubsulphurous**
sulphoantimonite	**sulphocyanic**	**sulphothionyl**
sulphoarsenic	**sulphoparaldehyde**	**sulphotungstate**
sulphoarsenious	**sulphophosphate**	**sulphotungstic**
sulphoarsenite	**sulphophosphite**	**sulphourea**
sulphocarbamic	**sulphophosphoric**	**sulphovanadate**
sulphocarbanilide	**sulphophosphorous**	**sulphozincate**

d Denoting the *presence of sulphuric acid,* as in **sul'pho·gel, sul'pho·sol.** — **sul'pho** (sŭl'fō), *adj.*

sul'pho·ben'zide (sŭl'fō·bĕn'zīd; -zĭd; 157), *n.* Also **sul'pho·ben'zid.** *Chem.* **a** Phenyl sulphone. **b** A crystalline compound, $C_6H_4SO_2OCH_3$, artificially made.

sul'pho·ben·zo'ic (-bĕn·zō'ĭk), *adj.* Designating any of three isomeric crystalline acids, $C_6H_4(SO_3H)CO_2H$, sulphonic derivatives of benzoic acid. The meta variety is the chief one formed in treating benzene with sulphur trioxide. *sul'pho·ben'zo·yl* (-bĕnzō·ĭl; -ēl), *n.* The radical of which sulphobenzoic acid is the hydroxide. Cf. BENZOYL.

sul'pho·bis'muth·ite (-bĭz'mŭth·īt; -bĭs'-), *n.* [*sulpho-* + *bismuth* + *-ite.*] *Mineral Chem.* Any of various compounds of metals with sulphur and trivalent bismuth.

sul'pho·bo'rite (-bō'rīt), *n.* [*sulpho-* + *borate* + 1st *-ite* 4.] *Mineral.* A hydrous magnesium sulphate and borate, occurring in colorless prismatic orthorhombic crystals.

sul'pho·car·bam'ide (-kär·băm'ĭd; -īd), *n.* Also **-id.** *Chem.* Thiourea.

sul'pho·car'bi·mide (-kär'bĭ·mīd; -mĭd), *n.* Also **-mid.** *Chem.* Isothiocyanic acid.

sul'pho·car·bol'ic (-kär·bŏl'ĭk), *adj. Chem.* Phenolsulphonic. — **sul'pho·car'bo·late** (-kär'bō·lāt), *n.*

sul'pho·car'bon oil (-kär'bŏn; -bŏn). Sulphur oil.

sul'pho·chlo'ride (sŭl'fō·klō'rĭd; -rīd; 157), *n.* Also **-rid.** *Chem.* **a** A compound with sulphur and chlorine; as, phosphorus *sulphochloride,* $PSCl_3$. **b** The chloride of a sulphonic acid; a sulphonyl chloride.

sul'pho·cy'a·nide (-sī'ō·nīd; -nĭd; 157), *n.* Also **-nid.** *Chem.* A thiocyanate.

sul'pho·fi·ca'tion (-fĭ·kā'shŭn) *n.* [*sulpho-* + *-fication.*] *Agric. Chem.* A process of oxidation by which sulphur and sulphur compounds (as sulphides), are converted into sulphates, esp. in soils by the agency of bacteria.

sul'pho·fy (sŭl'fō·fī), *v. t.* [*sulpho-* + *-fy.*] *Agric. Chem.* To subject to, or produce by, sulphonication.

sul'pho·ger·ma'nate (-jĕr·mā'nāt), *n. Chem.* A salt derived from one of the hypothetical **sul'pho·ger·man'ic ac'ids** (-jĕr·măn'ĭk), such as H_2GeS_3 or H_4GeS_4.

sulpho group. *Chem.* The sulphonic group, $-SO_3H$.

sul'pho·hal'ite (sŭl'fō·hăl'īt; -hā'lĭt), *n.* [*sulpho-* + *halite.*] *Mineral* A sodium sulphate and chloride, $3Na_2SO_4.NaCl.NaF$, crystallizing in the isometric system.

sul'pho·ich'thy·ol'ic ac'id (-ĭk'thĭ·ŏl'ĭk). *Pharm.* Ichthyolsulphonic acid. See ICHTHYOL. — **sul'pho·ich'thy·o·late** (-ĭk'thĭ·ō·lāt), *n.*

sul'pho·le'ic ac'id (sŭl'fō·lē'ĭk; sŭlf·ō'lē·ĭk). [*sulpho-* + L. *oleum* oil.] *Chem.* An acid or acid mixture obtained by treating oleic acid or mixture of oils containing it with concentrated sulphuric acid. It is a yellowish, oily liquid which dissolves or emulsifies various organic substances. — **sulph·o'le·ate** (sŭlf·ō'lē·āt), *n.*

sul·phol'y·sis (sŭl·fŏl'ĭ·sĭs), *n.* [*sulpho-* + *-lysis.*] *Chem.* Hydrolysis brought about by sulphuric acid.

sulphon-, sulfon-. *Chem.* A combining form denoting: **a** *Derivation from a sulphonic acid,* as in **sul'phon·cy'a·nine.** **b** *Presence of the sulphonyl group,* as in **sul'phon·a·mi'do, sul'phon·a·mine'.**

sul'pho·nal (sŭl'fō·năl; sŭl'fō·năl'), *n.* Sulphonmethane.

sul'pho·nal·ism (-ĭz'm), *n. Med.* a Addiction to the use of sulphonal. **b** The morbid state, esp. chronic poisoning, from the overuse of sulphonal.

sul'phon·am'ide (sŭl'fŏn·ăm'ĭd; -īd), *n.* Also **sul'phon·am'id.** [*sulphon-* + *amide.*] *Chem.* The amide of a sulphonic acid; as, benzene-*sulphonamide,* $C_6H_5SO_2NH_2$.

sul'pho·nate (sŭl'fō·nāt), *n. Chem.* A salt or ester of a sulphonic acid.

sul'pho·nate, *v. t.;* -NAT'ED (-nāt'ĕd; -ĭd); -NAT'ING (-nāt'-ĭng). To introduce the sulphonic group into; to convert into a sulphonic acid. — **sul'pho·na'tion** (-nā'shŭn), *n.*

sul'pho·nat'ed oil (-nāt'ĕd; -ĭd; 119). An oil treated with sulphuric acid so that it contains sulphonic acids and hence is partly soluble in water; specif., Turkey-red oil (sense **b**).

sul'pho·na'tor (sŭl'fō·nā'tĕr), *n.* One that sulphonates; specif., an acidproof vessel used for the sulphonation of organic substances.

sul'phone (sŭl'fōn), *n.* [G. *sulfon.* See SULPHUR; KETONE.] *Chem.* Any of a class of compounds containing the sulphonyl group (SO_2) doubly united, by means of its sulphur, with carbon (as with two hydrocarbon radicals or a single bivalent radical); as, phenyl *sulphone,* $(C_6H_5)_2SO_2$. They are in general colorless, crystalline, stable compounds formed by oxidation of sulphides and in other ways. They are called ***monosulphones, disulphones,*** etc., according to the number of sulphonyl groups in the molecule.

sul'phone·phthal'ein (sŭl'fōn·thăl'ē·ĭn; -ē·ĭn; -fthăl'-; sŭl'-fōn-; 208), *n;* Also **sul'phon-.** [*sulphone* + *phthalein.*] *Chem.* Any of a group of organic compounds analogous to the phthaleins, made by condensation of phenols with acid chlorides or anhydrides of ortho-sulphobenzoic acid and its derivatives; as, thymol*sulphon*phthalein. They form intensely colored solutions in alkalies and are used as indicators.

sul'phon·eth'yl·meth'ane (sŭl'fōn·ĕth'ĭl·mĕth'ān; sŭl'fōn-), *n.* [*sulphone* + *ethyl* + *methane.*] *Pharm.* A colorless crystalline powder (chemically $CH_3C(SO_2C_2H_5)_2CH_3CH_3$) used as a hypnotic and sedative.

sul·phon'ic (sŭl·fŏn'ĭk), *adj. Chem.* Pertaining to or designating the univalent acid group SO_3H.

-sul·phon'ic. Comb. form of *sulphonic,* as in chloro-*sulphonic.*

sulphonic acid. Any of the acids containing the sulphonic group, and regarded as derived from sulphuric acid by replacement of hydroxyl. The organic sulphonic acids are formed by oxidation of mercaptans, by treating aromatic hydrocarbons with sulphuric acid, etc. They are in general strong, stable, and easily soluble, and many are used in dye manufacture. A ***monosulphonic acid*** contains one sulphonic group in the molecule; a ***disulphonic acid,*** two, etc.

sul·pho'ni·um (sŭl·fō'nĭ·ŭm), *n.* [NL., fr. *sulphur* + *ammonium.*] *Chem.* A univalent radical, SH_3, of which derivatives, analogous to the quaternary ammonium compounds, are formed by union of an organic sulphide with an alkyl halide. Thus, ethyl sulphide, $(C_2H_5)_2S$, and ethyl iodide, C_2H_5I, unite to form triethyl-*sulphonium* iodide, $(C_2H_5)_3SI$, a compound which by action of moist silver oxide yields the corresponding strong *sulphonium* base, $(C_2H_5)_3SOH$. When the sulphur forms part of a ring, the radical is usually called *thionium.*

sul'phon·meth'ane (sŭl'fōn·mĕth'ān; sŭl'fōn-), *n. Pharm.* A colorless or white crystalline compound, $(CH_3)_2C(SO_2C_2H_5)_2$, prepared by oxidation of mercaptole (from acetone and mercaptan). It is used as a hypnotic and sedative. Called also *sulphonal.*

sul'pho·nyl (sŭl'fō·nĭl; -nēl), *n.* [*sulphone* + *-yl.*] *Org. Chem.* The bivalent radical $>SO_2$. Cf. SULPHURYL.

sul'pho·phthal'ein (sŭl'fō·thăl'ē·ĭn; -ē·ĭn; -fthăl'-; 208), *n.* Sulphonephthalein.

sul'pho·pur·pu'ric ac'id (-pûr·pū'rĭk). *Chem.* A monosulphonic acid, $C_{16}H_8N_2O_4SO_3H$, obtained as a blue powder by action of sulphuric acid on indigo. — **sul'pho·pur'pu·rate** (-pûr'pū·rāt), *n.*

sul'pho·ric'in·o'le·ate (-rĭs'ĭ·nō'lē·āt), *n. Chem.* A salt or ester of sulphoricinoleic acid.

sul'pho·ric'in·o'le·ic (-nō·lē'ĭk; -nō'lē·ĭk), *adj.* Also **sul'fo-.** [*sulpho-* + *ricinoleic.*] *Chem.* Designating a sulphonic acid obtained by the action of sulphuric acid on castor oil. Cf. SULPHOLEIC ACID.

sulpho salt. A salt of a sulphacid.

sul'pho·vi'nic (sŭl'fō·vī'nĭk; -vĭn'ĭk), *adj.* [*sulpho-* + L. *vinum* wine.] *Chem.* Ethylsulphuric. — **sul'pho·vi'nate** (-vī'nāt), *n.*

sul'pho·wolf·ram'ic (-wŏŏlf·răm'ĭk), *adj.* Thiotungstic.

sulph·ox'ide (sŭlf·ŏk'sīd; -sĭd; 157), *n.* Also **sulph·ox'id** (-sĭd). [*sulph-* + *oxide.*] *Chem.* Any of a class of compounds containing the thionyl group (SO) doubly united, by means of its sulphur, with carbon (as with two hydrocarbon radicals or a single bivalent radical); as, phenyl *sulphoxide,* $(C_6H_5)_2SO$, a crystalline solid. They are intermediate between the sulphides and sulphones.

sulph·ox'ism (sŭlf·ŏk'sĭz'm), *n.* [*sulph-* + *ox-* + *-ism.*] *Med.* Chronic poisoning with sulphuric acid.

sulph'ox·yl'ic (sŭlf'ŏks·ĭl'ĭk), *adj.* [*sulphur* + *oxy-,* **a** + *-yl* + *-ic,* 1 **e**.] *Chem.* Pertaining to, or designating, a hypothetical acid H_2SO_2, known in the form of certain organic derivatives. Its salts are called **sulph·ox'y·lates** (sŭlf·ŏk'sĭ·lāts). See FORMALDEHYDESULPHOXYLIC.

sul'phur, sul'fur (sŭl'fĕr), *n.* [L. *sulphur, sulfur, sulpur,* of uncert. origin; cf. OF. *soufre* (fr. L.), whence ME. *soufre.*] **1.** *Chem.* A nonmetallic element occurring naturally in large quantities, either free or combined as in various sulphides (pyrites, galena, etc.) and sulphates (gypsum, barite, etc.). It is also a constituent of proteins and of some other substances found in animals and plants. Symbol, *S;* at. no., 16; at. wt., 32.066. Native sulphur occurs in yellow orthorhombic crystals, in masses, crusts, and powder. H., 1.5–2.5. It is found in volcanic regions, as in Sicily, mixed with gypsum and other minerals, in vast beds, also in nonvolcanic regions, as in Louisiana and Texas. It is melted out from accompanying earthy matter, and when necessary, it is purified by distillation. The first vapors are condensed as a yellow powder called ***flowers of sulphur*** (which see); the remainder is condensed as a liquid which is cast into sticks, forming ***roll sulphur*** or ***brimstone.*** Sulphur is also recovered from waste gases from sulphide smelters, from the spent oxide of gas plants, etc. Sulphur exists in several physical states. Below 95.5° C., the familiar orthorhombic form, ***rhombic*** or *α-sulphur* (sp. gr., 2.07), is stable. From 95.5° to 119° the stable form is ***monoclinic, prismatic,*** or *β-sulphur,* consisting of monoclinic prisms (sp. gr., 1.96). From 119° to about 160° sulphur is a pale-yellow, mobile liquid (called *λ-sulphur*). At about 160° it becomes dark-colored and viscous (and is called *μ-sulphur*), but becomes more fluid again before it boils (at 444.6°). If boiling sulphur is poured into cold water it forms an elastic amorphous mass (***plastic sulphur***), consisting largely of *μ*-sulphur. Plastic sulphur on standing becomes brittle, changing in part into rhombic sulphur. Sulphur is odorless and tasteless and burns in air with a blue flame, forming the suffocating gas sulphur dioxide. Sulphur is used in making sulphuric acid, sulphur dioxide, sulphites, carbon disulphide, gunpowder, matches, fireworks, certain kinds of cement, etc., for vulcanizing rubber, as a fungicide, insecticide, and fertilizer, for impregnating wood and paper products and the like, and in medicine as a laxative, diaphoretic, and resolvent. Chemically, sulphur exhibits several valences (two, three, four, and six) and is usually acidic. In many respects it resembles oxygen. A molecule of sulphur commonly is made up of eight atoms, but molecules containing fewer atoms are also known. See THIOZONIDE. **2.** *Alchemy.* The principle of combustion. See CHEMIST. **3. a** *Obs.* A sulphide or similar compound of sulphur. **b** *Local.* One of various minerals supposed to contain sulphur. **4.** Figuratively: **a** *Poetic.* Something suggestive of sulphur, as thunder, lightning, or discharged gunpowder. **b** *Slang.* Excited or inflamed talk or language. **5.** Any of numerous butterflies of the family Pieridae, usually having the wings chiefly yellow or orange with a black border. The ***clouded sulphur*** (*Eurymus,* or *Colias, philodice*) is the common yellow butterfly of the eastern United States, but in the South the ***cloudless sulphur*** (*Callidryas eubule*) is also abundant. **6.** The color sulphur yellow.

Clouded Sulphur. Male. *A* Imago; *r r* Wings reversed to show under side. *B* Larva.

☞ COMBINATIONS (all adjectives) are:

sulphur-bearing	**sulphur-hued**
sulphur-bellied	**sulphur-impregnated**
sulphur-breasted	**sulphur-scented**
sulphur-colored	**sulphur-smoking**
sulphur-containing	**sulphur-tinted**
sulphur-crested	**sulphur-tipped**

sul'phur, sul'fur (sŭl'fĕr), *adj.* Of, pertaining to, or resembling sulphur; containing or impregnated with sulphur.

sul'phur, sul'fur, *v. t.;* SUL'PHURED, -FURED (-fĕrd); SUL'PHUR·ING, -FUR·ING. To treat with sulphur or, as in fumigating and bleaching, with sulphur fumes (sulphur dioxide); to sulphurize; as, to *sulphur* plants; *sulphured* matches.

sulphur acid. *Chem.* Any acid characterized by the presence of sulphur; specif., one containing only sulphur, hydrogen, and oxygen.

sul'phur·age (-ĭj), *n.* Treatment with sulphur. *Rare.*

sulphur alcohol. *Chem.* See MERCAPTAN.

sul'phu·ran (sŭl'fū·răn), *n.* Also **sul'phu·rane** (-rān). *Chem.* Any of a series of compounds of the general formula $RSCH_2CH_2SCH{:}CH_2$, regarded as alkyl vinyl derivatives of ethylene mercaptan.

sul'phu·rate (-rāt), *adj.* [L. *sulphuratus.*] Of or pertaining to sulphur; sulphureous.

sul'phu·rate (-rāt), *v. t.;* -RAT'ED (-rāt'ĕd; 119); -RAT'ING (-rā't'ĭng). To sulphurize. — **sul'phu·ra'tion** (-rā'shŭn), *n.*

sul'phu·ra'tor (-rā'tĕr), *n.* An apparatus used in sulphurizing.

sulphur bacteria. *Bacteriol.* Any bacteria possessing the power of reducing sulphur compounds, as many species of the order Thiobacteriales.

sulphur black. Any of several black sulphide dyes; specif., one made from 2,4-dinitrophenol. See DYE, *Table.*

sul'phur·bot'tom (sŭl'fĕr·bŏt'ŭm), *n.* The blue whale (*Sibbaldus musculus,* syn. *Balaenoptera sibbaldii*), the largest of living mammals, and a cosmopolitan species, most abundant in the cooler portions of both the Atlantic and

Sulphur-bottom. (1/180)

the Pacific as well as in the Antarctic Ocean. Its average length is about 76 feet, with a maximum of 89 feet. The color is marbled bluish gray with a few irregular white or yellowish-white spots on the under parts. The whalebone is short and entirely black.

sulphur butterfly. = SULPHUR, *n.,* **5.**

sulphur candle. *Pharm.* A disinfecting candle, composed chiefly of sulphur, which gives off fumes of sulphur dioxide when burned.

sulphur chloride. *Chem.* Any chloride of sulphur; specif., an amber-colored, fuming, irritating liquid, S_2Cl_2; — called also *sulphur monochloride.* It is formed by the action of chlorine on molten sulphur and is used chiefly in vulcanizing rubber.

sulphur dioxide. A compound, SO_2, occurring in the gases from volcanoes and in certain volcanic springs and produced by the burning of sulphur and sulphides, and otherwise, as a heavy colorless gas of pungent, suffocating odor. It is easily condensed to a colorless liquid boiling at − 10° C. at ordinary pressure, and is usually sold in cylinders in liquid form. It is used in making sulphuric acid and sulphites, as a bleaching agent, as a disinfectant, antiseptic, and preservative, in refrigerating machines, etc.

sulphur dye *or* **color.** A sulphide dye.

sulph·u're·a (sŭlf·ū'rē·ȧ), *n. Chem.* Thiourea.

sul·phu're·o- (sŭl·fū'rē·ō-). A combining form denoting *sulphureous and* (see -o), as in:

sulphureo-aerial, sulphureonitrous, sulphureosaline, sulphureosuffused, sulphureovirescent.

sul·phu're·ous (sŭl·fū'rē·ŭs), *adj.* [L. *sulphureus.*] Consisting of sulphur; having the qualities of sulphur, or brimstone, esp. when burning; impregnated with sulphur; sulphurous; sulphur-colored. — **sul·phu·re'i·ty** (sŭl'fū·rē'ĭ·tĭ), *n.* — **sul·phu're·ous·ly,** *adv.* — **sul·phu're·ous·ness,** *n.*

sul'phu·ret (sŭl'fū·rĕt), *n.* A sulphide.

sul'phu·ret (sŭl'fū·rĕt), *v. t.;* -RET'ED (-rĕt'ĕd; -ĭd) or -RET'TED; -RET'ING or -RET'TING. [From SULPHURET, *n.*] To combine or impregnate with sulphur. Hence, *Philately,* to oxidize (which see).

sul'phu·ret'ed hy'dro·gen (-rĕt'ĕd; -ĭd; 119). Hydrogen sulphide.

sulphur ether. Thio ether.

sulphur family. *Chem.* The three elements sulphur, selenium, and tellurium, forming a subdivision of group VI of the periodic table.

sulphur granule. One of the small yellow bodies found in the pus of actinomycotic abscesses, consisting of clumps of the ray fungus, *Actinomyces.*

sul·phu'ric (sŭl·fū'rĭk), *adj.* [F. *sulfurique.*] Of, pertaining to, or containing, sulphur; specif., *Chem.,* designating those compounds in which sulphur has a higher valence as contrasted with the *sulphurous* compounds.

-sul·phu'ric. A combining form of *sulphuric,* as in ethyl*sulphuric,* pyro*sulphuric.*

sulphuric acid. *Chem.* **a** *Obs.* Sulphur trioxide. **b** A heavy, corrosive, oily liquid, H_2SO_4, colorless when pure, early made by distilling green vitriol, whence the name *oil of vitriol;* also, a liquid consisting of this compound diluted with a varying amount of water. In the two main processes now in use for manufacturing sulphuric acid, sulphur dioxide (obtained by burning pyrites or sulphur) is made to combine with oxygen from the air. The ***chamber process*** accomplishes this in a series of lead chambers with the introduction of steam, and in presence of nitrogen oxides, which are not consumed, but are subject to a certain amount of mechanical loss, greatly lessened by the Gay-Lussac and Glover towers. The ***chamber acid*** thus produced has a strength of 70 per cent or less, which by passage through the Glover tower, or heating in lead pans, may be raised to about 80 per cent. To produce the commercial oil of vitriol or concentrated sulphuric acid (about 93 per cent) recourse is had to evaporation. The ***contact process,*** based usually on the catalytic action of finely divided platinum, is conducted by passing the well-dried and purified burner gases through the contact apparatus (which contains the platinum or platinized asbestos, and which can be kept at a temperature of about 450° C. or 842° F.), and absorbing in water the sulphur trioxide (formed by the direct union of sulphur dioxide and oxygen). Pure strong acid is thus made without further manipulation. Sulphuric acid (100 per cent) has a specific gravity of 1.834. It combines readily with water, developing great heat when mixed with it, and corroding and charring organic substances by extracting hydrogen and oxygen to form water. For this reason the acid often becomes brown from contact with dust, organic matter, etc. It is a powerful oxidizing agent. ***Fuming sulphuric acid*** (***oleum,*** or ***Nordhausen acid***) is made by dissolving sulphur trioxide in concentrated sulphuric acid. The

strength of oleum is often expressed as the percentage of free sulphur trioxide (that not combined with water to form sulphuric acid); as, a 60 per cent *oleum*. The fuming acid has a higher specific gravity (ranging up to about 1.97) than the ordinary acid, and is more energetic in its action (cf. PYROSULPHURIC). Sulphuric acid is of the greatest importance in many and varied processes, esp. in the manufacture of fertilizers, chemicals, petroleum products, etc. Chemically, sulphuric acid is a diacid, not so strong as hydrochloric and nitric acids, but able, because of its higher boiling point, to expel these and many other acids from their salts when heated with them. It forms well-defined hydrates which are named as hydrates of sulphur trioxide. Thus, 100 per cent sulphuric acid, H_2SO_4, is called ***monohydrated sulphuric acid***; the hydrate $H_2SO_4.H_2O$, ***dihydrated***, or ***glacial, sulphuric acid***, etc.

sulphuric anhydride. Sulphur trioxide.

sulphuric ether. = 1st ETHER, 2 a.

sulphuric oxide. *Chem.* Sulphur trioxide.

sul'phu·rize (sŭl'fū·rīz; sŭl'fĕr·īz), *v. t.;* -IZED (-rīzd); -IZ'ING (-rīz'ĭng). [F. *sulfuriser.*] *Chem.* To combine or impregnate with sulphur or any of its compounds; specif., to fumigate or bleach with sulphur fumes. — **sul'phu·ri·za'tion** (-rĭ·zā'shŭn; -rĭ·zā'shŭn), *n.*

sulphur lime. A mechanical mixture of hydrated lime and sulphur used as a dust fungicide.

sulphur match. See 1st MATCH, 4.

sulphur monochloride. *Chem.* See SULPHUR CHLORIDE.

sulphur oil, sulphur olive oil. Oil of inferior grade obtained from the expressed marc of olives by extraction with carbon disulphide. It is green in color and is used in making soap.

sulphur ore. Pyrite, often roasted for its sulphur.

sul·phu'ro·syl (sŭl·fū'rō·sĭl; -sēl), *n.* Thionyl.

sul'phu·rous (sŭl'fū·rŭs; sŭl·fū'rŭs; *the second pron. is common in chemical terminology, as in* sul·phu'rous ac'id, *etc.; cf.* MERCUROUS), *adj.* [L. *sulphurosus;* cf. F. *sulfureux.*] **1.** Of, pertaining to, or containing, sulphur; resembling or emanating from sulphur, esp. burning sulphur; as, a *sulphurous* substance, stench, or blue flame. **2.** Figuratively: **a** Thunderous; thundery; sultry. **b** Of, or heavy with the smoke of, gunpowder. **c** Of or pertaining to brimstone or hell-fire; infernal. **d** Fiery; inflamed; scorching.
3. *Chem.* Designating those compounds in which sulphur has a lower valence as contrasted with the *sulphuric* compounds.
— **sul'phu·rous·ly,** *adv.* — **sul'phu·rous·ness,** *n.*

-sul'phu·rous. A combining form of *sulphurous,* as in hydro*sulphurous,* hypo*sulphurous.*

sulphurous acid. **a** *Now Rare.* Sulphur dioxide. **b** An acid, H_2SO_3, not known in the free state except as a solution of sulphur dioxide in water, but forming a well-known series of salts (the *sulphites*). It is a good bleaching and reducing agent.

sulphurous anhydride. Sulphur dioxide.

sulphurous salt. *Old Chem.* Potassium sulphide.

sulphur paste. See WETTABLE SULPHUR.

sulphur plant. Any of several plants of the genus *Eriogonum,* of the western United States.

sulphur rose. A double-flowered yellow rose (*Rosa hemisphaerica*) of western Asia, often cultivated for ornament.

sulphur salt. A salt of a thio acid. *Obs.*

sulphur shower *or* **rain.** A shower of yellow pollen often seen in spring. It is carried by the wind from conifers, as pines.

sulphur subchloride. Sulphur monochloride. See SULPHUR CHLORIDE.

sulphur toning. *Photog.* One of several processes in which the silver of a printed-out or developed image is caused to combine with sulphur, effecting a change in color. The color ranges from a yellowish to a purplish brown. Called also *sulphide toning,* esp. when the process includes a final bath in a solution of sodium sulphide.

sulphur trioxide. A compound, SO_3, formed by the union of sulphur dioxide and oxygen by the contact process (see SULPHURIC ACID) and in other ways; — called also *sulphuric anhydride.* When first prepared it is a colorless liquid which forms colorless needles (***α-sulphur trioxide***) changing readily to the ordinary white fibrous variety (***β-sulphur trioxide***, apparently S_3O_9, at least in part). Sulphur trioxide fumes in air and deliquesces; it combines violently with water, forming sulphuric acid.

sul'phur vi'vum (vī'vŭm). An impure grayish form of sulphur, prepared from the dregs as a by-product in the purification of brimstone.

sulphur water. See MINERAL WATER.

sul'phur·wed' (sŭl'fĕr·wĕd'), *n.* The brimstonewort.

sulphur whale. The sulphur-bottom.

sul'phur·wort' (-wûrt'), *n.* The brimstonewort.

sul'phur·y (sŭl'fĕr·ĭ), *adj.* Of, resembling, or of the nature of, sulphur; sulphurous; sulphureous.

sulphur yellow. A color, yellow in hue, of medium saturation and very high brilliance; — called also *brimstone, brimstone yellow, citrus.* Cf. COLOR. — **sul'phur·yel'low,** *adj.*

sul'phur·yl (sŭl'fĕr·ĭl; -ēl; sŭl'fū·rĭl), *n.* [*sulphur* + *-yl.*] *Inorg. Chem.* The bivalent radical $>SO_2$. Cf. SULPHONYL.

sulphuryl chloride. A colorless, slightly fuming liquid, SO_2Cl_2, obtained by direct union of sulphur dioxide and chlorine by means of catalysts, and otherwise. On heating it dissociates, and hence is used as a chlorinating agent.

sul·phy'drate (sŭl·fī'drāt), *n. Chem.* A hydrosulphide.

sul·phy'dric ac'id (-drĭk). *Chem.* Hydrogen sulphide.

sul·phy'dryl (-drĭl), *n.* [*sulph-* + *hydr-* + *-yl.*] *Chem.* The mercapto group (SH).

Sul·pi'cian (sŭl·pĭsh'ăn), *n.* Also **Sul·pi'tian.** [F. *sulpicien,* so called after the parish of St. *Sulpice* in Paris, of which the founder, Jean Jacques Olier, was pastor in 1643.] *R.C.Ch.* One of an order of priests established in France in 1642 to teach men for the priesthood, introduced soon after into Canada, and in 1791 into the United States.

‖**sul' pon'ti·cel'lo** (sŏŏl' pŏn'tē·chĕl'lō). [It.] *Music.* Near the bridge; — a direction to bow thus so as to bring out the higher harmonics.

sul'tam (sŭl'tăm), *n.* [*sul-* + *lactam.*] *Chem.* Any of a class of inner anhydrides of certain amino sulphonic acids, having the general formula $R''SO_2NH$, analogous to a lactam.

sul'tan (sŭl'tăn; sŏŏl·tän'), *n.* [F., fr. Ar. *sulṭān* sultan, dominion. Cf. SOLDAN.] **1.** A ruler, or sovereign; esp., a ruler of a Mohammedan state; — a title given to, or assumed by, any Mohammedan prince; specif. [*often cap.*], the ruler of the Turks; the Padishah, or Grand Seignior. By a vote of the Grand National Assembly, Nov. 1, 1922, the office of Sultan ceased to exist. See CALIPH.
2. **a** A breed of white domestic fowls having the legs and toes heavily feathered, a V-shaped comb, crest, muffs, etc., and fine toes. The shanks and toes are slaty blue. **b** A sultana bird.
3. The color crimson lake.

sul'tan (sŭl'tăn; sŏŏl·tän'), *v. i.* To rule or act as a sultan.

sul·tan'a (sŭl·tăn'ä; sŭl·tä'nä), *n.* [It., fem. of *sultano* sultan.] **1.** The wife or, sometimes, the mother, sister, or daughter, of a sultan.
2. A mistress or paramour, esp. one of a royal personage.
3. Also **sultana bird.** A purple gallinule of the genus *Porphyrio.*
4. An important pale-yellow, seedless grape, grown chiefly in the Mediterranean region as a source of raisins and of a delicate white wine; also, its raisin.
5. *Obs.* **a** = SULTANE, 2. **b** A Turkish warship.

sultana roll. A fancy ice consisting of a slice of ice cream containing sultanas and a claret or fruit sauce.

sul'tan·ate (sŭl'tăn·āt), *n.* [*sultan* + *-ate;* cf. F. *sultanat.*] The rule, dominion, or territory of a sultan; the office, dignity, or power of a sultan.

sul·tane' (sŭl·tān'), *n.* [F. See SULTANA.] **1.** *Obs.* **a** = SULTANA, 1 & 5 **b.** **b** = SULTANIN. **c** An ottoman.
2. A kind of gown worn about 1700, usually long and of rich materials, with a front opening adorned with buttons and loops, in the Turkish style. *Hist.*

sul'tan·ess (sŭl'tăn·ĕs; -ĭs; sŭl·tăn'-; 119), *n.* A sultana.

sultan flower. The sweet sultan.

sul·tan'ic (sŭl·tăn'ĭk), *adj.* Of or pertaining to a sultan

sul'ta·nin (sŭl'tä·nĭn), *n.* [Ar. *sulṭānī* royal.] A Turkish gold coin in value somewhat less than a sequin. *Obs.*

sul'tan·ism (sŭl'tăn·ĭz'm), *n.* A characteristic or practice of a sultan; despotism. — **sul'tan·ist** (-ĭst), *n.* — **sul'tan·ize** (-īz), *v. i.*

sultan red. The color crimson lake. — **sul'tan–red',** *adj.*

sul'tone (sŭl'tōn), *n.* [*sul-* + *lactone.*] *Chem.* Any of a class of inner anhydrides of certain sulphonic acids, having the general formula $R''SO_2O$, analogous to a lactone.

sul'try (sŭl'trĭ), *adj.;* SUL'TRI·ER (-trĭ·ĕr); SUL'TRI·EST. [From SWELTRY.] **1.** Very hot and moist, or close and oppressive; as, *sultry* atmosphere; also, sweltering; hot and humid; as, *sultry* days or weather.
2. Burning hot; as, Libya's *sultry* deserts; a *sultry* sun.
3. Hot as with passion or anger; inflamed with rage, lust, etc.; violently passionate.
4. *Slang.* **a** Sensual; coarse; lurid; smutty; — of discourse. **b** Hot, or extremely uncomfortable (for one).
— **sul'tri·ly** (sŭl'trĭ·lĭ), *adv.* — **sul'tri·ness,** *n.*

sul'try, *v. t.* To make hot or flaming. *Rare.*

Su'lu (sōō'lōō), *n.* [Malay *Sulu'* (written *Suluk*).] A member of the most prominent tribe of Moros, occupying the Sulu Archipelago; also, their language (see AUSTRONESIAN LANGUAGES, *Table*). See MORO. — **Su'lu·an** (-ăn), *adj. & n.*

su'lung (sōō'lŏŏng), *n.* [AS., fr. *sulh* an area of land, a plow.] *O. Eng. Law.* In Kent, the unit of land area corresponding to the hide and carucate of other parts (see 1st HIDE), normally reckoned at 120 acres. It was divided into four yokes.

sul'van·ite (sŭl'văn·īt), *n.* [*sulphovanadate* + *-ite.*] *Mineral.* A sulphovanadate of copper, $3Cu_2S.V_2S_5$, occurring in bronze-yellow masses. H.,3.5. Sp. gr., 4.0.

sul'va·su'tra (shōōl'vä·sōō'trä), **sul'ba·su'tra,** *n.* [Skr. *śulvasūtra, śulbasūtra.*] Any of certain late Vedic texts dealing with the construction and measurements of five altars. As the oldest works of Indian geometry they are important in the history of science.

sum (sŭm), *n.* [ME. *summe, somme,* fr. OF. *summe, somme,* fr. L. *summa,* fr. *summus* highest, a superlative fr. the source of *super* over, *sub* under. See SUB-; cf. CONSUMMATE, SUMMARY, SUMMIT, SUPREME.] **1.** An amount; as, to receive occasional *sums* of money; an indefinite (unless specified) amount or quantity of money or currency; as, a small *sum* for relief; large *sums* for pleasure; a *sum* of one hundred dollars; also, *Hist.,* in payments in kind, an amount (of corn, tobacco, etc.) of a set value.
2. The whole amount; the aggregate; an existent total; as, within the *sum* of human experience.
3. An aggregate of distinct things (usually specified); a discrete whole; as, history is not merely a *sum* of events.
4. Originally, a summa; later, a summary of the chief points or thoughts; an epitome; also, the gist; the main or essential point; as, the *sum* of the evidence is this; to get at the *sum* and substance of his objections.
5. Ultimate end or issue; esp., utmost degree; height; summit; as, he had now reached the *sum* of earthly bliss. *Archaic.*
6. The aggregate of two or more numbers, magnitudes, quantities, or particulars; the amount or whole of any number of individuals or particulars added together; as, the *sum* of 5 and 7 is 12; concretely, *Now Rare,* an enumerated total of persons or things; the number established by a count or addition.
Take ye the *sum* of all the congregation. *Num.* i. 2.
7. The numbers to be added; a column of figures; as, quick in casting up *sums;* also, *Colloq.,* any arithmetical problem; an example; as, to do one's *sums.*
8. *Obs.* **a** A host; assembly; gathering. **b** A number, or numeral; also, an integer.

Syn. — SUM, AMOUNT, AGGREGATE, TOTAL, WHOLE, NUMBER, QUANTITY. SUM denotes the result of simple addition; as, the *sum* of two and two; AMOUNT implies a result reached by the accumulation, AGGREGATE (cf. AGGREGATE) by the assembling or collection, of particulars; as, the *amount* of one's purchases; the *aggregate* of past experience. TOTAL and WHOLE suggest the completeness of the result, while *total* often further implies magnitude; as, a grand *total* of ten millions; the *whole* is the *sum* of its parts. NUMBER, rather than *sum,* is now used for an aggregate of persons or things, to which (except in the case of things in bulk or mass) *amount* should not be applied; as, the *number* present; a fixed *amount* of cotton; but not, a small *amount* of potatoes. QUANTITY may be used of objects that can be counted, but only when they may also be measured in bulk; as, a *quantity* of apples; but not (except *colloq.*), a *quantity* of soldiers. Cf. WHOLE, ALL.
— ***in sum.*** In short; in brief.

sum (sŭm), *v.;* SUMMED (sŭmd); SUM'MING. [OF. *summer, sommer,* fr. ML. *summare.* See SUM, *n.*] *Transitive:* **1.** To ascertain the sum of; to count or calculate the number, amount, or total of; also, to cast up, as a column of figures; to add together; — often with *up;* as, to *sum* up one's assets. "To *sum* my cash account." *Scott.*
2. To be the sum of; to bring to a total; — with *up;* as, ten victories *summed* up his record.
3. To bring or collect into a small compass; to epitomize; also, to summarize; to state succinctly; specif., to recapitulate, as evidence.
He *sums* their virtues in himself alone. *Dryden.*
4. To bring to consummation or perfection; to make complete; to reach the goal or full development of. *Now Rare.*
There was the venture *summed* and satisfied. *Marlowe.*
—, *Intransitive:* **1.** To amount; to reach a sum; — with *to* or *into;* as, benefactions that *sum* into the thousands.
2. To do sums, or examples.

sum up. To recapitulate (points, arguments, etc.); as, to *sum up* to the jury and in behalf of one's client the evidence presented during a trial.

sum (sŭm), *n.* Variant of 1st SOUM.

sum. Variant of SOME. *Obs. exc. Ref. Sp.*

sum-. See SUB-, 1st *Note.*

su'mac, su'mach (shōō'măk; sū'măk; 277), *n.* [OF. *sumac,* ML. *sumach,* fr. Ar. *summāq.*] **1.** **a** Any shrub or tree of the genera *Rhus* and *Toxicodendron.* See LAUREL SUMAC, POISON SUMAC, SQUAWBUSH **b.** Also, the wood of any species. **b** Loosely, any of several unrelated shrubs and trees of the genera *Ailanthus, Myrica,* etc.
2. A material used in tanning and dyeing, consisting of the dried and powdered leaves, panicles, etc., of various species of sumac, esp. *Rhus coriaria,* which yields the variety called *Sicilian sumac.* Sumac is chiefly valuable for its content (10–30 per cent) of tannin.
3. The color buckthorn brown.

su'mac, *v. t.* To treat with sumac.

sumac family. The Anacardiaceae.

Su'mak, Sou'mak (sōō'mäk), *n.* **a** A smooth-faced pileless carpet from eastern Transcaucasia, woven in a peculiar form of tapestry weave with a herringbone effect. The angular designs are typically Caucasian. **b** [*not cap.*] The peculiar weave of this type of rug.

Su·mass' (sōō·mäs'), *n.* An Indian of a Cowichan tribe. See COWICHAN, *n.,* 2.

Su·ma'tra (sōō·mä'trä), *adj.* Sumatran.

Su·ma'tra, *n.* **1.** [*sometimes not cap.*] A violent squall common in the strait between Sumatra and the Malay Peninsula.
2. An Oriental breed of game fowls.
3. Also **Sumatra Java.** A variety of coffee. See COFFEE, 2.

Sumatra camphor. See BORNEOL.

Sumatra leaf. A thin, elastic, uniformly light-colored leaf tobacco, raised in Sumatra and extensively used for cigar wrappers. When grown in the United States it is called *Sumatra seed.*

Su·ma'tran (sōō·mä'trăn), *adj.* Of or pertaining to Sumatra or its inhabitants.

Su·ma'tran, *n.* **1.** A native of Sumatra. The aboriginals are of Malayan stock, the majority being fairly civilized Moslem agriculturists. Nearly all have alphabets derived from the Hindu or Arabic. Cf. ACHINESE, BATTAK, LAMPONG, MENANGKABAU, REJANG.
2. The Sumatran language.

Sumatra orange. The orange jessamine.

Sumatra seed. See SUMATRA LEAF.

Sumatra wax. Gondang wax.

sum'bul (sŭm'bŭl; sōōm'bōōl), *n.* Also **sum'bal** (-băl). [F. *sumbul,* fr. Ar. *sunbul.*] **a** The root of muskroot *Ferula sumbul,* used as a tonic and antispasmodic. **b** The valerian *Valeriana officinalis.* **c** = SPIKENARD, 1 a. — **sum·bu'lic** (sŭm·bū'lĭk), *adj.*

Sum·dum' (sŭm·dŭm'), *n.* An Indian of a Tlingit tribe. See TLINGIT.

su'men (sū'mĕn), *n.* [L.] *Obs.* **a** A sow's udder; — once regarded as a delicacy. **b** The fat (of something); the richness.

Su·me'ri·an (sū·mē'rĭ·ăn; sōō-), *adj.* Also **Su·mi'ri·an** (-mē'rĭ·ăn). Of or pertaining to Sumer, an ancient region of lower Babylonia, or its inhabitants or their language.

Su·me'ri·an, *n.* **1.** A native of Sumer.
2. The agglutinative language of the Sumerians, the pre-Semitic population of the lower part of the valley of the Euphrates. The term was applied in the middle of the 19th century to the newly discovered language written in the cuneiform script but differing from the Assyro-Babylonian. Cf. AKKADIAN.

Sumero-. A combining form for *Sumerian (and),* as in **Su'me·rol'o·gy** (sū'mĕ·rŏl'ō·jĭ; sōō'-), **t** he study of the history, language, and archaeology of the Sumerians. See -LOGY.

Su·me'ro–Ak·ka'di·an (sū·mē'rō·ä·kä'dĭ·ăn; sōō-; -ă·kä'-), *adj.* Formerly designating the early language of Babylonia; — used by those scholars who assumed that Sumerian and Akkadian were cognate dialects of the pre-Semitic speech. Cf. SUMERIAN; see AKKADIAN, *adj.,* 2.

sum'less (sŭm'lĕs; -lĭs; 119), *adj.* Uncountable; incalculable; inestimable. — **sum'less·ness,** *n.*

‖**sum'ma** (sŭm'ä), *n.;* *pl.* SUMMAE (-ē). [L.] Formerly a sum; now: **a** [*usually cap.*] A treatise or series of treatises covering a whole field or department of learning; esp., one of the comprehensive works of certain Scholastic philosophers, as the ***Sum'ma The'o·lo'gi·ca*** (thē'ō·lŏj'ĭ·kä) (sometimes incorrectly ***Sum'ma The'o·lo'gi·ae*** [thē'ō·lŏ'jĭ·ē]) and the ***Sum'ma Con'tra Gen·ti'les*** (kŏn'trä jĕn·tī'lēz) of Thomas Aquinas. **b** [*cap.*] The Summa Theologica. **c** A work or series of works that is a synthesis of human knowledge.

sum'ma·ble (sŭm'ä·b'l), *adj.* **a** Capable of being summed. **b** *Math.* See SUMMABLE SERIES. — **sum'ma·bil'i·ty** (-bĭl·ĭ·tĭ), *n.*

summable series. *Math.* An infinite series $a_1 + a_2 + \ldots + a_n + \ldots$ to which a definite number S, called its sum, can be assigned by means of a rule which is such that when the series is convergent S is its ordinary sum.

‖**sum'ma cum lau'de** (sŭm'ä kŭm lô'dē; sōōm'mä kōōm lou'dĕ). [L.] See CUM LAUDE.

sum'mage (sŭm'ĭj), *n.* [ML. *summagium,* fr. OF. *somage,* fr. *somme* horseload, fr. VL. *sauma.* See SEAM load.] Toll on goods carried on horseback. *Hist.*

‖**sum'ma ge'ne·ra** (sŭm'ä jĕn'ĕr·ä). Pl. of SUMMUM GENUS.

sum'mand' (sŭm'ănd'; sŭm'ănd'), *n.* A term in a summation; addend.

Sum·ma'nus (sŭ·mä'nŭs), *n.* [L., fr. *sub* under, before + *mane* early morning.] *Rom. Relig.* A god of the time before the morning, and of thunderstorms at night.

‖**sum'ma re'rum** (sŭm'ä rē'rŭm). [L.] Literally, the sum of things; supreme public interest.

sum'ma·rist (sŭm'ä·rĭst), *n.* A summarizer; an author of a Summa.

2. The aggregate amount (esp. of something not calculable); totality; total result; also, the sum and substance; as, the *sum total* of the day's pleasure.

sum (sŭn), *n.* [ME. *sunne, sonne*, fr. AS. *sunne;* akin to OFris. *sunne*, D. *zon*, OS. & OHG. *sunna*, G. *sonne*, ON. *sunna*, Goth. *sunno* sun, Av. *xvanvant* sunny, and to L. *sol* sun. See SOLAR, SOUTH.] **1.** The luminous celestial body the light of which constitutes day, and absence of the light of which constitutes night; in the Ptolemaic system, one of the seven planets revolving around the earth (see PLANET, *n.*, 1); in modern astronomy, the member of the solar system round which the earth and other planets revolve, by which they are held in their orbits, and from which they receive light and heat. Symbol, ☉. It is an average star. See STAR, *n.*, 1. The most recent computations estimate its horizontal parallax to be 8.80″, from which the following measurements are derived: its mean distance from the earth, 92,900,000 miles; its linear diameter, 864,000 miles; its mass, 332,000 times that of the earth. Its mean density is about one fourth that of the earth, or 1.41 compared with water. The sun is an immense globe of matter whose chemical constitution is doubtless identical with that of the earth, but so hot that it remains completely gaseous, in spite of the enormous pressure exerted by the mutual attraction of its particles. Its luminous surface layer is called the *photosphere*, above which is the red *chromosphere*, the boundary between the two being the thin *reversing layer*, while outermost of all is the tenuous *corona* (see these terms). The sun is of spectral type about G0, and its spectrum is characterized by thousands of dark lines (see FRAUNHOFER LINES) produced by absorption by the vapors of the chemical elements. Its surface temperature is about 5,800° C., and its interior temperature, though at present unknown, may possibly be millions of degrees. The attraction of gravity at the solar surface is about 27 times that at the surface of the earth. The period of the rotation of the sun's surface layers varies from 25 days at the equator to about 27 days at latitude 45°, and probably even more at its poles, a phenomenon for which there is no entirely satisfactory explanation. The sun is attended by nine larger planets and a very large number of minor planets, or asteroids (over 1,000 known), and by comets and meteoric bodies. The entire system, including the recently discovered trans-Neptunian planet, Pluto, is over eight billion miles in diameter, and is moving as a whole toward a point near Alpha (α) Lyrae at a speed of about 12 miles per second, so that the sun is about 100 light years from its position one million years ago. Its surface is disturbed by solar storms, or cyclones, called *sunspots* (which see), that occur in much greater numbers every eleven years, the cause of this curious periodicity being still uncertain. At the earth, the solar energy is equivalent to about one and one half horsepower per square yard; at the sun, each square inch of surface continuously emits over fifty horsepower. Cf. SOLAR CONSTANT. Of the sun's tremendous energy output, the earth receives but one two-billionth. The source of this solar energy is still uncertain. See CONTRACTION THEORY.

2. The sun (sense 1) as viewed or felt on earth; — chiefly in phrases reflecting the naïve or Ptolemaic conceptions; as, the *sun* sets; the *sun* rises; let not the *sun* go down upon your wrath; a red *sun;* there is no *sun* today; also, the heat or light radiated from the sun; sunshine; as, to bask in the *sun;* tanned by the *sun.*

The *sun* came up upon the left,
Out of the sea came he! *Coleridge.*

3. One like the sun in radiance, illuminative power, etc.; often [*cap.*], God or Christ.

4. [*usually cap.*] A sun god; specif., Apollo.

5. *Chiefly Poetic.* **a** Sunrise or sunset; — chiefly in phrases, as *from sun to sun*, from sunrise to sunset. **b** A day; a period of daylight.

But one *sun's* length off from my happiness. *Mrs. Browning.*

See SUN; DAY.] The first day of the week, regarded by most Christians as a day for rest from secular employments and for religious worship; the Christian Sabbath; the Lord's day. It is kept as a weekly commemoration of the day of Christ's resurrection and as the Christian analogue of the Jewish Sabbath. See HOLIDAY, *n.*, 3.
Syn. — SUNDAY, SABBATH are not strictly synonymous terms. SUNDAY is the name of the first day of the week; SABBATH designates the institution rather than the day, and is synonymous with *Sunday* only in Christian usage, inasmuch as the Jewish *Sabbath* falls on Saturday. As a designation of the day, *Sunday* is preferred to *Sabbath*.
☞ In ecclesiastical usage many Sundays of the year are distinguished by specific epithets. Thus:

Advent Sunday	**Low Sunday**	**Sexagesima Sunday**
Alb Sunday	**Mid-Lent Sunday**	**Simnel Sunday**
Easter Sunday	**Mothering Sunday**	**Tradition Sunday**

su'per·com·pres'sion en'gine (-kŏm·prĕsh'ŭn). See INTERNAL-COMBUSTION ENGINE.

su'per·con·cep'tion (-kŏn·sĕp'shŭn), *n.* Superfetation. R.

su'per·a·bun'dan·cy, *n.* = SUPERABUNDANCE. *New Rare.*

su'per·ac'e·tate, *n.* See SUPER-, 3.

su'per·al'tern, *n. Logic.* = SUBALTERNANT.

superanal gland. *Zool.* See APPENDIX DIGITFORMIS.

su'per·an·nu'i·ty, *n.* = SUPERANNUATION, 2.

su'per·an·nu'i·tant, *n.*

su'per·ar·se'ni·ate, *n.* See SUPER-, 3.

su'per·ate, *v. t.* [L. *superare.*] To surmount; overcome; excel. *Obs.* — **su'per·a'tion,** *n. Obs.*

su'per·ar'o·ta'tion, *n.* See SUPER-, 3.

su·per'bous, *adj.* [L. *superbus.*] = SUPERBIOUS. *Obs.* [SUPER-, 3.]

su·per·car'bu·ret'ed, *adj.* See SUPER-, 3.

su'per·car'go·ship, *n.* See -SHIP.

su'per·cede', Var. of SUPERSEDE.

su'per·ces'sion, *n. Law.* Succession. *Obs.*

su·per'cher·y (sū·pûr'chĕr·ĭ), *n.* [F. *supercherie.*] Outrage; foul play; also, fraud. *Obs.* [IUM.]

su'per·cil'i·a, *n., pl.* of SUPERCILIUM.

su'per·cil'i·os'i·ty, *n.* = SUPERCILIOUSNESS. *Rare.*

su′per·con·duc′tive (sū′pĕr·kŏn·dŭk′tĭv), *adj.* Exhibiting superconductivity.

su′per·con′duc·tiv′i·ty (-kŏn′dŭk·tĭv′ĭ·tĭ), **su′per·con·duc′tance** (-kŏn·dŭk′tăns), *n.* Abnormally high conductivity; specif., that occurring at very low temperatures when the resistance falls off with abnormal rapidity.

su′per·con·duc′tor (-kŏn·dŭk′tĕr), *n.* A superconductive substance or body.

su′per·con′scious (-kŏn′shŭs), *adj.* **a** Transcending human consciousness. **b** Of or pertaining to the highest consciousness or to a margin of consciousness above that within the ordinary range of attention. Cf. SUBCONSCIOUS. — **su′per·con′scious·ness**, *n.*

The superlative forms of many adjectives are used nominally to denote an unsurpassed point or condition of the specified quality (the river is at its *lowest;* at his *humanest* in this book). See 1st COMPARE, 3.
☞ In good usage, superlative adjectives and adverbs as best, worst, etc., precede numerals used in a collective sense and follow those used distributively; as, the best ten examples of architecture; the three *worst* instances in France, Italy, and Germany.
2. Lifted up to the highest degree; most eminent; surpassing all other; supreme; as, *superlative* wisdom; a *superlative* example of clear thinking.
3. Exaggerated; excessive; as, *superlative* praise.
— **su·per'la·tive·ly,** *adv.* — **su·per'la·tive·ness,** *n.*

su·per'la·tive, *n.* **1.** *Gram.* The superlative degree; also, a form or word denoting it. The superlative is distinguished as *relative* or *absolute,* according as it denotes the highest degree appearing in a given aggregate under view (she has the *sharpest* tongue of them all), or simply a supreme or very high degree without definite comparison (she has the *sharpest* of tongues; *most cruelly* wronged). The latter is called also the *elative.*
2. An adjective or adverb in the superlative degree, used without discrimination or in exaggeration; also, *pl.,* hyperbole; as, writers should avoid *superlatives;* she always speaks in *superlatives.*
3. The superlative, or utmost, degree of something; the peak or acme.
So many highest *superlatives* achieved by man. *Carlyle.*
4. A superlative person or thing; that which is superlative or of the utmost degree in its kind; as, Chartres is the *superlative* among Gothic cathedrals.

su·per·lu'na·ry (sū'pĕr·lū'nȧ·rĭ), *adj.* Also **su·per·lu'nar** (-lū'nĕr). Being above the moon; not belonging to this world; — opposed to *sublunary.*

su·per·man' (sū'pĕr·măn'), *n.; pl.* -MEN (-mĕn'). **1.** An ideal superior man of the future; specif., in the philosophy of Nietzsche, one of the type which, supposedly, will be produced by the evolutionary struggle for survival, and will be characterized by superior physique and capacity to dominate; hence, one fitted to survive in an egoistic struggle for the mastery; — called also *overman.*
2. A man of superhuman powers or achievement; an extraordinarily great or successful man; as, to believe Napoleon a *superman.*

su·per·man·ism (-ĭz'm), *n.* The theory of, or theorizing about, the superman.

su·per·man·ly, *n.* Of, or characteristic of, a superman. — **su·per·man·li·ness,** *n.*

su·per·man'nish (sū'pĕr·măn'ĭsh), *adj.* Somewhat resembling or suggesting a superman; characteristic of a superman or his methods.

su·per·max·il'la (-măk·sĭl'ȧ), *n.* [NL.] *Anat.* The maxilla, or upper jaw. — **su·per·max'il·lar'y** (-măk'sĭ·lĕr'ĭ *or, esp. Brit.,* -măks·ĭl'ȧ·rĭ), *adj.*

su·per·mus'can (sū'pĕr·mŭs'kăn), *adj.* [*super-* + L. *musca* a fly.] Above the power of a fly. *Nonce Word.*

su·per·nac'u·lar (-năk'ū·lĕr), *adj.* Of the quality of supernaculum; first-rate; as, a *supernacular* wine. *Rare.*

su·per·nac'u·lum (-năk'ū·lŭm), *adv.* [NL. (after G. *auf den nagel trinken* to drink to the nail, i. e., without heel-taps), fr. L. *super* over + G. *nagel* a nail, as of the finger.] To the last drop; — a mock Latin term used chiefly in the phrase *to drink supernaculum,* to drink till the emptied glass can be held upside down on one's thumbnail without emitting a drop. *Archaic.*

su·per·nac'u·lum, *n.* [NL.] **1.** Liquor or, by extension, something, of superior quality.
2. *Rare.* **a** A draining of a cup. **b** A cup to be drained.

su·per'nal (sū·pûr'năl), *adj.* [OF. (F. *supernel*), fr. L. *supernus,* fr. *super* above. See SUPER-.] **1.** Being, or coming from, above; that is, or emanates from, on high; of or from heaven; — opposed to *infernal;* as, *supernal* beings, mansions, and grace.
2. Located in, or belonging to, the sky, or celestial regions; of or from the firmament; hence, high in position or reach; towering; as, *supernal* light, orbs, or summits.
3. Of heavenly or spiritual character; ethereal; as, *supernal* beauty.
— **su·per'nal·ly,** *adv.*

su·per'nal, *n.* A supernal being. *Rare.*

su·per·na'tant (sū'pĕr·nā'tănt), *adj.* [L. *supernatans,* pres. part. of *supernatare* to swim above, fr. *super* above + *natare* to swim.] Floating on the surface, as oil on water; also, above the water line of a floating body; as, the *supernatant* part of a ship.

su·per·na'tant, *n.* A supernatant substance.

su·per·na·ta'tion (-nā·tā'shŭn), *n.* A floating on the surface.

su·per·nat'u·ral (-năt'ū·rȧl), *adj.* [ML. *supernaturalis,* fr. *super* above + *natura* nature.] **1.** Of, belonging or having reference to, or proceeding from, an order of existence beyond nature, or the visible and observable universe; divine as opposed to human or spiritual as opposed to material; as, *supernatural* beings, forces, or revelations; a *supernatural* religion; the *supernatural* character of the soul.
2. Superhuman; preternatural; much more than is natural or normal. *Now Rare.*
3. Ascribed to agencies or powers above or beyond nature or based upon such an ascription; brought about, initiated, made operative, etc., by means that transcend the laws, or observed sequences, of nature; miraculous; as, the *supernatural* origin of life; a *supernatural* explanation.
Syn. — SUPERNATURAL, PRETERNATURAL, MIRACULOUS, SUPERHUMAN. That is SUPERNATURAL which is thought of as above or beyond the power, agencies, or laws of nature; that is PRETERNATURAL which exceeds in some way what is natural, ordinary, or explicable, without being felt as *supernatural;* as, "Could anything, however extraordinary, . . . happen now, of which all reasonable persons would not agree to wait for a physical explanation, instead of attributing it to a *supernatural* cause?" (*J. B. Mozley*); "one broad line of distinction which separates all this purposeless, trifling, and low *supernatural,* — magic, witchcraft, and the like, from the *miraculous* credentials of the Christian revelation" (*id.*); "the *preternatural* quickness and glibness of his speech" (*G. Eliot*); "a degree of acumen which appears to the ordinary apprehension *preternatural*" (*Poe*); "the *preternatural* prowess of the hero" (*Emerson*); "His face was *preternaturally* pale" (*Hawthorne*). MIRACULOUS implies the direct intervention of supernatural (esp. divine) agency; as, "the *miraculous* interpositions by which it [Christianity] was attested and carried on" (*Bp. Butler*); "God's *miraculous* interpositions" (*id.*). SUPERHUMAN is sometimes equivalent to *supernatural,* or *divine;* as, "superstitious belief in *superhuman* agency" (*J. B. Mozley*). But *superhuman* is often used in strong hyperbole of what, though merely human, exceeds ordinary standards; as, *superhuman* efforts, energy.
— **su·per·nat'u·ral·ly,** *adv.* — **su·per·nat'u·ral·ness,** *n.*

su·per·nat'u·ral (sū'pĕr·năt'ū·rȧl), *n.* **1.** With *the,* that which is supernatural; the supernatural order of existence; divine operation, influence, intervention, etc.; hence, something miraculous or marvelous.
2. A supernatural being, force, essence, etc.

su·per·nat'u·ral·ism (-ĭz'm). **1.** Quality or state of being supernatural; also, supernatural beings, agents, etc., collectively.
2. Belief in the supernatural; specif., any doctrine or creed that asserts the reality of an existence beyond nature and the control and guidance of nature and men, by an invisible power or powers.

6. *Obs.* **a** Contracted or promised in marriage; betrothed. **b** Bound by loyalty or an oath of allegiance.

7. Bound to come about or to happen; certain to eventuate; assured; as, moving to *sure* disaster; his success is *sure;* also, of persons, bound; destined; — usually with infinitive; as, he is *sure* to succeed or to fail.

Syn. — Assured, infallible, incontestable. — SURE, CERTAIN, CONFIDENT, POSITIVE. *Sure* and *certain* are often interchangeable. But SURE frequently emphasizes the mere state of assurance; CERTAIN often suggests more strongly a conviction that is based on definite grounds; as, "I know my hour is come. — Not so, my lord. — Nay, I am *sure* it is" (*Shak.*); "Be out of hope, of question, of doubt; be *certain*" (*id.*); I felt for a time *sure* of his innocence; I am now *certain* of his guilt. As employed of objects, *sure* often applies to that which may be securely relied on, *certain*, to that which is established or inevitable; as, "a more *sure* word of prophecy" (2 *Pet.* i. 19); "the past unsighed for, and the future *sure*" (*Wordsworth*); "proof as strong as my grief and as *certain* as I expect my revenge" (*Shak.*); to do it is *certain* death. CONFIDENT implies strong belief or expectation; POSITIVE (less frequently *confident*) often suggests overconfidence or dogmatism; as, "I do think I saw 't this morning; *confident* I am last night 't was on my arm" (*Shak.*); "most *confident* when palpably most wrong" (*Cowper*); "They felt very *positive*, but were not quite *certain*" (*Coleridge*); cf. "As I can't be *certain*, I won't be *positive*" (*Lowell*). Cf. CERTAINTY, HOPEFUL, CONFIDENCE.

Ant. — Unsure, uncertain; fallible; doubtful, dubious; precarious, insecure; vague, indefinite; disputable.

— *to be sure, or be sure.* **a** Certainly; without doubt; as, Shall you go? *To be sure* I shall. **b** It must be acknowledged; admittedly; as, they were brave, *to be sure*, but ineffectual.

surf, *adj.* Of or pertaining to surf.

surf, *v. i.* To bathe in the surf; to ride the surf, as on a surfboard.

sur'face (sûr'fĭs), *n.* [F., after L. *superficies.* See SUR-; FACE. Cf. SUPERFICIAL.] **1.** The exterior or outside of an object or body; the outermost or uppermost boundary; the face or faces of a three-dimensioned thing; a plane of a solid; as, the uneven *surface* of the earth; on the *surface* of the water; planks with a rough *surface;* the octagonal *surfaces* of a diamond.

2. Something without depth; a mere outside; superficial aspect; external appearance, characteristics, etc.

3. *Aeronautics.* An airfoil used for sustentation or control, or to increase stability; — the term applies to the whole member, and not to one side only.

4. *Geom.* A two-dimensional locus of points; the boundary or portion of the boundary of a three-dimensional region; superficies; as, a plane *surface;* a spherical *surface.*

5. *Railroads.* The condition of the track as to vertical evenness or smoothness over short distances; as, the track is in *surface* (approximately perfect).

Syn. — Exterior, face, outside. **Ant.** — Interior, inside.

☞ COMBINATIONS (all adjectives) are:

surface-coated	**surface-dressed**	**surface-feeding**
surface-damaged	**surface-dry**	**surface-hold**
surface-deposited	**surface-dwelling**	**surface-scratched**

— *on the surface.* To all outward appearances; so far as one can see; as, *on the surface*, things were going smoothly.

sur'face, *adj.* **1.** Pertaining to or at a surface; acting upon or against a surface.

2. Superficial; as, *surface* friendships.

3. *Mining.* Working or worked at or near the surface.

sur'face (sûr'fĭs), *v.*; SUR'FACED (-fĭst); SUR'FAC·ING (-fĭs·ĭng). *Transitive:* **1.** To give a surface to; to make smooth or to plane, as lumber; to finish, as by polishing or varnishing, as a marble slab or furniture; to apply the surface layer to, as a pavement.

2. To bring to the surface, as a submarine.

—, *Intransitive:* **1.** To work on or at the surface, as a gold digger who works the ground superficially or a tracklayer who brings the top of the rail to a true grade line.

2. To come to the surface.

Surface, Charles *and* **Joseph.** Two brothers in Sheridan's *School for Scandal.* The younger, Charles, is a generous prodigal and libertine, but kindhearted; Joseph is a mean and vicious hypocrite.

surface anatomy. See ANATOMY, 2 **a.**

sur'face·bent', *adj. Railroad Engin.* Not in surface. Cf. SURFACE, *n.*, 5.

surface carburetor. See CARBURETOR.

surface card *or* **board.** Cardboard colored or finished on the surface only.

surface color. The color ascribed to an opaque substance or object; also, a color extending no farther than the surface. Specif.: **a** *Optics.* Color determined by reflection at the surface, as the yellow color of gold. **b** *Psychol.* Any color perceived as localized in the surface of an object and conforming to the orientation, configuration, and texture of that surface. Cf. BULKY COLOR; FILM COLOR.

surface cooler. A tank of cold water or other liquid-cooling medium in which milk in cans is cooled.

sur'faced (sûr'fĭst), *adj.* That has been given a surface; provided with a (specified) kind of surface. — **sur'faced·ly,** *adv.*

surface density. *Physics.* The electrical charge on a surface per unit area.

surface density of energy. Specific irradiation. See IRRADIATION, 9.

surface energy. *Physics.* The energy peculiar to a surface film (see SURFACE TENSION).

surface fire. *Forestry.* A fire which burns only surface litter and undergrowth. See FOREST FIRE.

surface friction. = FRICTIONAL RESISTANCE. See RESISTANCE, 5 **a.**

surface gauge. *Mach.* **a** A scriber mounted in an adjustable stand for marking off castings, testing the accuracy of plane surfaces, etc. It is used with a surface plate. **b** See 2d GAUGE, 10.

surface gravity. *Astrophysics.* Intensity of the force of gravity at the surface of the earth or a celestial body.

surface integral. See INTEGRALS OF FIRST KIND.

surface layer. *Elec.* A layer, as a layer of moisture, having a resistivity different from that of the body on which it is deposited.

sur'face·less, *adj.* Having no surface, or no finished surface. See -LESS.

sur'face·ly, *adv.* On the surface; superficially.

sur'face·man (sûr'fĭs·măn), *n.*; *pl.* -MEN (-mĕn). A man who works on the surface, as on the roadbed of a railroad or the surface works of a mine; also, a repairer of road surfaces.

surface measure. The surface area of a board. When the board is one inch thick, surface measure and board measure are synonymous.

surface of binormals. *Math.* The locus of all the binormals to a space curve, which is the *line of striction* of the surface.

surface of buoyancy. The locus of the center of buoyancy of a floating body.

surface of centers. *Math.* = CENTRAL SURFACE.

surface of flotation. The envelope of all the planes of flotation of a body.

surface of projection. *Geom., Persp., etc.* See PROJECTION, *n.*, 8 **a.**

surface of rectification. *Geom.* The developable surface formed by the lines of rectification of a curve, on which when flattened out the curve becomes a straight line.

surface of revolution. *Math.* A surface conceived as formed by the revolution of a plane curve about a line in its plane. See REVOLUTION, 1 **b.**

surface paper. A paper sized, calendered, or otherwise surfaced.

surface plate. *Mach.* A steel instrument of precision having a dressed flat surface, used as a standard of flatness. Some have two surfaces at right angles.

sur'fac·er (sûr'fĭs·ĕr), *n.* One who or that which surfaces; specif.: **a** A machine for planing or dressing the surface of wood, metal, stone, etc. Cf. CYLINDER PLANER, BUZZ PLANER. **b** A device used in gauging railroad ties for tie plates. **c** One who surfaces furniture, etc. **d** An undercoat of paint used to level up inequalities of a surface.

surface railway. See ELECTRIC RAILWAY.

surface resistance *or* **resistivity.** *Elec.* The electrical resistance of a surface layer to a current.

surface rib. *Arch.* A merely ornamental rib on the surface of a vault, etc.

surface spherical harmonic. See SPHERICAL HARMONIC (of the *n*th degree).

surface strain. *Mech.* See 4th STRAIN, 6 **a**.

surface switch. *Elec.* See SWITCH, *n.*, 5.

surface tension. *Physics.* That property, due to molecular forces, which exists in the surface film of all liquids and tends to bring the contained volume into a form having the least superficial area. Particles lying below this film, being equally acted on from all sides, are in equilibrium as to forces of cohesion, but those in the film are on the whole attracted inward, and tension results. Surface tension is numerically equal to the force acting at right angles to a line of unit length (say one centimeter) lying on the surface, and in this sense is called also the ***constant of capillarity*** and is represented by the symbol T. It is also equal to the work required to enlarge the surface by a unit area (say one square centimeter). It measures the work done in bringing molecules from the interior to the surface of a liquid.

sur'fac·ing (sûr'fĭs·ĭng), *pres. part. & verbal n.* of SURFACE. Hence: *n.* **1.** Act or process of one who or that which surfaces; specif.: **a** Gold digging on the surface. **b** The motion of a tool, or part of a tool, used in making or finishing a surface. **c** *Tracklaying.* The act of bringing the top of the rail to a true grade line.
2. Material forming or used to form a surface; as, the *surfacing* for a road; to wash the *surfacing* for gold.

sur'fac·y (-ĭ), *adj.* Superficial.

surf'bird' (sûrf'bûrd'), *n.* A shore bird (*Aphriza virgata*) of the Pacific coasts of North and South America, allied to the turnstones, but somewhat like the golden plover in form and habits. It is readily distinguished in all plumages by its tail, which is blackish at the tip and broadly white at the base.

surf'board' (-bōrd'; 181), *n.* A long, narrow board used in the sport of riding the surf, as at the Hawaiian seashore.

surf'board', *v. i.* To ride the surf on a surfboard. — **surf'board'ing,** *n.*

surf'boat' (sûrf'bōt'), *n. Naut.* A boat fit for use in heavy surf, esp. one built strong and buoyant and with a marked sheer to ride the seas better. — **surf'boat'man,** *n.*

surf clam. A large clam (*Spisula*, syn. *Mactra, solidissima*) common on ocean beaches of the Eastern United States; — called also *sea, hen,* and *beach, clam.* Also, a related species (*S. polynyma*).

surf coot. Surf scoter.

surf duck. A scoter, esp. surf scoter.

sur'feit (sûr'fĭt), *n.* [ME. *surfet,* fr. OF. *surfait, sorfait,* excess, crime, fr. *surfaire, sorfaire,* to get the advantage, prop., to overdo (F. *surfaire* to overcharge), fr. *sur* over + *faire* to make, do, fr. L. *facere.* See SUR-; FEAT, *n.*, FACT. Cf. FORFEIT.] **1.** Excess; superfluity; overabundant supply, yield, etc.; as, to have a *surfeit* of fruit on the trees; a *surfeit* of goods on the market.
2. Intemperate or immoderate indulgence, as in food or drink; also, *Obs.*, any sin of intemperance, as gluttony.

swine (swīn), *n.* *sing. & pl.* [ME. *swin*, fr. AS. *swīn*; akin to OFris. & OS. *swīn*, D. *zwijn*, G. *schwein*, OHG. *swīn*, ON. *svīn*, Goth. *swein*, L. *suinus* swinish, OSlav. *svinŭ*, and AS. *sū* sow. See SOW, *n.*] **1.** Any hoofed mammal of the hog kind (family Suidae in the broad sense, including the peccaries); a hog; — chiefly used collectively and applied esp. to domestic hogs. The swine are stout-bodied, short-legged artiodactyl animals of omnivorous habits, having a thick skin usually covered with coarse bristles, a rather long mobile snout, small tail, and feet with two functional and (except in the peccaries) two nonfunctional digits. In the male the canines are often developed into effective tusks. English and American breeds of domestic swine are supposed to be derived from the European wild boar (see WILD BOAR), but many of them have been crossed with Asiatic breeds of different ancestry. Well known breeds are the Berkshire, Cheshire, Chester White, Duroc-Jersey, Hampshire, Poland China, Tamworth, and Yorkshire. Cf. WART HOG, PECCARY.
2. A stupid, doltish, or sensual person.

swine back. = HOGBACK.
swine'-backed' (swīn'băkt'), *adj.* Having a hogback; also, *Archery*, convexly curved.
swine'bread' (swīn'brĕd'), *n.* **a** The truffle. **b** Sowbread. **c** = EARTHNUT, 1 **a** (1).
swine'-chopped' (-chŏpt'), *adj.* [*swine* + *chop* a jaw.] Having an overshot jaw; — said of dogs.
swine'cote' (-kōt'; -kŏt), *n.* A pigsty. *Now Dial.*
swine cress. = SWINE'S-CRESS.
swine erysipelas. *Veter.* A contagious febrile disease of swine, caused by bacteria (*Erysipelothrix rhusiopathiae*) and characterized by red blotches on the neck and belly.
swine fever. = HOG CHOLERA.
swine grass. = KNOTGRASS **a**.
swine'head' (swīn'hĕd'), *n.* Also, *Obs.*, **swine's'-head'** (swīnz'-). One given to sensuality or intemperance.
swine'herd' (-hûrd'), *n.* A keeper of swine. — **swine'herd'ship,** *n.*
swine'hull' (swīn'hŭl'; swīn'ŏŏl'), *n.* A pigsty. *Dial. Eng.*
swine itch. *Med.* Dermatitis due to protein sensitization (anaphylaxis) from handling carcasses of animals, esp. swine. It is characterized by redness, swelling, and eruptions of the skin, esp. of the hands and forearms.
swine'ly (swīn'lĭ), *adj.* Swinish. *Rare.*
swine'pipe' (-pīp'), *n.* The European redwing. *Local, Eng. & Scot.*
swine plague. *Veter.* An infectious bacterial disease of hogs caused by *Pasteurella* (syn. *Bacillus*) *suiseptica*. The symptoms resemble those of hog cholera, but show a greater tendency to pneumonia. Cf. HEMORRHAGIC SEPTICEMIA.
swine pox. **1.** *Old Med.* A variety of the chicken pox, with acuminated vesicles containing a watery fluid.
2. *Veter.* A contagious fever of swine characterized by pustules on the skin, esp. the hairless parts.
swin'er·y (swīn'ĕr·ĭ), *n.* A piggery; also, swine collectively.
swine's'-bane' (swīnz'bān'), *n.* Sowbane.
swine's'-cress', *n.* Any cress of the genus *Coronopus*.
swine's'-feath'er, *n.* Also **swine's'-pike',** A stake or bayonetlike spear fixed in a musket rest or placed in the ground to hinder cavalry. *Hist.*
swine's'-fen'nel, *n.* The brimstonewort *Peucedanum officinale*.
swine's'-snout', *n.* The dandelion.
swine's'-suc'co·ry, *n.* **a** Chicory. **b** Lamb succory.
swine'stone' (swīn'stōn'), *n.* Anthraconite.
swine'sty' (-stĭ'), *n.* A pigsty.
swine thistle. The sow thistle
swine'y (swīn'ĭ), *adj.* Swinish. *Rare.*
swing (swĭng), *v.*; *past tense & past part.* SWUNG (swŭng), *Archaic past tense* SWANG (swăng); *pres. part. & verbal n.* SWING'ING (swĭng'ĭng). [ME. *swingen*, fr. AS. *swingan* to scourge, to fly, to flutter; akin to G. *schwingen* to winnow, to swingle, to oscillate, *sich schwingen* to leap, to soar, OHG. *swingan* to throw, to scourge, to soar, Goth. *afswaggwjan* to cause to despair. Cf. SWINGE, SWINGLE, SWINK.] *Transitive:* **1.** *Obs.* **a** To scourge; beat; whip. **b** To throw with a fling; to hurl.
2. To wield, as a weapon, with a flourish or sweep; to throw (something or someone held) around in a circle or backwards and forwards; as, to *swing* a lasso, a sword, or a censer.
3. To hang; to suspend; to attach by hinges, to end supports, etc., so as to permit oscillation or turning; as, to *swing* hammocks on the deck; he was *swung* up to the nearest tree.
4. To make oscillate; to move to and fro, as in a swing; as, a device to *swing* a bell; to *swing* the child for ten minutes; also, to cause to turn around, about, or in a (specified)

swine's'-head', *n.* = SWINEHEAD.

direction; to make rotate or pivot; to move around an axis, on a hinge, etc.; as, to *swing* a door to; to *swing* troops into line.
5. To handle successfully; manage; to make a success of; as, to *swing* a bond issue. *U. S.*
6. *Mach.* To admit (anything) so that it can be turned; — said of a lathe, or lathe centers; as, the lathe (or centers) can *swing* a pulley of 12 inches diameter.
7. *Naut.* To sway; swig. *Rare.*
——, *Intransitive*: **1.** *Obs.* **a** = SWING, *n.*, 2. **b** = SWING, *n.*, 3. **c** Impetus; driving force.
2. *Now Dial. Eng.* **a** A swinging blow. **b** A swinging walk or gait. **c** A couple or leash for hounds.
swinge (swĭnj), *v. t.* [See SINGE.] To singe; scorch. *Obs. exc. Dial.*
swinge'ing (swĭn'jĭng), *adj.* That swinges. *Now Colloq.* **a** Strikingly large; whopping. **b** Strikingly good; capital. — **swinge'ing·ly**, *adv.*
swing'er (swĭng'ĕr), *n.* One who or that which swings; specif.: **a** A whirler for coating photographic plates. Cf. WHIRLER, *n.* **b** A gun battery.
swing'er (swĭn'jĕr), *n.* **1.** One who or that which swinges. **2.** A swinging example or instance; a whopper. *Slang.*
swing'er (swĭn'jĕr), **swinge'our**, *n.* [Cf. G. *schwänzer.*] A sluggard; vagabond; rogue. *Scot.*
swing gate. A gate that swings in either direction and closes when released. Specif., *Australian*, a gate used in drafting sheep or cattle, so set as to close access to either of two yards or runways.
swing hammer crusher. = HAMMER MILL, 3.
swing'ing (swĭng'ĭng), *n.* **1.** The action or act of one who or that which swings.
2. *Radio.* **a** Variation in frequency of a transmitted wave, which may be observed either as a variation in the beat frequency in beat reception or as a variation in received signal intensity. **b** = FADING.
swing'ing, *adj.* That swings; characterized by swing or a swing; as, a *swinging* flower basket, door, pace, or melody. — **swing'ing·ly**, *adv.*
swing'ing (swĭn'jĭng). Var. of SWINGEING.
swing'ing bar (swĭng'ĭng). A swing bar.
swinging basin *or* **berth.** A basin, usually dredged, where vessels may be winded, or turned around, in pointing them for their slips or docks.
swinging boom. *Naut.* = LOWER BOOM.
swinging post. See GATEPOST.
swinging ring. A gymnastic ring, usually of metal covered with leather or rubber, suspended so as to swing freely at the end of a rope.
swing jack. = TRAVERSING SCREW JACK.
swing joint. A nonleaking joint, as a pipe joint, so constructed that the parts joined are movable. In a **single-swing joint**, one of the parts may be rotated relative to the other. In a **double-swing joint**, one of the parts, in addition to being rotatable relative to the other, may be moved about its own axis. — **swing'-joint'ed** (66), *adj.*
swing knife. A swingle for beating flax.
swin'gle (swĭng'g'l; *cf.* SWINGEL), *n.* [AS. *swingel, swingele*, a stroke, blow, a scourging, whip, scourge; akin to MD. *swinghel* (in sense 1), and to E. SWING. Cf. SWINGLETREE.] **1.** A wooden instrument like a large knife, about two feet long, with one thin edge, used for beating and cleaning flax; a scutcher.
2. The swiple of a flail; also, a flaillike cudgel.
3. A spokelike lever used for turning the barrel in wire drawing or the roller of a plate press, etc.
swin'gle, *v. t.*; SWIN'GLED (-g'ld); SWIN'GLING (-glĭng). [Cf. MD. *swinghelen* to swingle (flax). See SWINGLE, *n.*] To clean by beating with a swingle; to separate away the coarse and woody parts of; to scutch.
swin'gle (swĭng'g'l; swĭng''l), *n. & v.* [The v. is freq. of *swing.*] Swing. *Chiefly Dial.*
swin'gle·bar' (swĭng'g'l·bär'), *n.* A swingletree.
swingle staff. A swingle for beating flax.
swin'gle·tail' (swĭng'g'l·tāl'), *n.* The thresher shark.
swingle tow. = SWINGLING TOW.
swin'gle·tree' (swĭng'g'l·trē'), *n.* [See SWINGLE, *n.*; TREE. Cf. SINGLETREE; SWINGTREE.] **1.** A swingstock.
2. A whippletree. See SINGLETREE.
swin'gling tow (swĭng'glĭng). Coarse flax, separated by swingling and hatcheling.
swing plate. *Mach.* A plate that may be swung about a pivot, and clamped.
swing plow. **a** A plow without a fore wheel under the beam. **b** A swivel plow. See PLOW, *n.*, 1.
swing saw. A circular saw on a swinging frame.
swing'stock' (swĭng'stŏk'), *n.* A timber, against the blunt top edge of which flax is laid to be swingled.
swing'-swang' (-swăng'), *n.* A swing backward and forward, as of a pendulum.
swing team. = SWING, *n.*, 10.
swing tool. A device, swung on centers, so as to yield to unequal pressure, in which delicate work (as parts of a watch) is held to be polished.
swing train. *Railroads.* A train for bringing up full cars of material to supply the main construction train. *U. S.*
swing'tree' (swĭng'trē'), *n.* [See SWINGLETREE.] A whippletree.
swing wheel. **a** The scape wheel in a clock, driving the pendulum. **b** The balance of a watch.
swing'y (swĭng'ĭ), *adj.* Swinging; marked by swing.
swin'ish (swĭn'ĭsh), *adj.* Of, pertaining to, like, or befitting, swine; gross; beastly; sensual. "*Swinish* gluttony." *Milton.* — **swin'ish·ly**, *adv.* — **swin'ish·ness**, *n.*
swink (swĭngk), *v. i.*; *past tense* SWANK (swăngk), SWONK (swŭngk); *past part.* SWONK'EN (swŭngk'ĕn); *pres. part. & verbal n.* SWINK'ING. [AS. *swincan*; akin to AS. *swingan.* See SWING.] To labor; toil; slave. *Archaic & Dial.*
For which men *swink* and sweat incessantly. *Spenser.*
— *v. t. Obs.* **a** To acquire or earn by labor.
To devour all that others *swink.* *Chaucer.*
b To cause to drudge; to exhaust with labor. "The *swinked* hedger." *Milton.* **c** To drink heavily.
swink, *n.* [AS. *swinc, geswinc.*] Labor; toil; drudgery. *Archaic & Dial.*
swink'er (swĭngk'ĕr), *n.* A laborer. *Obs.*
swipe (swīp), *n.* [Var. of SWEEP. See SWAPE, SWOOP.] **1.** A pump handle, a starting lever for a portable engine, or the like; a swape or sweep. See SWEEP, *n.*, 10.
2. A strong blow given with a sweeping motion, as with a bat or club, the paw of an animal, etc.; also, a swiper. *Slang.*
3. A swath of cut grain. *Rare.*
4. A long drink; draft; gulp.
5. One who rubs down horses. *Slang.*
6. *Slang, Brit.* **a** Swine. **b** Fellow; chap.

swipe (swīp), *v.*; SWIPED (swīpt); SWIP'ING (swīp'ĭng). [See SWIPE, *n.*] *Intransitive*: **1.** To cut, strike, or hit, with a sweeping motion; — often with *at.*
2. To drink a mug of liquor at one draft.
3. To sweep a river bottom, or the like.
——, *Transitive*: **1.** To give a swipe to; to strike with a sweeping motion, as a ball.
2. To snatch; steal; pilfer. *Slang, U. S.*
swipe. Dial. var. of SWEEP.
swip'er (swīp'ĕr), *n.* One who swipes; esp. one who drinks copiously or pilfers.
swipes (swīps), *n. pl.* [Cf. SWIPE gulp.] Poor, thin, or spoiled beer; small beer; also, beer in general. *Slang, Eng.*
swi'ple, swip'ple (swĭp'l), *n.* [See SWIPE.] That part of a flail which strikes the grain in threshing; a swingle.
swip'per (swĭp'ĕr), *adj.* [AS. *swipor* cunning.] Nimble; quick. *Obs. exc. Dial.*
swip'y (swīp'ĭ), *adj.* Marked by swiping. *Rare.*
swire (swīr), *n.* [AS. *swīra, swēora, swēora*, neck, nape.] **1.** The neck; the throat. *Obs.*
2. = COL, 1; — now chiefly in local names.
swirl (swûrl), *v. i.*; SWIRLED (swûrld); SWIRL'ING. [Cf. Nor. *svirla* to whirl, freq. of *sverra* to whirl, Dan. *svirre*, G. *schwirren* to whiz, to buzz.] To move with an eddying or whirling motion; to whirl. — *v. t.* To cause to swirl, or whirl.
swirl (swûrl), *n.* A whirling motion, or something characterized by such a motion; an eddy, whirl, curve, twist, or the like, as a knotted spot in wood, the dart of a fish when hooked, an eddy in a current, etc.
The silent *swirl* of bats. *Mrs. Browning.*
swirl'y (swûr'lĭ), *adj.* **1.** Knotted; twisted. *Scot.*
2. Swirling.
swirr'ing (swûr'ĭng), *n.* A whirring sound.
swish (swĭsh), *v. i.*; SWISHED (swĭsht); SWISH'ING. [Imitative. Cf. SWASH.] To make the sound of a swish, as in walking, cutting grain, etc.; as, her skirts *swished.* — *v. t.* To move, strike, or lash, with a swish (the sound or thing); specif., *Brit. School Slang*, to flog.
swish (swĭsh), *n.* **1.** A thin prolonged sound such as that produced by a whip rapidly cutting the air; also, a light sweeping or brushing sound of, or as of, a long or full silk skirt in motion; — sometimes **swish'-swish'**.
2. Something that makes this sound; as: **a** Dashing spray or water. **b** A flogging birch or cane.
swish, *adv.* With a swish. *Colloq.*
swish, *adj.* Smart. *Slang, Brit.*
swish, *n.* [Cf. SWASH, SWISH-SWASH.] A kind of mortar used in West Africa.
swish'er (swĭsh'ĕr), *n.* One who or that which swishes; a flogger.
swish'ing (-ĭng), *n.* That swishes. — **swish'ing·ly**, *adv.*
swish'-swash' (-swŏsh'), *n.* **1.** A weak, characterless drink.
2. A swashbuckler. *Obs.*
swish'-swash', *adv.* With a swish and a swash.
swish tail. **a** A swishing tail. **b** *Slang.* A pheasant.
swish'y (swĭsh'ĭ), *adj.* Swishing.
Swiss (swĭs), *adj.* [F. *suisse*, adj. & n., fr. MHG. *Suiz.* Cf. SWITZER.] Of, pertaining to, or characteristic of Switzerland or the Swiss; imported from or native to Switzerland.
Swiss, *n. sing. & pl.* [F. *suisse.* See SWISS, *adj.*] **1.** A native or inhabitant of Switzerland; a Switzer; also, collectively, the people of Switzerland. The Swiss belong almost wholly to the Alpine or Celtic race, and the remains in the ancient lake dwellings indicate that this has always been the prevailing type. German, French, Italian, and Romansch are spoken in different Swiss cantons.
2. [*not cap.*] = SWISS MUSLIN.
Swiss blue. = SLATE BLUE.
Swiss cambric. A kind of white muslin or bishop's lawn, used for frills, flounces, and infants' clothes.
Swiss catchfly. A rare catchfly (*Silene vallesia*) of the European Alps. It has long-peduncled white flowers.
Swiss chard. = 1st CHARD, 2 **a**.
Swiss cheese. Any cheese having the character of cheeses made in Switzerland; specif., Gruyère, or Emmentaler, cheese.
Swiss darning. A kind of darning, for thin places in fabric in which stitches like the original texture of the web are made on the right side of the material.
Swiss Fam'i·ly Rob'in·son (rŏb'ĭn·sŭn; -s'n). The English translation (1820) of a story for children, written in German (1813) by Johann Rudolf Wyss, who was inspired by *Robinson Crusoe.*
Swiss franc. = FRANC **d**.
Swiss guards. *Mil.* A body of Swiss mercenary troops formerly employed as a bodyguard by various sovereigns, notably the French kings. The Pope still maintains a small body.
swiss'ing (swĭs'ĭng), *n.* [Origin uncert.] The process of calendering cloth by passing it between hot rollers when damp.
Swiss mountain pine. A pine (*Pinus mugo*) of the mountains of central Europe. It is a prostrate shrub, or sometimes a low pyramidal tree, with short, bright-green leaves.
Swiss muslin. A kind of thin, sheer muslin usually with raised dots or small figures, orig. made in Switzerland, and used for curtains, dresses, etc.; — now usually called **swiss**.
Swiss pine. A Eurasian pine (*Pinus cembra*), often growing very tall. It has dark-green leaves and short, spreading branches. It yields cedar nuts and a resinous exudate (cf. RIGA BALSAM).
Swiss plan. A plan, formulated by Prof. L. A. Grosclaude, a Swiss scientist, for the reform of the calendar, whereby each quarter of the year would consist of three months of 30, 30, and 31 days respectively, all beginning on Monday. New Year's Day would be a yearday and in leap years a second extracalendar day (leap day) would be added. See CALENDAR REFORM.
Swiss Reformed Church. The church established during the Reformation in the Protestant cantons of Switzerland. See REFORMED.
Swiss roll. Jelly roll.
Swiss steak. A tough steak made more tender by pounding in a large amount of flour.
Swiss sword. *Mil.* A kind of basket-hilted sword, formerly often used by Swiss guards.
Swiss tea. An infusion of the herbage of any of several species of *Achillea*, esp. *A. atrata, A. moschata*, and *A. nobilis.*
Swiss War for Independence. The successful struggle, 1386–89, of the Swiss Confederation against the Hapsburgs of Austria. See *Sempach*, under BATTLE, *Table.*

swing'a·ble, *adj.* See -ABLE.
swinge'buck'ler, *n.* A swashbuckler. *Obs.*
swin'gel (swĭng'g'l; swĭn'j'l). Var. of SWINGLE.
swin'gld. Swingled. *Ref. Sp.*
swin'ney (swĭn'ĭ), *n.* *Vetr.* Var. of SWEENY.
swip, *n. & v.* [ME. *swippen* to strike; akin to AS. *swipu* a whip, ON. *svipa.* See SWIFT, *adj.*] Strike; hit; rush. *Obs.*
swird (swûrd). Var. of SWORD. *Obs. exc. Scot.*
swirld. Swirled. *Ref. Sp.*
swirl'ing·ly, *adv.* of SWIRLING.
Swisser. † SWITZER.
Swiss'ess, *n.* Fem. of SWISS.

switch (swĭch), *n.* [Cf. MD. *swick* a scourge, whip. Cf. SWINK, SWING.] **1.** A slender, flexible whip, rod, or twig. **2.** The end of the tail in some animals, as a cow or ox. **3.** A separate tress of hair worn to build up a coiffure. **4.** An act of switching; the action or office of one who switches, as of one who tends a railroad switch; specif.: **a** A blow with a switch. **b** A turn of a switch. **c** A changing or shifting, as of investments. **d** *Angling.* Short for SWITCH CAST. **e** *Bridge.* A shift to another suit than that previously bid.

5. *Elec.* A device for making, breaking, or changing the connections in an electric circuit. An ***air-break switch*** breaks the circuit in air as distinct from an ***oil***, or ***oil-break, switch*** which breaks the circuit in oil. An ***automatic switch*** is remote-controlled and is used for operating signaling or talking circuits in telephone practice. An ***auxiliary switch*** is actuated by a main device, as a circuit breaker, for signaling, interlocking, or the like. A ***back-connected switch*** has studs extending through the panel to which the current-carrying conductors are connected. A ***bell-alarm switch*** is an auxiliary switch controlled by the opening of a circuit breaker designed to close the circuit of an audible signaling device. A ***canopy, chain-pull***, or ***pull, switch*** is a snap switch installed in a canopy and usually operated by a chain or cord. A ***cam***, or ***cam-contactor, switch*** is actuated by a cam. A ***centrifugal switch*** is operated by centrifugal force and is used usually in connection with split-phase induction motors to disconnect the starting winding after the rotor has attained a predetermined speed and to reconnect it before the motor comes to rest. A ***change-over switch*** changes electrical circuits from one combination to another. A ***control switch*** is a switch usually manually operated for the control of electrically operated apparatus. Cf. MASTER SWITCH, below. A ***disconnecting***, or ***cutout, switch*** isolates a circuit or one or more pieces of electrical apparatus after the current has been interrupted by other means. A ***door switch*** is a snap switch mounted on or in a doorframe and operated by opening or closing the door. The moving blades of a ***double-throw switch*** may engage either of two different sets of fixed contacts. A ***double-pole switch*** has two blades with their contacts. A ***double-break switch*** opens a circuit at two places simultaneously. A ***drum switch*** has electrical connecting parts shaped like fingers which are held by spring pressure against contact surfaces on a revolving cylinder or sector. An ***electropneumatic switch*** is an electrically controlled, pneumatically actuated switch. An ***electrolier switch*** is a four-position switch for controlling two or three circuits. In the first position of a two-circuit electrolier switch, circuit 1 is closed; in the second position, circuit 2 is closed; in the third position, circuits 1 and 2 are closed, and in the fourth position, all circuits are open; — called also *two-circuit switch* and *three-circuit switch*. A ***field-discharge switch*** has auxiliary contacts for short-circuiting a generator or motor field through a discharge resistance as the switch is opened. A ***finder switch*** finds automatically a circuit out of a large number of circuits from which a signal comes. It is used in telephone circuits. A ***floor switch*** is placed in the shaft of an electric elevator at a height corresponding to a floor level and operated by a projection attached to the car. In a ***front-connected switch***, the conductors are fastened to terminals in front of the mounting. A ***flush switch*** is a snap switch so designed that when mounted its face only is exposed, the other sides being surrounded by a box or case not a part of the switch. An ***indicating control switch*** is a form of auxiliary switch that indicates the position or last operation or both of the controlled device, as a circuit breaker. A ***knife switch*** has hinged blades for the moving contacts which enter or embrace the contact clips. A ***limit switch*** is a switch for preventing overtravel of the mechanism which it controls, or it is a circuit breaker that opens the circuit when the current exceeds a predetermined amount. A ***line switch***, or ***line breaker***, combines the functions of a unit switch and circuit breaker. It is used in electric-railway control equipment, or, in telephone practice, it is a switch connected to one of a large number of circuits from which a signal comes and which finds automatically a circuit out of a smaller number of circuits. A ***master switch*** governs the operation of contactors and auxiliary devices of an electric controller. A ***momentary-contact switch*** is a push-button switch in which the circuit is open or closed only while the button is pressed. Such switches are self-restoring and reset to normal immediately upon release of pressure. ***Start-stop switches*** of this type are used to control automatic starting equipment for electric motors. An ***overload switch***, or ***overload circuit breaker***, automatically breaks the circuit when overloaded. A ***pendant switch*** is a snap switch installed at the end of a flexible cord. A ***pull***, or ***chain-pull, switch*** is a snap switch operated by a chain or cord. A ***reversing***, or ***direction, switch*** has four terminals capable of being connected in pairs in two different ways so as to constitute a pole-reversing device. It is used to change the direction of rotation of electric motors. A ***safety switch*** is usually a quick-break, quick-make switch completely enclosed in a metal box and operated by an external handle for controlling a power circuit. The switch is designed so as to make it impossible to open the box while the switch is closed, or to close the switch while the box is open. A ***sequence switch*** is a remote-controlled, automatically operated device used as a secondary master controller, esp. on electric locomotives. A ***service switch*** is an enclosed switch installed where the electric service enters a building. A ***selector switch*** is an automatic switch used to select a particular circuit or group of circuits on automatic telephone switchboards, etc. A ***single-pole switch*** has a single blade with its contact clip. A ***single-throw switch*** engages by a single operation a set of fixed contacts, as on an electrical switchboard, an organ console, a railroad track, etc. A ***snap switch*** is a manually operated switch with a blade or blades that make contact with a snap. The rate of motion of the contact members, while making or breaking the circuit, cannot be diminished by the manipulation of the operator. They are used to control house lighting, and their quick-make, quick-break mechanism is operated by a rotary motion, or a lever as in the ***tumbler switch***, or by a toggle, or the like. A ***surface switch*** is a snap switch designed for mounting on a plane surface, no enclosing parts, as a box, being required. A ***three-way switch*** is one having three terminals, one of which may be connected to either of the other two by the action of the switch. They are used where it is desired to control a light from two different points, as a hall light controlled from both upper and lower halls. A ***four-way switch*** has four terminals capable of being connected in two different ways so as to constitute a pole reversing switch. They are inserted between three-way switches when it is desired to control a lighting circuit from three or more points. A ***through switch*** is a snap switch installed in a length of flexible cord. A ***time switch*** has a clock mechanism which may be set to open or close a circuit at a predetermined time or times. A ***triple-throw switch*** has three blades and three contact clips. A ***unit***, or ***contactor, switch*** is designed to repeatedly establish or interrupt an electric-power circuit under normal conditions.

4. Characterized by distinct enunciation or separation of syllables; as, *syllabic* utterance; *syllabic* tunes. See SYLLABIC MELODY.

5. *Pros.* Designating a type of verse distinguished primarily by regular count of syllables rather than by rhythmical arrangement of accents or quantities; — usually contrasted with *accentual* (senses a & b). Prosodists who distinguish syllabic and accentual verse in English poetry call attention to the former's characteristic use of elision and contraction that preserve the regularity of its numbers, and to its frequent stress omissions and inversions (as in the poetry of Milton) that indicate the relative unimportance of regularity in accentuation. Such prosodists usually prefer "decasyllabic verse in rising rhythm" to "iambic pentameter."

-syl·lab'ic. A combining form of the adjective *syllabic*, as in deca*syllabic*, impari*syllabic*.

syl·lab'ic (sĭ·lăb'ĭk), *n.* 1. A syllabic character.

Gr. *syllēpsis* a taking together, fr. *syllambainein.* See SYLLABLE.] 1. *Gram.* The use of a word (as an adjective or verb) to modify or govern syntactically two (sometimes more) words, with only one of which it formally agrees in gender, number, etc. (Lat. *rex* et regina *beati*). Cf. ZEUGMA.

2. *Rhet.* Use of a word in the same grammatical relation to two adjacent words in the context, one metaphorical and the other literal in sense (their taunts, more cutting than knives).

3. A bringing together; a summary. *Rare.*

syl·lep'tic (sĭ·lĕp'tĭk), **syl·lep'ti·cal** (-tĭ·kăl), *adj.* [Gr. *syllēptikos* collective.] Of or pertaining to a syllepsis; containing syllepsis. — **syl·lep'ti·cal·ly**, *adv.*

Syl'li·dae (sĭl'ĭ·dē), *n. pl.* [NL., fr. *Syllis*, type genus (fr. Gr. *psellion* necklace) + *-idae.*] *Zool.* A large family of small polychaetous worms of the suborder Nereidiformia, some of which habitually reproduce by fission (cf. AUTOLYTUS). **Syl'lis** (-ĭs) is the type genus. — **syl'lid** (-ĭd), *adj. & n.* — **syl·lid'i·an** (sĭ·lĭd'ĭ·ăn), *adj. & n.*

syl'lo·ge (sĭl'ō·jē; -gē), *n.* [Gr. *syllogē.*] A collection; also, a compendium.

syl'lo·gism (sĭl'ō·jĭz'm), *n.* [ME. *silogime*, fr. OF. *silogime, sillogisme* (F. *syllogisme*), fr. L. *syllogismus*, fr. Gr. *syllogismos* a reckoning all together, a reasoning, syllogism, fr. *syllogizesthai* to reckon all together, to bring at once before the mind, to infer, conclude, fr. *syn* with, together + *logizesthai* to reckon, to conclude by reasoning. See SYN-; LOGISTIC, LOGIC.] 1. A logical scheme or analysis of a formal argument, consisting of three propositions (called respectively the *major premise*, the *minor premise*, and the *conclusion*). The conclusion necessarily follows from the premises, so that, if these are true, the conclusion must be true, and the argument amounts to demonstration, as in the following example: —

Every virtue is laudable;
Kindness is a virtue;
Therefore kindness is laudable.

The major premise is usually treated as a general rule of which the minor premise is a case and the conclusion an application. The two premises are related by a middle, or common, term which disappears in the conclusion; and for this reason the syllogism is often treated as a process of elimination. The formal validity of the syllogism is entirely distinct from its truth, which depends upon the truth of its premises; hence, the use of the syllogism, as of any piece of deductive reasoning, may be either to prove a conclusion by showing that it follows from known premises, or to test the truth of premises by showing what follows from them. See FIGURE, 19; MODE, 5 a; PREMISE, *n.*, 1; TERM.

2. Deductive reasoning; explication of the relations of ideas, esp. in accordance with syllogistic principles.

3. A subtle, specious, or crafty argument, piece of reasoning, or, by extension, method of attaining one's end.

syl·ves'trene (sĭl·vĕs'trēn), *n.* [From NL. *sylvestris*, specific name of the pine yielding it. See SYLVESTRIAN.] *Chem.* A colorless liquid terpene, $C_{10}H_{16}$, occurring in three optically different modifications; *A* [1, 8 (9)] *-m-* mentha-diene. The dextro variety is obtained from Swedish and Russian oil of turpentine. The inactive variety is usually called *carvestrene.*

syl·ves'tri·an (-trĭ·ăn), *adj.* [L. *sylvestris*, better *sŭl-vestris.*] Sylvan. *Rare.*

Syl·ves'tri·an (sĭl·vĕs'trĭ·ăn), *n.* Also **Syl·ves'trine** (sĭl-vĕs'trĭn). *Eccl. Hist.* **a** One of a monastic order founded by St. Sylvester Gozzoloni, in 1231. They follow the Benedictine Rule in its primitive austerity. **b** One of an associated order of nuns. — *adj.* Of or pertaining to the Sylvestrians.

Syl'vi·a (sĭl'vĭ·ȧ), *n.* [L. *Silvia;* cf. the masc. *Silvius*, and *silva* forest. See SYLVAN.] **1.** Feminine of SYLVANUS (see SILVANUS); — fem. proper name. Cf. SILVIA.
2. [NL., fr. the medieval name of the robin redbreast and other birds.] *Zool.* The typical genus of warblers of the family Sylviidae, formerly extensive, but now restricted to the European whitethroat, the blackcap, and their allies.

Syl'vi·an (sĭl'vĭ·ăn), *adj. Anat.* Discovered by, or named after, the French anatomist Jacques Dubois (= *Sylvius*), 1478–1555.

Sylvian aqueduct. = AQUEDUCT OF SYLVIUS.

Sylvian fissure *or* **sulcus.** = FISSURE OF SYLVIUS.

Syl·vi'i·dae (sĭl·vī'ĭ·dē), *n. pl.* [NL., fr. *Sylvia* + *-idae.*] *Zool.* A family of small ten-primaried oscine passerine birds, allied to the thrushes and consisting of the Old World or true warblers, represented in America by the kinglets and gnatcatchers. It is often ranked as a subfamily of the Turdidae and called **Syl'vi·i'nae** (sĭl'vĭ·ĭ'nē) or regarded as inseparable from Muscicapidae (which see). — **syl'vi·ine** (sĭl'vĭ·ĭn; -īn; 156), *adj.*

syl'vin·ite (sĭl'vĭn·īt), *n.* Rock which contains chiefly potassium chloride, but in an impure state.

syl'vite (sĭl'vīt), *n.* Also **syl'vin, syl'vine** (-vĭn). [From NL. sal digestivus *sylvii*, potassium chloride.] *Mineral.* Native potassium chloride, KCl, occurring in colorless cubes or crystalline masses like rock salt.

sym- (sĭm-). An assimilated form of *syn-.* See SYN-.

sym'ba·sis (sĭm'bȧ·sĭs), *n.* [NL., fr. Gr. *symbasis* agreement, arrangement.] *Biol.* The association of organisms in interbreeding groups, as species, which make evolutionary progress as units. *O. F. Cook.* — **sym·ba'sic** (sĭm-bȧ'sĭk), *adj.* — **sym·ba'si·cal** (-sĭ·kăl), *adj.* — **sym·ba'si·cal·ly,** *adv.*

sym'bi·o- (sĭm'bĭ·ō-). A combining form for *symbiosis*, as in:
symbiogenesis, symbiogenetic, symbiogenetically, symbiotrophic.

sym'bi·on (sĭm'bī·ŏn; sĭm'bĭ-), *n.* [NL.] *Biol.* A symbiont.

sym'bi·ont (sĭm'bī·ŏnt; sĭm'bĭ·ŏnt), *n.* [Gr. *symbiōn, symbiountos*, pres. part.] *Biol.* An organism living in symbiosis. — **sym'bi·on'tic** (-ŏn'tĭk), *adj.*

sym'bi·on'ti·cism (-ŏn'tĭ·sĭz'm), *n.* Symbiosis.

sym'bi·o'sis (-ō'sĭs), *n.* [NL., fr. Gr. *symbiōsis* a living together, *symbioun* to live together, fr. *syn* with + *bioun* to live.] *Biol.* The living together in more or less intimate association or even close union of two dissimilar organisms. In a broad sense the term includes parasitism, or *antagonistic*, or *antipathetic, symbiosis* (see PARASITE, *n.*, 3), in which the association is disadvantageous or destructive to one of the organisms, but ordinarily it is used of cases where the association is advantageous, or often necessary, to one or both, and not harmful to either. When there is bodily union (in extreme cases so close that the two form practically a single body, as in the union of algae and fungi to form lichens, and in the inclusion of algae in radiolarians) it is called *conjunctive symbiosis;* if there is no actual union of the organisms (as in the association of ants with myrmecophytes), *disjunctive symbiosis* (which see). Cf. HELOTISM, 2.

sym'bi·ote (sĭm'bī·ōt; sĭm'bĭ-), *n. Biol.* A symbiont.

sym'bi·ot'ic (-ŏt'ĭk), **sym'bi·ot'i·cal** (-ĭ·kăl), *adj.* [Gr. *symbiōtikos.*] *Biol.* Pertaining to, characterized by, or living in, a state of symbiosis. — **sym'bi·ot'i·cal·ly,** *adv.*

sym'bi·ot'ics (-ŏt'ĭks), *n.* The field of study dealing with symbiosis. See -ICS.

symbiotic saprophytism. *Bot.* The association of a saprophytic plant with a fungus symbiont or mycorhiza.

sym'bi·ot·ism (sĭm'bī·ŏt·ĭz'm; sĭm'bĭ-), *n.* Symbiosis.

sym·bleph'a·ron (sĭm·blĕf'ȧ·rŏn), *n.* [NL., fr. Gr. *syn* + *blepharon* eyelid.] *Med.* Cicatricial adhesion between an eyelid and the eyeball, as from a burn.

sym'bol (sĭm'bŭl; -b'l), *n.* [F. and L.; F. *symbole*, fr. L. *symbolus, symbolum*, fr. Gr. *symbolon* a sign by which one knows or infers a thing, fr. *symballein* to throw or put together, to compare, fr. *syn* with + *ballein* to throw. See PARABLE.] **1.** An authoritative summary of faith or doctrine; a creed. Cf. SYMBOLICAL BOOKS, SYMBOLICS, SYMBOLIC THEOLOGY.
2. That which stands for or suggests something else by reason of relationship, association, convention, or accidental but not intentional resemblance; esp., a visible sign of something invisible, as an idea, a quality or totality such as a state or a church; an emblem; as, the lion is the *symbol* of courage; the cross is the *symbol* of Christianity.

A *symbol* is a representation which does not aim at being a reproduction. *Goblet d'Alviella.*

3. In writing or printing, an arbitrary or conventional sign, such as a character, a diagram, a letter, or an abbreviation, used instead of a word or words, as in mathematics, physics, chemistry, music, phonetics, or the like, to represent operations, quantities, spatial position, valence, direction, elements, relations, qualities, sounds, etc. See ARBITRARY SIGNS AND SYMBOLS, in the Appendix; cf. OLD ROMAN SYMBOL; ABBREVIATION, *n.*, 2.
4. *Rare.* **a** A pregnant statement; a maxim. **b** Symbolism.
5. *Logic.* Any formal unit of expression, such as a term, proposition, or formal argument, which represents an aspect of thought capable of being dealt with as a unit.
6. *Psychoanalysis.* An object or act representing a repressed desire of which the individual is unconscious.
Syn. — Figure, type, sign. See EMBLEM.

sym'bol, *v. t.* To symbolize; to visualize by means of a symbol or symbols.

sym'bol, *n.* [Gr. *symbolai* contributions.] That which is thrown into a common fund; a contribution. *Now Rare.*

sym'bol·ae·og'ra·phy, sym'bol·e·og'ra·phy (-ē·ŏg'rȧ·fĭ), *n.* [Gr. *symbolaion* sign, token, contract + *-graphy.*] Art of drawing up legal instruments or documents.

sym·bol'a·ter (sĭm·bŏl'ȧ·tĕr), *n.* [See SYMBOLATRY.] One given to symbololatry. *Rare.*

sym·bol'ic (sĭm·bŏl'ĭk), *adj.* [L. *symbolicus*, fr. Gr. *symbolikos;* cf. F. *symbolique.*] **1.** Of or pertaining to a symbol or symbols; that is or constitutes a symbol; as, the *symbolic* books of a church; a *symbolic* diagram or character; the barren hills, *symbolic* of the hardy race reared among them.
2. Using, employing, or exhibiting a symbol or symbols; expressed in symbols; as, *symbolic* inscriptions, writers, and representations of God; consisting of a symbol or mark; as, a *symbolic* signature.
3. Characterized by symbolism; having a significance or reference beyond that which is outwardly or immediately manifest; as, a *symbolic* dance, poem, or ceremony; the *symbolic* poetry of Claudel.
4. *Gram.* = RELATIONAL, 4.
5. *Logic.* Proceeding by means of symbols; substituting abstract representations for concrete objects; as, *symbolic* operations; characterized by or terminating in symbols, instead of the things symbolized; as, *symbolic* thinking.
6. *Philol.* Pertaining to or designating a process, language, or type of linguistic structure, in which modification of meaning is indicated by internal changes of the radical element, such as umlaut, ablaut, reduplication. See TECHNIQUE, 2; INFLECTIONAL LANGUAGES.

sym·bol'ic, *n.* [After G. *symbolik.* See SYMBOLIC, *adj.*]
1. That which is symbolic; — usually with *the.*
2. *Theol.* = SYMBOLICS, 2.

sym·bol'i·cal (-ĭ·kăl), *adj.* Symbolic; marked by symbolism; emblematical; allegorical. — **sym·bol'i·cal·ly,** *adv.* — **sym·bol'i·cal·ness,** *n.*

symbolical books. *Eccl.* Books which contain the creeds, or confessions of faith, of churches or religious bodies.

symbolic, *or* **symbolical, delivery.** *Law.* The delivery of property sold by delivering something else as a symbol, token, or representative of it, as where a trunk and its contents are delivered by delivery of the key.

symbolic equation. *Math.* **a** An equation declaring the equivalence of certain operations. **b** An equation in which a single symbol equated to 0 is the equation of a curve or surface, or a combination of such symbols equated to zero; as $C=0$, $C'=0$, $C+\lambda C'=0$, the equations of two circles and a family of circles through their intersections.

symbolic logic. See LOGIC, *n.*, 1.

sym·bol'ics (sĭm·bŏl'ĭks), *n.* See -ICS. **1.** The study of ancient symbols.
2. *Theol.* Historic theology treating of Christian creeds and confessions of faith; symbolism;—called also *symbolic.*

symbolic theology. [See SYMBOLIC, *n.*] That branch of theology which deals with the doctrinal differences of churches as found in creeds.

sym'bol·ism (sĭm'bŭl·ĭz'm), *n.* **1.** The practice or art of using symbols, as by investing things with a symbolic meaning or by expressing the invisible, intangible, or spiritual, by means of visible or sensuous representations; specif., in literature and the fine arts: **a** The use of conventional or traditional signs, as, for example, the nimbus (see NIMBUS, *Illust.*), in the representation of divine beings, spirits, nature, etc., in order to indicate qualities, powers, degrees, or the like. **b** Artistic imitation or invention, not as an end in itself but as a method of revealing or suggesting immaterial, ideal, or otherwise intangible truth or states. Of this type of creative symbolism there are many forms ranging from the allegorization of nature or life to the presentation of ideas, emotions, states of mind, etc., through concatenations of sound, as in music or poetry, arrangements of lines, planes, etc., as in painting and sculpture, contrasts or blendings of color, as in painting, or the like. See SYMBOLIST, *n.*, 4.
2. A school of symbolists; also, the principles, methods, etc., of any one of these; as, to ignore the older *symbolisms.*
3. A system of symbols or representations, as in phonetics.
4. *Chem.* A combining of parts or ingredients. *Obs.*
5. *Philol.* A symbolic process or structure. See SYMBOLIC, *n.*, 6.
6. *Theol.* The science of creeds; symbolics.

sym'bol·ist, *n.* **1.** One who employs symbols or symbolism.
2. One skilled in the interpretation or explication of symbols.
3. *Eccl.* **a** [*often cap.*] One who regards the elements of the Eucharist as mere symbols and not as the body and blood of Christ. **b** One who advocates or employs symbolism in religious worship.
4. *Literature & Fine Arts.* One of a class of writers and artists prominent after 1880 in France and Belgium, and including such writers as Verlaine, Mallarmé, and Maeterlinck. They were also called decadents (see DECADENT, *n.*, 2). Esp. in literature, the symbolists were reactionists against realism and the theories and practices of the Parnassians. They concerned themselves with general truths instead of actualities, exalted the metaphysical and the mysterious, esp. the mystical power and charm of music, and aimed to unify and blend the arts and the functions of the senses. Their lyric poetry resembles music in its object, endeavoring to render by rhythms and sounds sentiments and emotions which escape analysis.
5. *Logic.* A logician who advocates or employs symbolic logic (see LOGIC, *n.*, 1).
— **sym'bol·ist,** *adj.*

sym'bol·is'tic (sĭm'bŭl·ĭs'tĭk), *adj.* Also **sym'bol·is'ti·cal** (-tĭ·kăl). Of, belonging to, or characteristic of, the symbolists; executed by, or in the manner of, a symbolist; marked by symbolism; symbolic; as, *symbolistic* poetry or methods. — **sym'bol·is'ti·cal·ly,** *adv.*

sym'bol·i·za'tion (-ĭ·zā'shŭn; -ĭ·zā'shŭn), *n.* **1.** The act or process of symbolizing; symbolical representation, or an instance of it; symbolism.
2. *Psychoanalysis.* Unconscious representation of a repressed desire, esp. in dreams.

sym'bol·ize (sĭm'bŭl·īz), *v. t.;* -IZED (-īzd); -IZ'ING (-īz'ĭng). [F. *symboliser.*] *Intransitive:* **1.** To be alike in qualities, properties, principles, etc.; to harmonize; agree; concur; to become united. *Now Rare.*
2. To use symbols or symbolism.
—, *Transitive:* **1.** To combine or unite; to cause to assimilate. *Obs.*
2. To represent, express, or identify by a symbol or symbols; as, a nimbus enclosing a cross *symbolizes* Christ; also, to regard or treat as a symbol; as, to *symbolize* a rainbow.
3. To serve as a symbol of; to typify; to stand for; as, the wedding ring *symbolizes* unending love.
Syn. — Represent, signify, typify.

sym'bol·iz'er (sĭm'bŭl·īz'ĕr), *n.* One who symbolizes; a symbolist.

symbolo-. [See SYMBOL.] A combining form, Greek *symbolo-*, from *symbolon*, meaning *sign, symbol*, as in *symbology.*

sym'bo·lo·fi'de·ism (sĭm'bō·lō·fī'dē·ĭz'm), *n.* [F. *symbolo-fidéisme.* Cf. FIDEISM.] Faith in symbols.

sym'bol·og'ra·phy (sĭm'bŭl·ŏg'rȧ·fĭ), *n.* [*symbolo-* + *-graphy.*] Symbolic writing or designs; symbolism (sense 1 **a**). — **sym'bol·og'ra·phist** (-fĭst), *n.* *Obs.*

sym·bol'o·gy (sĭm·bŏl'ō·jĭ), *n.* [*symbol* + *-logy.*] The art of expression by symbols; also, the study or interpretation of symbols. — **sym'bo·log'i·cal** (sĭm'bō·lŏj'ĭ·kăl), *adj.* — **sym·bol'o·gist** (sĭm·bŏl'ō·jĭst), *n.*

sym'bol·ol'a·try (sĭm'bŭl·ŏl'ȧ·trĭ), *n.* [*symbolo-* + *-latry.*] Excessive use or veneration of symbols.

sym'bol·ol'o·gy (-ŏ·jĭ), *n.* Symbology. *Rare.*

sym'bol·ry (sĭm'bŭl·rĭ), *n.* Symbols. *Rare.*

‖sym'bo·lum (sĭm'bō·lŭm), *n.* [L.] A symbol; specif., a creed; esp. [*cap.*], the Apostles' Creed or the Old Roman Symbol.

Sym'bo·lum Qui·cun'que (kwī·kŭng'kwē). [L.] The Quicunque vult, or ATHANASIAN CREED (which see).

sym'bou·leu'tic (sĭm'bōō·lū'tĭk), *adj.* [Gr. *symbouleutikos.*] Hortatory; epideictic. *Rare.*

Sym·bran'chi·a (sĭm·brăng'kĭ·ȧ), *n. pl.* [NL., fr. *sym-* + *-branchia.*] *Zool.* An order of teleost tropical fishes resembling the true eels (order Apodes) but having the maxillaries and premaxillaries well developed and the shoulder girdle joined to, or near, the skull. — **sym'branch** (sĭm'brăngk), *n.* — **sym·bran'chi·ate** (sĭm·brăng'kĭ·ĭt), *adj. & n.* — **sym·bran'choid** (-koid), *adj.* — **sym·bran'chous** (-kŭs), *adj.*

sym'ma·chy (sĭm'ȧ·kĭ), *n.* [Gr. *symmachia.*] Alliance in war. *Rare.*

sym·me'di·an (sĭm·mē'dĭ·ăn), *n.* [*sym-* + *median.*] *Math.* In a plane triangle, a line passing through a vertex of a triangle and being the isogonal conjugate of that median of the triangle which passes through that vertex; — called also **symmedian line.** — **sym·me'di·an,** *adj.*

symmedian point (of a plane triangle). *Math.* The point of intersection of the three symmedians of the triangle; the isogonal conjugate of the centroid.

sym'me·lus (sĭm'ē·lŭs), *n.* [NL., fr. *sym-* + *-melus.*] *Terat.* A monstrosity marked by the fusion of the lower extremities and imperfect development of the pelvis.

sym·met'al·lism (sĭm·mĕt'ăl·ĭz'm), *n.* [*sym-* + *metal* + *-ism.*] *Money.* That system of coinage in which the unit of currency consists of a certain weight of an amalgam of two or more metals, as gold and silver. Cf. BIMETALLISM, MONOMETALLISM.

sym'me·tral (sĭm'ē·trăl), *adj.* Commensurate; also, symmetrical. *Now Rare.*

sym·me'tri·an (sĭ·mē'trĭ·ăn), *n.* A symmetrist. *Obs.*

sym·met'ric (sĭ·mĕt'rĭk), *adj.* Symmetrical.

-sym·met'ric, -sym·met'ri·cal (-rĭ·kăl). See -SYMMETRY.

sym·met'ri·cal (sĭ·mĕt'rĭ·kăl), *adj.* [From SYMMETRY.]
1. Having or involving symmetry; exhibiting symmetry, or, esp., correspondence in size and shape of parts; balanced; regular; as, the human body is *symmetrical;* crystals are often *symmetrical;* a *symmetrical* garden or grouping.
2. *Bot.* Specif.: **a** Capable of division by a longitudinal plane into similar halves; — said of a flower, shoot, or organ. See ACTINOMORPHIC, BISYMMETRICAL, ZYGOMORPHIC. **b** Having the same number of members in each whorl of floral leaves; — said of a flower. Cf. REGULAR, *adj.*, 7.
3. *Chem.* Exhibiting symmetry in the structural formula; specif., designating derivatives of benzene in which three or four substituting groups occupy the positions 1, 3, 5, or 1, 2, 4, 5. See BENZENE RING. Abbrs. *s-, sym-.*
4. *Geom.* Having corresponding points whose joins are bisected by a given point or perpendicularly bisected by a given line or plane; — said of a geometrical figure.
5. a *Logic & Math.* Such that its terms may be interchanged without altering its value, character, or truth; — said of relations, functions, equations, etc.; as, $c = f(a + b)$ is *symmetrical* with respect to *a* and *b*, but not generally with respect to *a* and *c.* **b** *Logic.* Commensurable.
6. *Med.* Affecting corresponding parts simultaneously and similarly; as, *symmetrical* gangrene of the legs.
— **sym·met'ri·cal·i·ty** (-kăl'ĭ·tĭ), *n.* — **sym·met'ri·cal·ly,** *adv.* — **sym·met'ri·cal·ness,** *n.*

symmetrical diphenyl-urea. = CARBANILIDE.

symmetrical lens. *Optics.* A compound objective consisting of two systems which are identical but oppositely placed.

symmetric, *or* **symmetrical, anticline.** *Geol.* See ANTICLINE, 1.

symmetric square matrix *or* **determinant.** *Math.* A square matrix or determinant of which the element in the *r*th row and *s*th column equals the element in the *s*th row and *r*th column where *r* and *s* may take any integral values from 1 up to the order of the matrix or determinant.

sym'me·trist (sĭm'ē·trĭst), *n.* One studious of symmetry.

sym'me·trize (sĭm'ē·trīz), *v. t.;* SYM'ME·TRIZED (-trīzd); SYM'ME·TRIZ'ING (-trĭz'ĭng). [Cf. F. *symétriser.*] To make symmetrical; to reduce to symmetry. — *v. i.* To have symmetry. *Rare.* — **sym'me·tri·za'tion** (-trĭ·zā'shŭn; -trĭ·zā'shŭn), *n.*

sym'me·troid (sĭm'ē·troid), *n.* [See SYMMETRY; -OID.] *Math.* A quartic rational surface with ten double points whose equation is obtained by equating to zero a symmetric determinant of the fourth order whose elements are linear functions of the homogeneous co-ordinates of the points of space.

sym'me·tro·pho'bi·a (sĭm'ē·trō·fō'bĭ·ȧ), *n.* [NL. See SYMMETRY; -PHOBIA.] Aversion to symmetry; also, a characteristic asymmetry in ancient Egyptian architecture, Japanese design, etc., implying such an aversion.

sym'me·try (sĭm'ē·trĭ), *n.* [F. or L.; F. *symmétrie* (now *symétrie*), fr. L. *symmetria*, fr. Gr. *symmetria*, fr. *syn* with, together + *metron* a measure. See SYN-; METER rhythm.] **1.** *Now Rare.* **a** Mutual relationship of parts, as in size, arrangement, measurements, etc.; proportion. **b** Due or balanced proportions; beauty of form or arrangement arising from such harmony. "With order, *symmetry,* and taste unblest." *Burns.* **c** A beautifully proportioned body. "What immortal hand or eye could frame thy [the tiger's] fearful *symmetry?*" *Blake.* **d** Conformity; consistency; congruity.
2. Correspondence in size, shape, and relative position of parts that are on opposite sides of a dividing line or median plane or that are distributed about a center or axis; in a body, a design, a grouping, etc., an arrangement or external form marked by bilateral conformity, geometrical regularity, or the like. See BILATERAL SYMMETRY, RADIAL SYMMETRY, ZONAL SYMMETRY.

syl·ves'tri·al, *adj.* Sylvestral. *Obs.*
syl'vic ac'id (sĭl'vĭk). *Chem.* See ABIETIC.
Syl'vi·col'i·dae (sĭl'vĭ·kŏl'ĭ·dē), *n. pl.* [NL., fr. L. *sylva, silva,* forest + *colere* to inhabit + *-idae.*] *Zool.* Syn. of COMPSOTHLYPIDAE. — **syl·vic'o·line** (sĭl·vĭk'ō·lĭn; -īn), *adj.* [wood. *Obs.*]
syl·vic'o·list, *n.* A dweller in a
syl'vics. Var. of SILVICS.
syl'vi·cul'ture (sĭl'vĭ·kŭl'tŭr), *n.*, **syl'vi·cul'tur·al** (-kŭl'tŭr·ăl), **syl'vi·cul'tur·ist** (-ĭst), *n.*, etc. Vars. of SILVICULTURE, etc.
sy·mar'. Var. of CYMAR, SIMAR.
sym·bol'a·try (sĭm·bŏl'ȧ·trĭ), *n.* [Gr. *symbolon* symbol + *-latry.*] = SYMBOLOLATRY. *Rare.* — **sym·bol'a·trous** (-trŭs), *adj. R.*
sym·bol'ic·ly, *adv.* = SYMBOLICALLY. *Rare.*
sym'bol·ise. Var. of SYMBOLIZE.
Sym'ma·chus's (sĭm'ȧ·kŭs·ĭz) **ver'sion.** See VERSION.
sym·me'li·a (sĭ·mē'lĭ·ȧ), *n.* [NL., fr. *syn-* + *-melia.*] = SIRENOMELIA. — **sym·me'li·an** (-ăn), *adj. & n.* [cal. *Obs.*]
sym·met'ri·ous, *adj.* Symmetri-

3. *Cryst.* The arrangement of faces in a natural crystal resulting from the development of its molecular structure along definite lines or axes. Symmetry with respect to an axis is *binary, ternary, tetragonal,* or *hexagonal (senary).* A ***principal plane of symmetry*** is one that includes two or more like axes of symmetry. There are believed to be thirty-two possible ***groups of symmetry***, to which all crystals must belong. Five belong to the isometric system of crystallization, seven to the tetragonal system, etc. These groups are often named according to the typical form characterizing each, as the ***tetrahedral group*** and ***pyritohedral group*** of the isometric system, the ***sphenoidal group*** of the tetragonal system; also, according to a prominent mineral belonging to each, as the ***tetrahedrite type, pyrite type,*** etc. The ***triclinic system*** includes two groups, one of which has only centrosymmetry; the other, having neither plane, axis, nor center of symmetry, is the ***asymmetric system.***
4. *Math.* The property of having associated with each of its points P a second point P' such that the join of P and P' is bisected perpendicularly by a plane, line, or point; — said of a geometrical configuration.

-sym'me·try (-sĭm'ĕ·trĭ). A combining form of *symmetry,* as in:

bisymmetry	**holosymmetry**	**polysymmetry**
centrosymmetry	**merosymmetry**	**pseudosymmetry**
dissymmetry	**monosymmetry**	**tetartosymmetry**
hemisymmetry	**orthosymmetry**	**tetrasymmetry**

☞ Corresponding adjectives are formed in **-sym·met'ric** (-sĭ·mĕt'rĭk) and **-sym·met'ri·cal** (-rĭ·kăl).

sym·pal'mo·graph (sĭm·păl'mō·grăf), *n.* [Gr. *syn* together, with + *palmos* vibration (fr. *pallein* to shake) + *-graph.*] An instrument for the graphical composition of two harmonic motions, consisting of a pendulum free to vibrate about two horizontal axes with different periods of oscillation by adjustment of which its bob is made to describe the Lissajous figures. Cf. HARMONOGRAPH.

sym'pa·thec'to·my (sĭm'pə·thĕk'tō·mĭ), *n.* [*sympathetic* + *-ectomy.*] The surgical removal of a sympathetic ganglion or other part of the sympathetic nervous system, as about a blood vessel. — **sym'pa·thec'to·mize** (-mīz), *v. t.*

sym'pa·thet'ic (sĭm'pə·thĕt'ĭk), *adj.* [NL. *sympatheticus,* fr. Gr. *sympathētikos.* See SYMPATHY; cf. PATHETIC.]
1. Operating, operative, or produced, through sympathy (sense 1); deriving its existence, character, potency, or the like, from real or imputed (sometimes, occult) affinity, association, or interdependence.
2. As a quality of things: **a** Consonant with one's mood, disposition, etc.; congenial. "Sad to your *sympathetic* scenes I fly." *Burns.* **b** Of such a character, quality, or kind as to give gratification, delight, etc.; — often with *to;* as, the new poetry is not *sympathetic* to the Tennysonians.
3. Feeling, or inclined to feel, sympathy; sensitive to, or affected by, the emotions of another or others; sympathizing; as, a *sympathetic* friend or audience; also, pertaining to, manifesting, arising from, or expressive of, sympathy; as, *sympathetic* tears, movements, or resolutions.
4. Favorably inclined or disposed; — with *to* or *toward;* as, he was *sympathetic* to the suggestion. *Colloq.*
5. Characterized by empathy, or comprehension of others' mental states or processes; as, *sympathetic* imagination.
6. *Anat.* Pertaining to, or connected with, the sympathetic nervous system.
7. *Music & Acoustics.* Produced by means of sympathetic vibration, as from a resonator or resonance cavity; as, *sympathetic* notes, tones, or sounds; also, so tuned as to sound by sympathetic vibration, rather than by being struck, plucked, or bowed; serving to resonate; as, a *sympathetic* string.
Syn. and **Ant.** — See CONGENIAL.

sym'pa·thet'ic, *n.* 1. Short for SYMPATHETIC NERVOUS SYSTEM, SYMPATHETIC NERVE, etc.
2. A sympathetic person or thing; specif., one easily hypnotized.

sym'pa·thet'i·cal (sĭm'pə·thĕt'ĭ·kăl), *adj.* Sympathetic. *Now Rare.*

sym'pa·thet'i·cal·ly, *adv.* In a sympathetic manner or mood; by reason of sympathy, esp. of counteraction, consonance, interdependence, etc.; as, to write *sympathetically;* the crisis must *sympathetically* affect all nations.

sympathetic clock. A clock synchronized from a master clock.

sympathetic ink. A fluid for invisible writing to be made visible afterwards, as a weak infusion of nutgalls (made black by ferrous sulphate solution), or almost any colorless vegetable juice (made visible by pressing with a hot iron).

sym'pa·thet'i·cism (sĭm'pə·thĕt'ĭ·sĭz'm), *n.* Incliination, esp. excessive inclination, to sympathy.

sympathetic magic. See MAGIC, *n.,* 1.

sympathetic nerve. *Anat.* Any nerve of the sympathetic nervous system; esp., one of the main gangliated cords.

sympathetic nervous system. *Anat. & Physiol.* **a** One of the two systems composing the autonomic nervous system; — opposed to *parasympathetic nervous system.* See AUTONOMIC NERVOUS SYSTEM. **b** Sometimes, the entire autonomic nervous system.

sympathetic ophthalmia. *Med.* Inflammation in the second, uninjured eye, following as a result of injury and inflammation of the first.

sym'pa·thet'i·co·to'ni·a (sĭm'pə·thĕt'ĭ·kō·tō'nĭ·ə), *n.* [NL.] *Med.* Sympathicotonia. — **sym'pa·thet'i·co·ton'ic** (-tŏn'ĭk), *adj.*

sympathetic powder. *Alchemy.* A powder supposed to be a sovereign cure for a wound, even if applied merely to blood from it or to the weapon which inflicted it.

sympathetic strike. A strike in which the strikers make no demands on their own employers, but try to bring pressure against the employers of other workers on strike.

sympathetic system. = SYMPATHETIC NERVOUS SYSTEM.

sympathetic vibration. *Physics.* A vibration produced in one body by the vibrations of exactly the same period in a neighboring body. One body, as a rule, sends out waves, which, being absorbed by the other, cause it to vibrate.

sym'pa·thet'o·blast (sĭm'pə·thĕt'ō·blăst), *n.* [*sympathetic* + *-blast.*] *Embryol.* A cell destined to become a cell in a sympathetic ganglion.

sym·path'i·co- (sĭm·păth'ĭ·kō-). *Anat. & Med.* A combining form of *sympathic,* as in **sym·path'i·co·trip'sy.**

sym·path'i·co·to'ni·a (sĭm·păth'ĭ·kō·tō'nĭ·ə), *n.* [NL., fr. *sympathico-* + *-tonia.*] *Med.* A condition characterized by excessive tone in the sympathetic nervous system, tendency to vascular spasm, and abnormally high blood pressure. — **sym·path'i·co·ton'ic** (-tŏn'ĭk), *adj.*

sym'pa·thism (sĭm'pə·thĭz'm), *n.* [See SYMPATHY; -ISM.] Presence of like sensations or emotions in two or more persons; also, occultly, their transfer; hence, hypnotic suggestibility. — **sym'pa·thist** (-thĭst), *n.*

sym'pa·thize (sĭm'pə·thīz), *v. i.;* -THIZED (-thīzd); -THIZ'ING (-thīz'ĭng). [F. *sympathiser.* See SYMPATHY.] *Intransitive:* **1.** To suffer or be affected through affinity, association, interdependence, etc.; to react or respond in sympathy; as, a good eye often *sympathizes* with the diseased eye.

The thing of courage,
As rous'd with rage, with rage doth *sympathize.* *Shak.*

2. To be in keeping, accord, harmony, or agreement; to be like; to resemble as in nature or disposition.

Growing coarse to *sympathize* with clay. *Tennyson.*

3. To share in suffering, grieving, etc.; to experience compassion, pity, etc.; to commiserate; also, to express such sympathy; — often followed by *with;* as, to *sympathize* with a friend in trouble.
4. To be in sympathy intellectually; to understand through fellow feeling; to be favorably impressed; as, to *sympathize* with one's insurgency; to *sympathize* with a proposal or party.
——, *Transitive: Obs.* **a** To answer to; to correspond to; match. **b** To represent, express, conceive or contrive with sympathetic imagination or art. **c** To experience in common. *Shak.*

sym'pa·thiz'er (-thīz'ĕr), *n.* One who sympathizes; that which acts or reacts in sympathy; as, the radical politicians and their *sympathizers* among the people at large.

sym'pa·thiz'ing (-thīz'ĭng), *adj.* That sympathizes. — **sym'pa·thiz'ing·ly,** *adv.*

sym'pa·tho·mi·met'ic (sĭm'pə·thō·mĭ·mĕt'ĭk; -mī-), *adj.* [*sympathetic* + *mimetic.*] *Physiol.* Capable of affecting sympathetic nerve endings; — said esp. of a series of amines closely related to adrenaline.

sym'pa·thy (sĭm'pə·thĭ), *n.; pl.* -THIES (-thĭz). [L. *sympathia,* fr. Gr. *sympatheia,* fr. *syn* with + *pathos* suffering, passion; cf. F. *sympathie.* See SYN-; PATHOS.] **1.** An affinity, association, or relationship between things so that whatever affects one, similarly affects the other or others; mutual or reciprocal susceptibility or a condition induced by it; hence, a reaction or response brought about by such relationship; as, the physician must recognize the *sympathy* between heart and lungs; wheat fell today on the market in *sympathy* with cotton.
2. Fitting or agreeable correspondence in qualities, properties, etc.; consonance; harmony.

Sympathy in years, manners, and beauties. *Shak.*

3. Reciprocal liking and understanding arising from community of interests, aims, etc., and compatibility of temperaments or dispositions; mutual affection and comprehension; a bond of good will; — opposed to *antipathy;* as, *sympathy* between classes is essential to the nation's welfare; there can be no happy marriage without *sympathy.*
4. The act or capacity of entering into or sharing the feelings, interests, etc., of another; the character or fact of being sensitive to or affected by others' (or another's) emotions, experiences, or esp. sorrows; also, the feeling or mental state so induced; specif., compassion; pity; as, one incapable of *sympathy;* to have *sympathy* for the poor or with one in trouble; to seek *sympathy* from a friend.

The early overture also, and certain still earlier compositions, partly vocal, partly instrumental, were called *symphonies.* The classical symphony was developed from the overture, chiefly by Haydn, and brought to its highest expressiveness and power by Beethoven, who also replaced the minuet movement with the scherzo. In a few modern symphonies there are movements for a chorus, as the final movement of Beethoven's ninth symphony, which is called the *choral symphony.* **e** A work of similar proportions for organ. **f** Short for SYMPHONY ORCHESTRA.
5. *Painting.* Consonance or harmony of color, or a picture marked by such.

symphony concert. A concert by a symphony orchestra.

symphony orchestra. *Music.* A large orchestra with well-proportioned instrumentation presenting programs usually made up of symphonic works and other compositions of serious artistic worth. See ORCHESTRA, 5.

Sym'pho·ri·car'pos (sĭm'fō·rĭ·kär'pōs), *n.* [NL., fr. Gr. *symphoros* accompanying (fr. *syn* with + *pherein* to bear) + *karpos* fruit; — so named in allusion to the clustered berries.] *Bot.* **a** A small genus of North American shrubs of the honeysuckle family (Caprifoliaceae), the snowberries, having bell-shaped flowers in axillary racemes, succeeded by fleshy, white or red, two-seeded berries. Several species, as *S. albus,* are cultivated for ornament. **b** [*not cap.*] A plant of this genus.

sym'pho·ri·car'pous (-pŭs), *adj. Bot.* Bearing clustered fruits. *Rare.*

sym'phrase (sĭm'frāz), *n.* [*sym-* + *phrase.*] *Gram.* A composite word formed by running a word group into one.

sym'phro·nis'tic (sĭm'frō·nĭs'tĭk), *adj.* [Gr. *symphronein* to agree with.] Intellectually identical. *Carlyle.*

sym'phy·an'ther·ous (sĭm'fĭ·ăn'thĕr·ŭs), *adj.* [Gr. *symphyēs* growing together + *anther* + *-ous.*] *Bot.* Synantherous.

sym'phy·car'pous (-kär'pŭs), *adj.* [Gr. *symphyesthai* to grow together + *-carpous.*] Having confluent fruits; — applied to the apothecia in some lichens. *Rare.*

Sym'phy·la (sĭm'fĭ·lə), *n. pl.* [NL., fr. *sym-* + Gr. *phylē* a clan.] A group of arthropods, usually considered a distinct class, including *Scolopendrella.* — **sym'phy·lan** (-lăn), *n.* — **sym'phy·lous** (-lŭs), *adj.*

sym·phyl'lous (sĭm·fĭl'ŭs), *adj.* Having the parts of the perianth joined together; gamophyllous.

sym'phy·note (sĭm'fĭ·nōt), *adj.* [Gr. *symphyēs* growing together + *nōton* the back.] *Zool.* Having the valves cemented together at the back, as the shells of some freshwater mussels.

sym'phy·o·gen'e·sis (sĭm'fĭ·ō·jĕn'ĕ·sĭs), *n.* [NL., fr. Gr. *symphyesthai* to grow together + *-genesis.*] *Bot.* Development of an organ by the union of previously distinct organs. — **sym'phy·o·ge·net'ic** (-jĕ·nĕt'ĭk), *adj.*

sym'phy·o·stem'o·nous (-stĕm'ō·nŭs; -stē'mō·nŭs), *adj.* [Gr. *symphyesthai* to grow together + *-stemonous.*] *Bot.* Monadelphous. *Obs.*

sym·phys'e·al (sĭm·fĭz'ē·ăl), *adj. Anat.* Pertaining to symphysis; also, pertaining to a mesial position between elements commonly in symphysis.

sym'phy·se·ot'o·my (sĭm'fĭ·zē·ŏt'ō·mĭ), *n.* [NL. *symphysis pubis* + Gr. *temnein* to cut.] *Surg.* The operation of dividing the symphysis pubis to facilitate childbirth; — formerly called the *Sigaultian section.*

sym·phys'i·on (sĭm·fĭz'ĭ·ŏn), *n.* [NL.] **a** The upper end of the symphysis of the jaw, at the outer surface. See CRANIOMETRY, *Illust.* **b** The middle point in the upper border of the pubic arch.

sym'phy·sis (sĭm'fĭ·sĭs), *n.; pl.* -SES (-sēz). [NL., fr. Gr. *symphysis* symphysis (in sense 1), fr. *symphyein* to make to grow together, fr. *syn* with + *phyein* to cause to grow, to grow.] **1.** *Anat. & Zool.* **a** Immovable or more or less movable articulation of certain bones in the median plane of the body, esp. that of the two halves of the lower jaw (‖*sym'phy·sis men'ti* [mĕn'tĭ]) at the chin, and of the two pubic bones at the lower anterior point of the abdomen (‖*sym'phy·sis pu'bis* [pū'bĭs], or *pubic symphysis*). **b** An articulation of this kind, in which the bony surfaces are connected by pads of fibrocartilage without a synovial membrane, as the joints between the bodies of vertebrae.
2. *Bot.* Coalescence.

sym'phy·so·dac·tyl'i·a (-sō·dăk·tĭl'ĭ·ə), *n.* [NL., fr. Gr. *symphysis* fusion + *daktylos* finger.] *Anat.* Fusion of two or more fingers or toes.

sym'phy·sy (sĭm'fĭ·sĭ), *n.* [See SYMPHYSIS.] Fusion or coalescence of parts of a body. *Rare.*

sym·phyt'ic (sĭm·fĭt'ĭk), *adj.* [Gr. *symphytikos.* See SYMPHYSIS.] Of, pertaining to, or manifesting symphysy or symphysis; formed by fusion.

sym·phyt'i·cal·ly (-ĭ·kăl·ĭ), *adv.* of SYMPHYTIC.

sym'phy·tism (sĭm'fĭ·tĭz'm), *n.* [Gr. *symphytos* grown together.] Coalescence. *Rare.*

sym'phy·tize (-tīz), *v. i.* To coalesce. *Rare.*

Sym'phy·tum (sĭm'fĭ·tŭm), *n.* [NL., fr. *sym-* + *-phytum.*] *Bot.* A genus of Old World perennial herbs of the borage family (Boraginaceae), having coarse, hairy, entire leaves, yellow, blue, or purple flowers in one-sided racemes, and four obliquely ovoid nutlets. *S. officinale,* the comfrey,

---

sym'mist, *n.* [ML. *symmista,* fr. L. *symmysta,* fr. Gr. *symmystēs.* See SYN-; MYSTERY.] A fellow initiate. *Obs.*

sym·mor'phic, *adj.* See SYN-; -MORPHIC. — **sym·mor'phism,** *n.*

sym'pa·thet·ec'to·my, *n.* = SYMPATHECTOMY.

sym'pa·thet·ic'i·ty, *n.* See -ITY.

sym'pa·thet'ic·ness, *n.* See -NESS.

sym·path'ic, sym·path'i·cal, *adj.* = SYMPATHETIC. — **sym·path'i·cal·ly,** *adv. Obs.*

sym·path'i·co·blast' (sĭm·păth'ĭ·kō·blăst'), *n.* [*sympathico-* + *-blast.*] = SYMPATHETOBLAST.

sym'pa·thise, sym'pa·this'er. VARS. OF SYMPATHIZE, SYMPATHIZER.

sym·path'o·blast (sĭm·păth'ō·blăst), *n.* = SYMPATHETOBLAST.

sym·pel'mous (sĭm·pĕl'mŭs). Var. of SYNPELMOUS.

Sym'pha·lan'gus, *n.* [NL. See SYN-; PHALANX.] *Zool.* See GIBBON.

sym'phe·nom'e·na (sĭm'fē·nŏm'ē·nə), *n. pl.* [Gr. *symphainomena,* pres. part. pl. neut. of *symphainesthai* to appear together.] See SYN-. — **sym'phe·nom'e·nal** (-năl), *adj. Both Rare.*

sym'phil·ism, *n.* = SYMPHILY.

sym'pho·ner, *n.* A player; a musician. *Obs.*

sym'pho·ni'a·cal, sym·phon'i·cal, *adj.* Harmonious. *Obs.*

sym·phys'i·al (sĭm·fĭz'ĭ·ăl), **sym·phys'i·an** (-ăn), *adj. Both Rare.*

PHYSEAL. [PHYTIC.]

sym·phys'ic (-ĭk), *adj.* = SYMPHYSEAL.

sym'phys·i·ot'o·my (sĭm'fĭz·ĭ·ŏt'ō·mĭ), **sym'phy·sot'o·my** (sĭm'fĭ·zŏt'ō·mĭ), *n.* = SYMPHYSEOTOMY.

Sym'phy·ta (sĭm'fĭ·tə), *n. pl.* [NL., fr. *sym-* + *-phyta.*] Syn. of CHALASTROGASTRA.

---

and *S. asperrimum*, the rough comfrey, are both naturalized in North America.

sym'pi·e·som'e·ter, sym'pi·e·zom'e·ter (sĭm'pĭ·ē·zŏm'ē·tĕr), *n.* [Gr. *sympiesis* compression (fr. *sympiezein* to press together, fr. *syn* with + *piezein* to press, squeeze) + *-meter*.] **1.** A sensitive barometer, in which atmospheric pressure acting on a liquid, as oil, in the lower part, compresses an elastic gas in the upper. It is convenient for use at sea, but not so accurate as the mercurial barometer.

2. An apparatus consisting of two Pitot tubes with mouths pointed opposite ways, joined at their upper ends by an inverted U tube. When this apparatus is placed in a flowing stream the difference of levels in the tubes measures the pressure. Cf. PITOMETER.

Sympiesometer. *BC*, oil; *AB*, hydrogen; *pq*, scale, which must be adjusted by the auxiliary scale *rs* to the temperature indicated by the thermometer *tv*.

sym'plasm (sĭm'plăz'ŭm), *n.* [*sym-* + *-plasm*.] *Biol.* The whole system of animate nature regarded as an entity in that its members are genetically related and continuous in time.

sym·plec'tic (sĭm·plĕk'tĭk), *adj.* [Gr. *symplektikos* plaiting together, fr. *symplekein* to plait together.] **1.** *Petrog.* Designating or relating to an intergrowth of two different minerals, as found in ophicalcite, myrmekite, micropegmatite, etc.

2. *Zool.* Designating a bone between the hyomandibular and the quadrate in the mandibular suspensorium of many fishes, uniting the other bones of the suspensorium.

sym·plec'tic, *n.* The symplectic bone.

Sym·pleg'a·des (sĭm·plĕg'ä·dēz), *n. pl.* [L., fr. Gr. *Symplēgades*, lit., striking together.] **1.** *Gr. Myth.* Two rocks at the entrance of the Black Sea, which dashed against each other at intervals, but became fixed when the ship Argo passed between.

2. Hence, a course steered between parties or forces in imminent danger of clashing.

sym'ple·site (sĭm'plē·sīt), *n.* [*sym-* + Gr. *plēsiazein* to be or come near; — from its association with other minerals.] *Mineral.* A hydrous iron arsenate, occurring in small blue to bluish-green monoclinic crystals and in radiated aggregates. H., 2.5. Sp. gr., 3.

Sym'plo·car'pus (sĭm'plō·kär'pŭs), *n.* [NL., fr. Gr. *symplokos* entwined + *-carpus*.] *Bot.* A genus of ill-smelling swamp herbs (family Araceae) consisting of a single species, *S. foetidus*, the skunk cabbage. Syn. *Spathyema*.

sym'plo·ce (sĭm'plō·sē), *n.* [LL., fr. Gr. *symplokē* an interweaving, fr. *symplekein* to twine together, fr. *syn* + *plekein* to twine.] *Rhet.* The repetition of a word or phrase at the beginning and another at the end of successive clauses, a figure combining anaphora and epistrophe (*Justice* came down from heaven to view *the earth; Justice* returned to heaven, and left *the earth*).

sym·plo'ci·um (sĭm·plō'shĭ·ŭm; -sĭ·ŭm), *n.* [NL. See SYMPLOCE.] The annulus of a fern sporangium. *Obs.*

Sym'plo·cos (sĭm'plō·kŏs), *n.* [NL., fr. Gr. *symplokos* interwoven. See SYMPLOCE.] *Bot.* A large genus of trees and shrubs constituting a family, **Sym'plo·ca'ce·ae** (-kā'sē·ē), of the order Ebenales. They have flowers with the calyx tube adnate to the 5-celled ovary (which becomes a fleshy indehiscent fruit) and numerous stamens inserted on the corolla. The species are widely distributed in all continents except Europe and Africa. *S. tinctoria* is the sweetleaf.

sym'pode (sĭm'pōd), *n.* A sympodium.

sym·po'di·al (sĭm·pō'dĭ·ăl), *adj.* **1.** *Bot.* **a** Characteristic of, or simulating, a sympodium. **b** Cymose. See INFLORESCENCE.

2. Shifting in line of direction or development in the manner of a sympodium; — applied esp. to social phenomena. —**sym·po'di·al·ly,** *adv.*

sym·po'di·um (sĭm·pō'dĭ·ŭm), *n.*; *pl.* -DIA (-ä). [NL., fr. *sym-* + *-podium*.] *Bot.* An apparent main axis not developed from a terminal bud, but made up of successive secondary axes, each of which represents one fork of a dichotomy, the other being of weaker growth or suppressed entirely as in the grapevine; a pseudaxis. Cf. MONOPODIUM; see DICHOTOMY, 4.

Diagrams showing, *A* Scorpioid, and *B* Helicoid, Dichotomy. 1, 1 Sympodia.

Gr. *symptōma* anything that has befallen one, a chance, casualty, symptom, fr. *sympiptein* to fall together, fr. *syn* with + *pipteein* to fall; akin to Gr. *petesthai* to fly. See SYN-; FEATHER. Cf. ASYMPTOTE.] **1.** *Med.* Any perceptible change in the body or its functions, either subjective or objective, which indicates disease, or the kind or phases of disease; as, we study disease in the *symptoms* exhibited. Cf. SIGN, n., 15.

2. A sign or token; that which indicates the existence of something else; as, vice is a *symptom* of weakness.

Syn. — Mark, note, indication.

symp'to·mat'ic (-tō·măt'ĭk), *adj.* [F. *symptomatique*, fr. Gr. *symptōmatikos* casual.] **1.** *Med.* Constituting a symptom of disease; indicative of the presence of a particular disease or disorder; as, *symptomatic* of epilepsy; of a disease or affection, attendant upon and resulting from a primary diseased or morbid condition.

2. According to or concerned with symptoms; as, a *symptomatic* treatment.

3. Of the nature of a symptom or sign; characteristic; indicative; as, his behavior was *symptomatic* of his character; also, incorrectly, emblematic.

Symptomatic of a shallow understanding. *Macaulay.*

symp'to·mat'i·cal (-ĭ·kăl), *adj.* Symptomatic.—**symp'to·mat'i·cal·ly,** *adv.*

symp'to·mat'ics (-ĭks), *n.* See -ICS. Symptomatology.

symp'tom·a·tize (sĭmp'tŭm·ä·tīz), *v. t. & i.* [Gr. *symptōma*, *symptōmatos*, symptom + *-ize*.] To serve as a symptom (of); to be symptomatic.

symp'tom·a·tol'o·gy (-tŏl'ō·jĭ), *n.* [NL. *symptomatologia*, fr. Gr. *symptōma*, *symptōmatos*, symptom + *-logia*. See SYMPTOM; -LOGY.] *Med.* The doctrine of symptoms; that part of medical science treating of symptoms of diseases; semeiology; also, the symptoms of a disease in a given case taken as a whole. Cf. DIAGNOSIS, 1; PROGNOSIS, 2. — **symp'to·mat'o·log'i·cal** (-tō·măt'ō·lŏj'ĭ·kăl), *adj.* — **symp'to·mat'o·log'i·cal·ly,** *adv.*

symptom complex. *Med.* A group of symptoms occurring together and characterizing a particular disease or morbid state; a syndrome.

symp·to'sis (sĭmp·tō'sĭs), *n.* [NL., fr. Gr. *symptōsis* collapse.] *Med.* The gradual emaciation of the body or wasting of any part.

syn- (sĭn-). **1.** A prefix, Greek *syn-*, from *syn*, meaning *with, along with, together, at the same time*, as in *synchronize*, *synthesis*; also, *concurrent, associated, like*, as in *synalgia*, *synesthesia*, *synonym*, *syntax*. *Syn-* becomes *sym-* before *p, b*, and *m*, and *syl-* before *l*.

2. *Chem.* A prefix indicating in certain cases of stereoisomerism that certain groups or atoms are on the same side of the molecule, as in *synbenzaldoxime* (see BENZALDOXIME). Cf. 2d ANTI- 1.

syn·ac'me (sĭ·năk'mē), **-my** (-mĭ), *n.* [NL. *synacme*. See SYN-; ACME.] Synanthesis. — **syn·ac'mic** (-mĭk), *adj.*

syn·ac'tic (-tĭk), *adj.* [Gr. *synagein* to bring together.] Acting together; cumulative in effect.

syn'a·del'phite (sĭn'ä·dĕl'fīt), *n.* [Gr. *synadelphos* one that has a brother; — from its association with other minerals.] *Mineral.* An aluminum manganese phosphate, occurring in black prismatic crystals and grains. H., 4.5. Sp. gr., 3.5.

syn·aer'e·sis, syn·er'e·sis (sĭ·nĕr'ē·sĭs *or, esp. Brit.*, sĭ·nēr'-), *n.* [NL., fr. Gr. *synairesis* a taking or drawing together, fr. *synairein* to take together, fr. *syn* with + *hairein* to take, to grasp. See SYN-; HERESY.] **1.** *Physical Chem.* The separation of liquid from a gel, caused by contraction.

2. *Pros.* **a** The union, or drawing together into one syllable, of two like vowels ordinarily separated in pronunciation (*seest* for seëst); — the opposite of *diaeresis*. **b** Also, often, synizesis.

syn'a·gog'i·cal (sĭn'ä·gŏj'ĭ·kăl), *adj.* Also **syn'a·gog'al** (sĭn'ä·gŏg'ăl). Of or pertaining to a synagogue.

syn'a·gogue (sĭn'ä·gŏg; 185), *n.* [OF. *sinagoge* (F. *synagogue*), fr. LL. *synagoga*, fr. Gr. *synagōgē* a bringing together, an assembly, a synagogue, fr. *synagein* to bring together, fr. *syn* with + *agein* to lead. See SYN-; AGENT.] **1.** *Jewish Relig.* **a** Anciently, a Jewish local community under religious and more or less civil jurisdiction; now, a local assembly of Jews organized chiefly for public worship. **b** The building or place of assembly used by Jewish communities primarily for religious worship. **c** The Jewish religion or communion. **d** [*cap.*] *Jewish Antiq.* See ANSHE KENESETH HAGGEDOLAH.

3. A heretical group or body; a false religion or form of worship; — in allusion to *synagogue of Satan* (*Rev.* ii. 9.). *Now Rare.*

syn'al·lac'tic (sĭn'ä·lăk'tĭk), *adj.* [Gr. *synallaktikos*, fr. *synallassein* to reconcile.] Conciliatory. *Rare.*

syn'al·lag·mat'ic (sĭn'ä·lăg·măt'ĭk), *adj.* [Gr. *synallagmatikos*, fr. *synallagma* a mutual agreement, fr. *synallassein* to exchange, negotiate with, fr. *syn* with + *allassein* to change]. *Civil Law.* Imposing reciprocal obligations; bilateral; as, a *synallagmatic* contract.

syn'a·loe'pha, syn'a·le'pha (-ä·lē'fä), *n.* Also **syn'a·le'phe.** [L. *synaloepha*, fr. Gr. *synaloiphē*, fr. *synaleiphein* to melt together, fr. *syn* with + *aleiphein* to besmear.] *Gram.* The blending into one syllable of two vowels of adjacent syllables, as by crasis, synaeresis, synizesis, elision, etc.; esp., a contraction of syllables by obscuring or suppressing a vowel or diphthong at the end of a word, before another vowel or diphthong (*th' army*, for *the army*).

syn'a·nas'to·mo'sis (sĭn'ä·năs'tō·mō'sĭs), *n.* [NL., fr. *syn-* + *anastomosis*.] *Anat.* An anastomosis involving several vessels.

syn·an'gi·al (sĭ·năn'jĭ·ăl), *adj.* Also **syn·an'gic** (-jĭk). Of, pertaining to, or of the nature of, a synangium.

syn·an'gi·um (-ŭm), *n.*; *pl.* -ANGIA (-ä). [NL., fr. *syn-* + Gr. *angeion* a hollow vessel.] **1.** *Anat. & Zool.* The common trunk of origin of several arteries; in lower vertebrates, the terminal part of an arterial trunk.

2. *Bot.* The peculiar sorus in marattiaceous ferns. It is made up of sporangia variously united or coherent into a compound structure.

syn'an·tet'ic min'er·al (sĭn'ăn·tĕt'ĭk). *Petrog.* A mineral formed by the reaction of two other minerals, as kelyphite rims, coronas, etc.

syn'an·the'ma (sĭn'ăn·thē'mä), *n.* [NL., fr. Gr. *synanthein* to blossom together.] *Med.* A grouped papular eruption on the skin.

syn·an'ther·ol'o·gy (sĭ·năn'thĕr·ŏl'ō·jĭ), *n.* [NL. *Synantherae* the Compositae + *-logy*.] *Bot.* The study of composites (plants of the Carduaceae, Ambrosiaceae, and Cichoriaceae). — **syn·an'ther·o·log'i·cal** (-ō·lŏj'ĭ·kăl), *adj.* — — **syn·an'ther·ol'o·gist** (-ŏl'ō·jĭst), *n.*

syn·an'ther·ous (sĭ·năn'thĕr·ŭs), *adj.* [*syn-* + *anther*.] *Bot.* Having syngenesious anthers, as the flowers of composite plants.

syn'an·the'sis (sĭn'ăn·thē'sĭs), *n.* [NL., fr. *syn-* + Gr. *anthēsis* bloom.] *Bot.* Simultaneous maturity of androecium and gynoecium. — **syn'an·thet'ic** (-thĕt'ĭk), *adj.*

syn'an·thous (sĭ·năn'thŭs), *adj.* [*syn-* + Gr. *anthos* flower.] *Bot.* **a** Exhibiting synanthy. **b** Having flowers and leaves which appear at the same time.

syn·an'throse (-thrōs), *n.* [From *synanthrin*, a carbohydrate, fr. *Synantherae* the Compositae.] *Chem.* Levulin.

syn·an'thy (-thĭ), *n.* [See SYNANTHOUS.] *Bot.* Coalescence of normally separate flowers. — **syn·an'thic** (-thĭk), *adj.*

syn'a·phe'a (sĭn'ä·fē'ä), *n.* Also **syn'a·phe'ia** (-fē'yä; -fī'ä). [NL., fr. Gr. *synapheia* combination, union.] *Greek Pros.* Continuous metrical regularity, esp. in a group of anapaestic verses.

syn·ap'o·se·mat'ic (sĭ·năp'ō·sē·măt'ĭk), *adj.* [*syn-* + Gr. *aposēmainein* to indicate by signs.] *Biol.* Designating protective mimicry in which defenseless species resemble others having special means of defense.

syn·apse' (sĭ·năps'), *n.* [Gr. *synapsis* conjunction, union.] *Physiol.* **a** The locus at which the nervous impulse passes from the axon of one neuron to the dendrites of another. There appears to be an actual boundary between the two nerve fibers at this point, possibly only a surface of contact. The synapse is the polarizing and selective element typical of most of the nervous systems of the higher animals. The momentary state of a synapse determines whether or not a nervous impulse shall pass through it to the next neuron. **b** The function of affording such communication between neuron processes. — **syn·apse',** *v. i.*

Syn·ap'si·da (sĭ·năp'sĭ·dä), *n. pl.* [NL., fr. *syn-* + Gr. *apsis*, *apsidos*, an arch.] *Zool. & Paleontol.* A subclass of reptiles with a single pair of lateral temporal openings in the skull, comprising the Theromorpha and Therapsida. The turtles, sometimes included, are generally classed among the Anapsida. — **syn·ap'si·dan** (-dăn), *adj. & n.*

syn·ap'sis (sĭ·năp'sĭs), *n.*; *pl.* SYNAPSES (-sēz). [NL. See SYNAPSE.] **1.** *Biol.* Conjugation of pairs of homologous chromosomes, of maternal and paternal origin respectively. It is the primary step in meiosis. Cf. SYNIZESIS.

2. *Physiol.* = SYNAPSE, *n.*

syn·ap'tase (sĭ·năp'tās; -tāz), *n.* [Gr. *synaptos* fastened together + *diastase*.] Emulsin.

syn·ap'te (sĭ·năp'tē), *n.*; *pl.* -TAI (-tī). [Gr. *synaptē*, fr. *synaptos* fastened together.] *East. Ch.* A form of supplication of the nature of a litany; — often translated *collect*. Cf. COLLECT, *n.*, 1; ECTENE.

syn·ap'ter·a (-tĕr·ä), *n. pl.* [NL., fr. *syn-* + *Aptera*.] *Zool.* A group nearly equiv. to Thysanura. — **syn·ap'ter·ous** (-ŭs), *adj.*

syn·ap'tic (sĭ·năp'tĭk), **syn·ap'ti·cal** (-tĭ·kăl), *adj.* Of or pertaining to a synapse or to synapsis. — **syn·ap'ti·cal·ly,** *adv.*

synaptic nervous system. *Anat. & Zoöl.* A system of neurons in functional contact with one another through synapses; — opposed to *nerve net*.

syn'ap·tic'u·lum (sĭn'ăp·tĭk'ū·lŭm), *n.*; *pl.* -TICULA (-lä). [NL., dim. fr. Gr. *synaptos* fastened together.] *Zool.* One of numerous conical or cylindrical calcareous processes which extend between, and unite, the adjacent septa of certain corals. — **syn'ap·tic'u·lar** (-lĕr), *adj.* — **syn'ap·tic'u·late** (-lāt), *adj.*

Syn·ap'to·sau'ri·a (sĭ·năp'tō·sô'rĭ·ä), *n. pl.* [NL., fr. Gr. *synaptos* fastened together + *-sauria*.] *Paleontol.* A subclass of reptiles with two dorsal temporal openings, but with a more specialized skull, lacking the supratemporals, interparietals, and tabulares. It comprises the Sauropterygia and Placodontia of the Mesozoic.

syn·ap'ty·chus (sĭ·năp'tĭ·kŭs), *n.* [NL.] *Paleontol.* An operculum of two parts united in the median line, as in some ammonites.

syn'ar·chy (sĭn'är·kĭ), *n.* [Gr. *synarchia*, fr. *synarchein* to rule jointly with.] Joint rule. — **syn·ar'chi·cal** (sĭ·när'kĭ·kăl), *adj.*

Syn·ar'mo·goi'de·a (sĭ·när'mō·goi'dē·ä), *n. pl.* [NL., fr. *Synarmogē*, fr. Gr. *synarmogē* a combination.] *Paleontol.* An extinct order of insects related to the Protorthoptera, known only from the Upper Carboniferous. — **syn·ar'mo·goid** (-när'mō·goid), *adj.*

syn'ar·te'sis (sĭn'är·tē'sĭs), *n.* [NL., fr. Gr. *synartēsis* a fastening together, fr. *synartan* to fasten together.] A fastening or knitting together; close union.

syn'ar·tete (sĭn'är·tēt), *adj.* [Gr. *synartan* to fasten together.] *Gr. & Lat. Pros.* Consisting of, or pertaining to, a succession of metrically continuous cola; — opposed to *asynartete*. — **syn'ar·tet'ic** (-tĕt'ĭk), *adj.*

syn'ar·thro'di·a (sĭn'är·thrō'dĭ·ä), *n.* [NL., fr. *syn-* + Gr. *arthron* joint + *eidos* form.] Synarthrosis. — **syn'ar·thro'di·al** (-dĭ·ăl), *adj.* — **syn'ar·thro'di·al·ly,** *adv.*

syn'ar·thro'sis (sĭn'är·thrō'sĭs), *n.*; *pl.* -SES (-sēz). [NL., fr. Gr. *synarthrōsis* a being jointed together, fr. *synarthroun* to link or joint together, fr. *syn* with + *arthron* a joint.] *Anat.* An immovable articulation in which the bones are united by intervening fibrous connective tissues.

syn·as'try (sĭ·năs'trĭ; sĭn'ăs·trĭ), *n.* [*syn-* + Gr. *astēr* a star.] Concurrence of starry position or influence upon two persons; hence, similarity of condition, fortune, etc., as prefigured by astrology.

syn'ax·a'ri·on (sĭn'ăk·sä'rĭ·ŏn; 79), *n.* Also **syn·ax'ar** (sĭ·năk'sär), **syn·ax'a·ry** (sĭ·năk'sä·rĭ). [NL. *synaxarion*, fr. Gr. *synaxarion* memoir of a saint, fr. *synaxis*. See SYNAXIS.] *Eastern Ch.* **a** A short narrative of the life of a saint or exposition of a feast taken from the menology and read after the sixth ode of the canon for the day. **b** A liturgical book containing such narratives.

syn·ax'a·rist (sĭ·năk'sä·rĭst), *n.* [See -IST.] The author of a synaxarion.

syn·ax'is (-năk'sĭs), *n.* [LL., fr. Gr. *synaxis*, fr. *synagein* to bring together. See SYNAGOGUE.] *Eccl.* A meeting; a congregation. Specif.: **a** In the early church, a religious service, esp. the celebration of the Eucharist. **b** *Eastern Ch.* A feast celebrated in a particular church. Cf. STATION, 5 **b**.

Syn·car'i·da (sĭn·kär'ĭ·dä), *n. pl.* [NL., fr. *syn-* + Gr. *karis*, *karidos*, a shrimp.] *Zool.* A division of malacostracan crustaceans with distinct thoracic segments, and no carapace, consisting of the Anaspidacea.

syn·car'pous (sĭn·kär'pŭs), *adj.* [*syn-* + *-carpous.*] *Bot.* **a** Having the carpels of the gynoecium united in a compound ovary; — opposed to *apocarpous.* **b** Pertaining to, or characteristic of, a syncarp.

syn'car·py (sĭn'kär·pĭ), *n. Bot.* Syncarpous state or quality.

syn·cat'e·gor'e·mat'ic (sĭn·kăt'ē·gôr'ē·măt'ĭk), **syn·cat'e·gor'e·mat'i·cal** (-ĭ·kăl), *adj.* [Gr. *synkatēgorematikos.* See SYN-; CATEGOREMATIC.] *Logic.* Not capable of standing alone as a name in a proposition; having significance only in conjunction with another word; as, a *syncategorematic* term; — opposed to *categorematic.*
— **syn·cat'e·gor'e·mat'i·cal·ly,** *adv.*

syn·cat'e·go·reme (sĭn·kăt'ē·gō·rēm; sĭn'kȧ·tĕg'ō·rēm), *n.* A syncategorematic term. *Rare.*

syn·ceph'a·lus (sĭn·sĕf'ȧ·lŭs), *n.* [NL., fr. *syn-* + *-cephalus.*] *Terat.* A twin fetus having the two heads fused. — **syn'ce·phal'ic** (sĭn'sē·făl'ĭk), *adj.*

syn·cer'e·brum (-sĕr'ē·brŭm), *n.* [NL., fr. *syn-* + *cerebrum.*] *Zool.* The brain consisting of several segments, as in insects or other arthropods. — **syn·cer'e·bral** (-brăl), *adj.*

syn'chon·dro'sis (sĭng'kŏn·drō'sĭs), *n.*; *pl.* -SES (-sēz). [NL., fr. Gr. *synchondrōsis,* fr. *syn,* with + *chondros* cartilage.] *Anat.* An immovable articulation in which the union is cartilaginous. — **syn'chon·dro'si·al** (-sĭ·ăl), *adj.* — **syn'chon·dro'si·al·ly,** *adv.*

syn'chon·drot'o·my (-drŏt'ō·mĭ), *n.* [Gr. *synchondrōsis* union by cartilage + *-tomy.*] *Surg.* Symphyseotomy.

syn'cho·re'sis (-kō·rē'sĭs), *n.* [NL., fr. Gr. *synchōrēsis,* fr. *syn* + *chōrēsis* a going.] *Rhet.* A concession made, esp. in order to retort with greater force.

syn'chro·mesh' (sĭng'krō·mĕsh'), *adj.* [*synchro*nous + *mesh.*] Designating a device by which synchronized shifting is accomplished. See SYNCHRONIZED SHIFTING. Also, designating a gear system using this device. — *n.* A synchromesh gear or gear system.

syn'chro·nal (sĭng'krō·năl), *adj.* Synchronous. — *n.* A synchronous thing or event.

syn'chrone (sĭng'krōn), *n.* [See SYNCHRONOUS.] *Math.* The curve connecting a series of particles falling simultaneously from the same point down the various members of a family of curves.

syn·chron'ic (sĭn·krŏn'ĭk), **syn·chron'i·cal** (-ĭ·kăl), *adj.* [Cf. F. *synchronique.*] Synchronous. — **syn·chron'i·cal·ly,** *adv.*

syn'chro·nism (sĭng'krō·nĭz'm), *n.* [NL. *synchronismus,* fr. Gr. *synchronismos,* fr. *synchronizein* to be contemporary with, fr. *synchronos* synchronous. See SYNCHRONOUS.] **1.** The quality or fact of being synchronous; concurrence of acts, events, movements, etc., in time; coincident existence; simultaneousness.
2. Chronological arrangement of historical events and personages, so as to indicate coincidence or coexistence; also, a table showing such concurrences.
3. *Art.* **a** A representation in the same picture of two or more events which occurred at different times. **b** Historical accuracy in detail in period architecture, decoration, etc.
4. *Motion Pictures.* Synchronized projection or operation.
5. *Nav. Arch.* The condition obtaining when a vessel's period is equal to one half the wave period.
6. *Physics.* The state of being synchronous.

syn'chro·nis'tic (sĭng'krō·nĭs'tĭk), *adj.* Pertaining to, manifesting, or involving, synchronism; synchronous. — **syn'chro·nis'ti·cal** (-tĭ·kăl), *adj.* — **syn'chro·nis'ti·cal·ly,** *adv.*

syn'chro·ni·za'tion (-nĭ·zā'shŭn; -nī·zā'shŭn), *n.* Act of synchronizing; concurrence of events in respect to time.

syn'chro·nize (sĭng'krō·nīz), *v.*; -NIZED (-nīzd); -NIZ'ING (-nīz'ĭng). [Gr. *synchronizein.*] *Intrans.:* To happen or take place at the same time or instant; to be synchronous; as, the child's birth *synchronized* with his father's death; the dancers' movements do not *synchronize;* the action and dialogue of the motion picture *synchronize* perfectly.
—, *Transitive:* **1.** To cause (events, acts, etc.) to be or to appear to be synchronous; to represent, arrange, tabulate, etc., so as to indicate coincidence or coexistence; as, to *synchronize* the bowing of the violinists or aggressive movements on all fronts; to *synchronize* the events of European history.
2. To cause to agree in time; to render synchronous in operation, etc.; to *synchronize* two alternating-current machines.
3. *Motion Pictures.* To add (sound effects or dialogue) in time and harmony with the action of a picture; to add such effects to (a picture).

syn'chro·nized shift'ing (-nīzd). In a motor vehicle, changing from one speed gear to another through a transmission employing a device, usually friction, by which both gears are brought to the same speed before the shift can be made.

syn'chro·niz'er (-nīz'ĕr), *n.* One who or that which synchronizes; specif., a device to indicate, produce, or maintain, synchronous motion, as a regulator for a system of clocks, etc.

syn·chron'o·graph (sĭn·krŏn'ō·grăf), *n.* [Gr. *synchronos* of the same time + *-graph.*] An automatic telegraph in which the alternating current which transmits the signals is regulated by a perforated paper ribbon traveling in synchronism with the generator.

syn'chro·nol'o·gy (sĭng'krō·nŏl'ō·jĭ), *n.* [*syn-* + Gr. *chronos* time + *-logy.*] Systematic arrangement of synchronous events. — **syn'chron·o·log'i·cal** (sĭng'krŏn·ō·lŏj'ĭ·kăl), *adj.*

syn'chro·nous (sĭng'krō·nŭs), *adj.* [LL. *synchronus,* fr. Gr. *synchronos,* fr. *syn* with + *chronos* time. Cf. CHRONICLE.] **1.** Happening, existing, or coming into existence, etc., at the same time; concurrent in time; contemporaneous; simultaneous; as, *synchronous* events, geological deposits, or storms, in various parts of the country.
2. Of successive movements, sounds, operations, etc., from two or more things marked by exact coincidence in time, rhythm, rate, or the like; as, the *synchronous* beating of drums.
3. Involving or exhibiting synchronism; as, a *synchronous* account of the World War.
4. *Physics.* Having the same period; also, having the same period and phase; as, *synchronous* vibrations.
Syn. — See CONTEMPORARY.
— **syn'chro·nous·ly,** *adv.* — **syn'chro·nous·ness,** *n.*

synchronous condenser. *Elec.* A synchronous phase advancer, usually an overexcited synchronous motor equipped with damping windings to facilitate starting and to prevent surging and hunting. So called because overexcited synchronous machines draw leading current from the line and thus act like an electrostatic condenser. Called also *rotary condenser.*

synchronous converter. *Elec.* A synchronous machine (which see) that converts from alternating to direct current, or vice versa; — called also *rotary converter.* When converting from alternating current the machine combines the action of a synchronous motor and direct-current generator. When converting from direct current it is commonly called an *inverted converter.* The ratio of the alternating and direct current voltages is fixed by the construction of the machine. Cf. FIELD-CONTROL CONVERTER.

synchronous curve. *Math.* = SYNCHRONE.

synchronous machine. *Elec.* A dynamoelectric machine whose normal operating speed is exactly proportional to the frequency of the current. It has a constant magnetic field and an armature which receives or delivers alternating current in synchronism with the motion of the machine, the frequency of the current being equal to the product of the number of pairs of poles and the speed of the machine in revolutions per second. Such a machine may be a generator, motor, or converter. See CONVERTER, 4; SYNCHRONOUS CONVERTER; ALTERNATOR; MOTOR, *n.*, 4.

synchronous motor. *Elec.* A motor (sense 4) having a speed strictly proportional to the frequency of the operating current.

synchronous speed. *Elec.* A definite speed for an alternating-current machine, dependent on the frequency of the supply circuit. The rotating member passes one pair of poles for each alternation of the alternating current.

synchronous telegraph. = MULTIPLE SYNCHRONOUS TELEGRAPH.

syn'chro·ny (sĭng'krō·nĭ), *n.* Synchronous occurrence; also, synchronistic arrangement or treatment.

syn'chro·scope (sĭng'krō·skōp), *n.* [*synchro*nism + *-scope.*] *Elec.* An instrument which indicates synchronism between two sources of alternating current and in addition shows whether the incoming source, usually a machine, is fast or slow.

syn'chy·sis (sĭng'kĭ·sĭs), *n.* [NL., fr. Gr. *synchysis,* fr. *syncheein* to confound.] **1.** A confusion, as of words in a sentence.
2. *Med.* Also **syn'chy·sis scin'til·lans** (sĭn'tĭ·lănz). = SPARKLING SYNCHYSIS.
— **syn·chit'ic** (sĭn·kĭt'ĭk), *adj.*

Syn·chyt'ri·um (sĭn·kĭt'rĭ·ŭm), *n.* [NL., fr. *syn-* + Gr. *chytrion,* dim. of *chytra* earthen pot.] *Bot.* A genus of pond-scum parasites typifying the family **Syn·chyt'ri·a'ce·ae** (-ā'sē·ē). *S.* (syn. *Chrysophylyctis*) *endobioticum* causes the wart disease of potatoes. See CHYTRIDIALES.

syn'cla·dous (sĭng'klȧ·dŭs), *adj.* [*syn-* + *-cladous.*] *Bot.* Having the branchlets tufted; — said of certain mosses.

syn·clas'tic (sĭn·klăs'tĭk), *adj.* [*syn-* + Gr. *klastos* broken, fr. *klan* to break.] *Math. Physics.* Curved toward the same side in all directions; — said of surfaces that in all directions around any point bend away from a tangent plane toward the same side, as the surface of a sphere; — opposed to *anticlastic.*

synclastic curvature. *Math.* Curvature of a cup-shaped surface whose tangent plane does not cut it at the point of contact; curvature where the indicatrix is an ellipse.

syn·cli'nal (sĭn·klī'năl; -n'l; sĭng'klĭ-), *adj.* [Gr. *synklinein* to incline together, fr. *syn* with + *klinein* to incline.]
1. Inclined down from opposite directions so as to meet.
2. *Geol.* Formed by strata dipping toward a common line (*synclinal axis, synclinal line*) or plane; as, a *synclinal* fold; — opp. to *anticlinal.* A downward flexure in folded rocks make a trough or syncline; the alternating upward flexure, an arch or anticline. — **syn·cli'nal·ly,** *adv.*

syn·cli'nal, *n.* = SYNCLINE.

synclinal valley. *Geol.* A valley produced by, or coinciding in position with, a synclinal fold.

syn'cline (sĭng'klīn), *n. Geol.* A synclinal fold.

syn·clin'i·cal (sĭn·klĭn'ĭ·kăl), *adj.* Synclinal.

syn'cli·no'ri·um (sĭng'klĭ·nō'rĭ·ŭm; 181), *n.* [NL., fr. Gr. *synklinein* to lay together + *oros* mountain.] *Geol.* A compound flexure of the earth's crust, like an inverted anticlinorium. — **syn'cli·no'ri·al** (-ăl), **-ri·an** (-ăn), *adj.*

syn·clit'ic (sĭn·klĭt'ĭk), *adj.* [See SYNCLINAL, *adj.*] Manifesting synclitism. — **syn·clit'i·cism** (-ĭ·sĭz'm), *n.*

syn'cli·tism (sĭng'klĭ·tĭz'm), *n.* [See SYNCLITIC.] *Obstetrics.* The condition of parallelism between the plane of the fetal head in its descent in labor, and the axis of the pelvis.

syn·coe'lom (sĭn·sē'lŏm), *n.* [*syn-* + *coelom.*] *Anat.* The serous cavities of the trunk taken collectively; the pleural, pericardial, and peritoneal, cavities, and that of the tunica vaginalis.

syn'co·pal (sĭng'kō·păl), *adj.* Of, pertaining to, or characterized by, syncope.

syn'co·pate (sĭng'kō·pāt), *v.*; SYN'CO·PAT'ED (-pāt'ĕd; -ĭd; 119); SYN'CO·PAT'ING (-pāt'ĭng). [LL. *syncopatus,* past part. of *syncopare* to syncopate, to swoon. See SYNCOPE.] *Transitive:* **1.** To contract by syncope; as, "Gloster" is a *syncopated* form of "Gloucester." Cf. SYNCOPE, *n.*, 1.
2. *Music.* To modify or affect by syncopation.
—, *Intransitive:* To manifest syncopation.

syn'co·pat'ed (-pāt'ĕd; -ĭd; 119), *adj.* Marked by or exhibiting syncopation; also, having a rhythm or quality suggestive of syncopated music.

syncopated counterpoint. *Music.* Counterpoint in which one note is added to each note of the cantus firmus after a fixed rhythmic interval.

syn'co·pa'tion (sĭng'kō·pā'shŭn), *n.* **1.** A syncopating; also, a rhythm, dance step, etc., in syncopated time.
Shoes scuffing *syncopations* on the cement sidewalk. *B. Tarkington.*
2. *Gram.* Syncope; also, a syncopated word.
3. *Music.* **a** A temporary displacement or shifting of the regular metrical accent. The commonest varieties of syncopation occur: (1) when a tone is begun on an unaccented beat and continued through the following accented beat (see *Illust.* **a**); (2) when a tone begins after the commencement of a beat and is continued into the following beat (see *Illust.* **b**). Syncopation may be effected also by a sforzando on a note not regularly accented, or by introducing a rest at the regular accent. **b** Ragtime or other dance music employing syncopation.

Syncopation.

syn'co·pa'tor (sĭng'kō·pā'tĕr), *n.* One who syncopates.

syn'co·pe (sĭng'kō·pē; -pĕ), *n.* [LL. *syncope, syncopa,* fr. Gr. *synkopē* a cutting up, a syncope; akin to Gr. *synkoptein* to beat together, to cut up, cut short, weary, fr. *syn* with + *koptein* to strike, cut. See CAPON.] **1.** The loss or elision of one or more sounds or letters, esp. a vowel or a syllable, from the middle of a word (*bat'tling,* băt'lĭng for *bat'ti·ling; ant* from *amete; ne'er* for *never; laundress* for *launderess*). Cf. SYNCOPATE, *v. t.*, 1; ELISION; HAPLOLOGY; HYPHAERESIS; SYNAERESIS, 2.
2. *Med.* A partial or complete temporary suspension of respiration and circulation due to cerebral anemia and char acterized by sudden pallor, coldness of the skin, and partial or complete unconsciousness; a fainting, or swooning.
3. *Music.* = SYNCOPATION, 3 **a**.
4. Literally, a pause or cessation; suspension; contraction. *Now Rare.*

syn'co·pe (sĭng'kō·pē; -pĕ), *v. i.* To be syncopated. *Rare.*

syn·cop'ic (sĭn·kŏp'ĭk), *adj.* Syncopal.

syn'co·pist (sĭng'kō·pĭst), *n.* One who syncopates, esp. a word. — **syn'co·pism** (-pĭz'm), *n. Both Rare.*

syn'co·pize (-pīz), *v. t. & i.* To syncopate; *Obs.*, to faint.

syn·cot'y·le'don·ous (sĭn·kŏt'ĭ·lē'dŭn·ŭs; -lĕd'ŭn-), *adj. Bot.* Having united cotyledons.

syn·cra'ni·ate (sĭn·krā'nĭ·āt), *adj. Zool.* Designating, or having, a skull with which certain vertebral elements are fused, as is considered to be the case in the skull of Amniota; — opposed to *archaecraniate.*

syn'cran·te'ri·an (sĭng'krăn·tē'rĭ·ăn), *adj.* Also **syn'cran·ter'ic** (-tĕr'ĭk). [*syn-* + Gr. *krantēres* wisdom teeth.] *Zool.* Having the teeth in a continuous row. Cf. DIACRANTERIAN.

syn'cra·sy (sĭng'krȧ·sĭ), *n.* [Gr. *synkrasis.*] A blending or combining of different things.

syn·cret'ic (sĭn·krĕt'ĭk), *adj.* **1.** Characterized or brought about by syncretism; aiming at or making for syncretism; syncretistic.
2. *Gram.* Pertaining to or designating any case, such as the Greek genitive or the Latin ablative, which has absorbed the functions of one or more other cases.
— **syn·cret'i·cal** (-ĭ·kăl), *adj.* — **syn·cret'i·cism** (-ĭ·sĭz'm), *n.*

syn·cre'tion (sĭn·krē'shŭn), *n.* [See SYNCRETISM.] An instance of syncretism.

syn'cre·tism (sĭng'krē·tĭz'm), *n.* [F. *syncrétisme,* fr. Gr. *synkrētismos,* fr. *synkrētizein* to combine.] **1.** The reconciliation or union of conflicting beliefs, esp. religious beliefs, or a movement or effort intending such; specif., in the 17th century, a movement of a Lutheran party, led by George Calixtus, seeking the union of Protestant sects with each other and with the Roman Catholic Church; also, the principles of such a movement. *Hist.*
2. Egregious compromise in religion or philosophy; eclecticism that is illogical or leads to inconsistency; uncritical acceptance of conflicting or divergent beliefs or principles.
3. In the development of a religion, the process of growth through coalescence of different forms of faith and worship or through accretions of tenets, customs, rites, etc., from those religions which are being superseded.
4. *Philol.* The union or fusion into one of two or more originally different inflectional forms, as of two cases.

syn'cre·tist (sĭng'krē·tĭst), *n.* [Cf. F. *syncrétiste.*] [*also cap.*] One who advocates or promotes syncretism. — **syn'cre·tist,** *adj.*

syn'cre·tis'tic (-tĭs'tĭk), **syn'cre·tis'ti·cal** (-tĭ·kăl), *adj.* [*also cap.*] Of or pertaining to syncretism or syncretists; characterized by syncretism.

syn'cre·tize (sĭng'krē·tīz), *v. i.*; -TIZED (-tīzd); -TIZ'ING (-tīz'ĭng). [Gr. *synkrētizein.*] To become fused or united; also, to favor or practice syncretism. — *v. t.* To attempt to unite and harmonize, as conflicting principles.

syn'cri·sis (sĭng'krĭ·sĭs), *n.* [NL., fr. Gr. *synkrisis* a comparison, fr. *syn* together + *krinein* to judge.] *Rhet.* Comparison, esp. of contraries or opposites.

Syn·cryp'ta (sĭn·krĭp'tȧ), *n.* [NL., fr. *syn-* + Gr. *kryptos* hidden.] *Biol.* A genus of biflagellate free-swimming, plantlike flagellates (order Chrysomonadina) occurring as spheroidal colonies and sometimes causing bad odors in water supplies. *S. volvox* is the only known species.

syn·cryp'tic (sĭn·krĭp'tĭk), *adj.* [Cf. Gr. *synkryptein* to conceal completely.] *Biol.* Designating protective mimicry in which unrelated animals resemble each other through a common resemblance to their surroundings.

syn·cy'ti·o'ma (sĭn·sĭt'ĭ·ō'mȧ; -sĭsh'ĭ-), *n.*; *pl.* -OMATA (-mȧ·tȧ), -OMAS (-mȧz). [NL., fr. *syncytium* + *-oma.*] *Med.* A tumor derived from the syncytial layer of the chorion; a chorioepithelioma composed, or chiefly composed, of syncytium. It tends to erode adjacent tissues and metastasizes, and is therefore sometimes called ‖**syn·cy'ti·o'ma ma·lig'num** (mȧ·lĭg'nŭm).

syn·cy'ti·um (sĭn·sĭsh'ĭ·ŭm; -sĭt'ĭ·ŭm), *n.*; *pl.* SYNCYTIA (-ȧ). [NL., fr. Gr. *syn* together + *kytos* a hollow vessel.] *Biol.* A tissue or structure containing many nuclei, but not divided into distinct cells by cell walls or partitions in the intervening cytoplasm. Such a structure may be regarded as a multinucleate cell or as an aggregate of imperfectly separated cells. A plant so constituted is called a *coenobium.*
— **syn·cy'tial** (-sĭsh'ăl; -sĭt'ĭ·ăl), *adj.*

syn·dac'tyl, syn·dac'tyle (sĭn·dăk'tĭl), *adj.* [*syn-* + Gr. *daktylos* finger, toe.] *Zool. & Med.* Having two or more digits wholly or partly united. See SYNDACTYLISM. — *n.* A syndactyl bird or mammal.

syn'dac·tyl'i·a (sĭn'dăk·tĭl'ĭ·ȧ), *n.* [NL.] Syndactylism.

syn'dac·tyl'ic (-ĭk), *adj.*, **syn·dac'ty·lous** (sĭn·dăk'tĭ·lŭs), *adj.* Syndactyl.

syn·dac'tyl·ism (sĭn·dăk'tĭ·lĭz'm), *n. Zool. & Med.* State of being syndactyl; union of two or more digits. Syndactylism is normally exhibited by many birds, notably kingfishers, motmots, bee eaters, and hornbills, in which some of the toes are united, and in certain mammals, as the kangaroos and some other marsupials.

Syndactylism. Foot of a Kingfisher. Nat. size.

syn·dac'ty·ly (-tĭ·lĭ), *n.* Syndactylism.

syn'der·e'sis (sĭn'dĕr·ē'sĭs), *n.* Synteresis.

syn'de·sis (sĭn'dē·sĭs), *n.* [NL., fr. Gr. *syndesis* a binding together.] **1.** State of being bound together. *Rare.*
2. *Biol.* = SYNAPSIS, 1.

syn'des·mi'tis (sĭn'dĕs·mī'tĭs), *n.* [NL., fr. *syndesm-* + *-itis.*] **a** Inflammation of a ligament. **b** Conjunctivitis.

syn·des'mo- (sĭn·dĕs'mō-), **syndesm-.** A combining form from Greek *syndesmos,* a ligament, as in **syn'des·mol'o·gy,** the anatomy of ligaments. For words below see the word or element with which *syndesmo-, syndesm-,* is combined.
syndesmectopia **syndesmoma** **syndesmorrhaphy**
syndesmography **syndesmoplasty** **syndesmotomy**

syn'des·mo'sis (sĭn'dĕs·mō'sĭs), *n.*; *pl.* -SES (-sēz). [NL., fr. Gr. *syndesmos* a band.] *Anat.* An articulation in which the contiguous surfaces of the bones are rough and are bound together by an interosseous ligament. — **syn'des·mot'ic** (-mŏt'ĭk), *adj.*

syn·ce'lom. Var. of SYNCOELOM.
syn'chi·sis (sĭng'kĭ·sĭs). Var. of SYNCHYSIS.
syn'chro·nise. Var. of SYNCHRONIZE.
syn'chro·niz'a·ble, *adj.* See [-ABLE.]
syn'ci·ne'si·a. Var. of SYNKINESIA.
syn'ci·more, *n.* = SYNCLINORIUM.
syn'cra·cy, *n.* See SYN-.
synd. Var. of SIND.
syn·dec'to·my (sĭn·dĕk'tō·mĭ), *n.* [Gr. *syndesmos* a band, bond + *-ectomy.*] = PERITOMY **a**.
Syn·des'mon (sĭn·dĕs'mŏn), *n.* [NL., fr. *syn-* + Gr. *desmos* a bond.] *Bot.* Syn. of ANEMONELLA.

syn·det'ic (sĭn·dĕt'ĭk), **syn·det'i·cal** (-ĭ·kăl), *adj.* [Gr. *syndetikos*, fr. *syndein* to bind together, fr. *syn* with + *dein* to bind. Cf. ASYNDETIC.] Connecting; connective; interconnected; also, indicated by a conjunctive; as, *syndetic* words or connection. — **syn·det'i·cal·ly**, *adv.*

syn'dic (sĭn'dĭk), *n.* [F., fr. LL. *syndicus*, fr. Gr. *syndikos* helping in a court of justice, advocate, fr. *syn* with + *dikē* justice. See DICTION.] **1.** An officer of government, invested with different powers in different countries; a magistrate. The chief magistrates of Geneva and the mayors of Italian cities were formerly called *syndics*.
2. An agent of a corporation or of any body of men engaged in a business enterprise. Almost all the ancient trading companies in Paris and other cities, the University of Paris, and the like, had their syndics. The University of Cambridge, Eng., has its syndics, who are chosen from the senate to transact special business, such as the regulation of fees, the framing of laws, management of the university press, etc.
3. A censor; a critic. *Obs.*
4. *Civil Law.* One appointed to manage an estate, essentially as a trustee under English law; also, one appointed to manage the affairs of a juristic person, especially an incorporated mass of property.
5. One of various officials in cities of ancient Greece, having duties similar to those of a judge or advocate.

syn'di·cal (-dĭ·kăl), *adj.* **1.** Of or pertaining to a syndic, or, more commonly, to a committee which assumes the powers of a syndic.
2. [F.] Of or pert. to, or of the nature of, syndicalism.

syn'di·cal·ism (-lĭz'm), *n.* The theory, plan, or practice, of trade-union action (originally as advocated and practiced by the French Confédération Générale du Travail) which aims by the general strike and direct action to establish control by organizations (*syndicats*) of workers over the means and processes of production. — **syn'di·cal·ist** (-lĭst), *adj. & n.* — **syn'di·cal·is'tic** (-lĭs'tĭk), *adj.*

syn'di·cal·ize (-lĭz), *v. t.* To subject to syndicalism; bring under the control of syndicalists or under the conditions aimed at by syndicalism; as, to *syndicalize* a mine.

‖**syn'di'cat'** (săn'dē'kä'), *n.* [F.] *Econ.* A labor union or trade-union advocating control by workers over the processes of production. Cf. SYNDICATE, *n.*, 2; SYNDICALISM.

syn'di·cate (sĭn'dĭ·kăt), *n.* [F. *syndicat.* See SYNDIC.] **1.** The office or jurisdiction of a syndic; a council, committee, or body, of syndics.
2. An association of persons officially authorized to undertake some duty or to negotiate some business.
3. *Finance.* **a** An association or group of persons, usually financiers or capitalists, who combine to carry out, on their own account, a financial or industrial project, as the underwriting of an issue of bonds, the carrying out of a great industrial enterprise, etc. The members may be partners, joint contractors, or in any legal relation agreed upon. **b** In Germany, a kind of cartel (see CARTEL, 6) formed by manufacturers for the purpose of marketing their output, and, usually, for regulating that output in proportion to the demand. See TRUST, *n.*, 11, *Note.*
4. *Journalism.* **a** A business concern which sells to the press such materials as special articles, photographs, or comic strips, for practically simultaneous publication in a number of newspapers. **b** A group of newspapers under one management; a newspaper chain.
Syn. — See TRUST.

syn'di·cate (-kāt), *v.*; -CAT'ED (-kāt'ĕd; -ĭd; 119); -CAT'ING. [ML. *syndicatus*, past part. of *syndicare* to censure.] *Transitive:* **1.** To serve as the syndic, or judge, of; to censure. *Now Rare.*
2. To subject to, or bring under the control of, a syndicate; to combine into, or manage as, a syndicate; as, to *syndicate* (specified) newspapers.
3. To sell (an article, etc.) for simultaneous publication in many newspapers or magazines; to contract for publication through a syndicate.
—, *Intransitive:* To unite to form a syndicate.

syn'di·ca·teer' (sĭn'dĭ·kä·tēr'), *n.* One who controls, esp. financially, a syndicate.

syn'di·ca'tion (-kā'shŭn), *n.* Act or process of syndicating or forming a syndicate.

syn'di·ca'tor (sĭn'dĭ·kā'tĕr), *n.* One who syndicates; a syndicateer.

syn'dro·me (sĭn'drō·mē), *n.* [NL., fr. Gr. *syndromē*, fr. *syn* with + *dramein* to run.] Concurrence; a set of concurrent things; specif., *Med.* (*pron. often* sĭn'drōm), a group of signs and symptoms that occur together, and characterize a disease. — **syn·drom'ic** (sĭn·drŏm'ĭk), *adj.*

syn'dy·as'mi·an (sĭn'dĭ·ăz'mĭ·ăn), *adj.* [Gr. *syndyasmos* coupling, copulation.] *Anthropol.* Designating or pert. to a form of marriage in which cohabitation is not restricted to that of the married pair or ends at the will of either party.

Syn'dy·oc'er·as (sĭn'dĭ·ŏs'ĕr·ăs), *n.* [NL., fr. Gr. *syndyo* two together + *keras* horn.] *Paleontol.* A genus of ungulates from the Miocene of Nebraska, allied to *Protoceras*. The skull bore two pairs of horns curving toward each other.

syn·ec'do·che (sĭ·nĕk'dō·kē), *n.* [L. *synecdoche*, fr. Gr. *synekdochē*, fr. *synekdechesthai* to receive jointly, fr. *syn* with + *ekdechesthai* to receive, fr. *ek* out + *dechesthai* to receive.] *Rhet.* A figure of speech by which a part is put for the whole (fifty *sail* for fifty *ships*), the whole for a part (the smiling *year* for *spring*), the species for the genus (*cutthroat* for *assassin*), the genus for the species (a *creature* for a *man*), the name of the material for the thing made, etc. See TROPE.
Syn. — See METONYMY.

syn'ec·doch'ic (sĭn'ĕk·dŏk'ĭk), **syn'ec·doch'i·cal** (-ĭ·kăl), *adj.* Expressed by, or implying, a synecdoche. — **syn'ec·doch'i·cal·ly**, *adv.*

syn·ec'do·chism (sĭ·nĕk'dō·kĭz'm), *n.* **1.** Use of synecdoche; an instance of such use.
2. *Anthropol.* In sympathetic magic, the use of a part (of an object) as representing the whole. See MAGIC, *n.*, 1.

syn·ech'i·a (sĭ·nĕk'ĭ·ä; sĭn'ē·kĭ'ä), *n.*; *pl.* SYNECHIAE (-ē). [NL., fr. Gr. *synecheia* continuity, fr. *synechein* to hold together, fr. *syn* with + *echein* to hold.] Any adhesion of parts; specif., *Med.*, a disease of the eye, in which the iris adheres to the cornea (***anterior synechia***) or to the capsule of the crystalline lens (***posterior synechia***).

syn·ech'i·ol'o·gy (sĭ·nĕk'ĭ·ŏl'ō·jĭ), **syn'ech·ol'o·gy** (sĭn'ĕk·ŏl'ō·jĭ), *n.* [Gr. *synecheia* continuity + *-logy.*] A doctrine of continuity, or of a constant principle uniting changing or multiple events.

syn·ech'o·log'i·cal (sĭ·nĕk'ō·lŏj'ĭ·kăl), **syn·ech'i·o·log'i·cal** (-ĭ·ō·lŏj'ĭ·kăl), *adj.* [See SYNECHIOLOGY.] Pertaining to, or of the nature of, a continuum.

syn'ech·ot'o·my (sĭn'ĕk·ŏt'ō·mĭ), *n.* [*synechia* + *-tomy.*] *Surg.* The operation of dividing a synechia.

syn'ech·thry (sĭn'ĕk·thrĭ), *n.* [*syn-* + Gr. *echthra* hatred.] *Biol.* Hostile commensalism; specif., *Zool.*, commensalism in which the guests live in the ant nest as persecuted intruders. Cf. SYMPHILY. — **syn·ech'thran** (sĭ·nĕk'thrăn), *n.*

syn'e·col'o·gy (sĭn'ē·kŏl'ō·jĭ), *n.* [*syn-* + *ecology.*] *Biol.* The ecology of a group.

syn·ec'pho·ne'sis (sĭ·nĕk'fō·nē'sĭs), *n.* [NL., fr. Gr. *synekphōnēsis*, fr. *synekphōnein* to utter together.] Contraction of two syllables into one; synizesis; synaeresis.

syn·ec'tic (sĭ·nĕk'tĭk), *adj.* [Gr. *synektikos* fit to hold together.] *Rare.* **a** Joining; connecting; of a cause, immediate. **b** *Math.* Holomorphic. — **syn'ec·tic'i·ty** (sĭn'ĕk·tĭs'ĭ·tĭ), *n.*

Syn·e'dra (sĭ·nē'drä), *n.* [NL., fr. Gr. *synedros* sitting together.] *Bot.* A large genus of elongated, linear or commonly needle-shaped, solitary or loosely colonial diatoms (family Fragilariaceae) often causing earthy odors in public water supplies.

syn·e'dral (sĭ·nē'drăl), *adj.* [Gr. *synedros* sitting with.] *Bot.* Growing on the angles of a stem.

syn·ed'ri·al (sĭ·nĕd'rĭ·ăl), *adj.* Of or pertaining to the synedrion. *Rare.*

syn·ed'ri·an (-ăn), *adj.* Synedrial. — *n.* A member of a synedrion.

Syn·ed'ri·on (sĭ·nĕd'rĭ·ŏn), **Syn·ed'ri·um** (-ŭm), *n.*; *pl.* -RIA (-ä). [NL., fr. Gr. *synedrion.* See SANHEDRIN.] **a** *Jewish Antiq.* The Sanhedrin. **b** [*not cap.*] *Rare.* Hence, an assembly likened to or suggesting the Sanhedrin.

syn'ei·de'sis (sĭn'ĭ·dē'sĭs), *n.* [Gr. *syneidēsis.*] *Patristic & Schol. Theol.* Conscience, or the function of moral judgment as applied to particular problems of conduct; — correlative to *synteresis.* Cf. SYNTERESIS, 1.

syn·e'ma (sĭ·nē'mä), *n.*; *pl.* -EMATA (-tä). [NL., for *synnema*, fr. Gr. *syn* together + *nēma* a thread.] *Bot.* **a** The column of united filaments in a monadelphous flower. **b** = COREMIUM.

syn'o·nym (sĭn'ō·nĭm), *n.* [LL. *synonyma*, pl. of *synonymum*, fr. Gr. *synōnymon.* See SYNONYMOUS.] **1.** One of two or more words of the same language having the same or nearly the same essential meaning. Words that are *synonyms* of one another may be: (1) Words of like implication throughout, their difference appearing only in certain collocations; thus we conventionally say "*unlikely* to happen," but not "*improbable* to happen." Such *synonyms* in English commonly arise from the duplication of a given sense by words from Anglo-Saxon and from Romance. (2) Words of like implication only in one of two or more senses. Thus *dull* is a *synonym* of *stupid* as said of a pupil, but not as said of a knife. (3) Words of similar generic meaning which, in ordinary use, have specific and different applications, as *author, producer,* and *inventor.* (4) Words of nearly identical meaning which, because of their connotations or literary associations, do not serve equally well in any context, as *kill, slay,* and *murder.* A thorough analysis of synonyms will in most cases show that the words actually have clearly distinguishable differences of meaning, and are interchangeable only when the differences in meaning do not affect the speaker's intention in a given context. Thus to *secure* and *attain* (an object) are synonyms because their sense "comes to the same thing," although they come to it, etymologically, by way of different metaphors.

2. A name that suggests another through real or fancied association; a symbolical or figurative name; a metonym.

His name has thus become, throughout all civilized countries, a *synonym* for probity and philanthropy. *Macaulay.*

3. One of two or more names for the same thing in different languages or localities; a heteronym.

4. *Bot. & Zool.* A systematic name, as of a species or genus, regarded as incorrectly applied, or as incorrect in form or spelling. It may formerly have been the accepted name, which was afterwards, however, rejected in favor of another, because of evidence of the priority of that other, or evidence establishing a more natural, genetic classification. See CLASSIFICATION, 3; NOMENCLATURE, 3.

Syn. — SYNONYM, ANTONYM, HOMONYM. SYNONYMS are words which express what is essentially the same idea, but which (commonly) differ from one another in some shade of meaning, in emphasis, or (esp.) in their connotations; ANTONYMS are terms of opposite meaning; HOMONYMS are words which, though entirely distinct in origin and meaning, are pronounced alike and sometimes spelled in the same way. Thus, *sharp* and *keen* are *synonyms; sharp* and *dull* are *antonyms; beaver* (the animal) and *beaver* (the lower part of a helmet) are *homonyms.*

syn·on'y·mat'ic (sĭ·nŏn'ĭ·măt'ĭk), *adj.* Of or pertaining to synonymy.

syn'o·nym'ic (sĭn'ō·nĭm'ĭk), **syn'o·nym'i·cal** (-ĭ·kăl), *adj.* Of, pert. to, composed of, or characterized by, synonyms; synonymous.

syn'o·nym'i·ty (sĭn'ō·nĭm'ĭ·tĭ), *n.* Quality, state, or fact, of being synonymous.

syn·on'y·mize (sĭ·nŏn'ĭ·mīz), *v. t.*; -MIZED (-mīzd); -MIZ'ING (-mīz'ĭng). To give the synonym or synonyms of (a word); also, to provide, as a dictionary, with synonymies. — *v. i.* To use synonyms; to express variously by means of synonyms.

syn·on'y·mous (-mŭs), *adj.* [ML. *synonymus*, fr. Gr. *synōnymos*, fr. *syn* with, together + *onoma, onyma*, name. See SYN-; NAME.] **1.** Having the character of a synonym; alike or nearly alike in meaning; equivalent or nearly so in significance; as, *synonymous* words; "glad" is *synonymous* with "joyful."

2. Having the same connotations, implications, or reference; suggesting the same thing; as, to the colonists, Indian was *synonymous* with marauder; in the minds of some readers, socialism is *synonymous* with Bolshevism.

3. *Rare.* **a** Homonymous. **b** Like; similar.

—**syn·on'y·mous·ly,** *adv.* — **syn·on'y·mous·ness,** *n.*

syn·on'y·my (-mĭ), *n.*; *pl.* SYNONYMIES (-mĭz). [LL. *synonomia*, fr. Gr. *synōnymia.*] **1.** The study or discrimination of synonyms or, by extension, of words which may be confused in meaning; hence, a list or collection of synonyms, or words of similar meaning, often defined and discriminated from each other.

2. The scientific names (incorrect and correct), collectively, which have been used in different books to designate a species or other group; also, a list of these names specifying the books and authors employing them.

T

T t (tē), *n.; pl.* T's, t's, Ts, ts (tēz). **1.** The twentieth letter of the English alphabet. It comes through the Latin from the Greek (*tau*), which took it from the Phoenician (Hebrew *taw*). In modern English T usually represents the voiceless alveolar stop; in most other languages it is dental (cf. its voiced correlative D). With *i* it often represents the sound of *sh*, as in *nation, palatial*, and before *u* that of *ch*, as in *nature, mutual*. With *h* it forms the digraph *th*, which has two simple continuant interdental sounds, one voiceless, as in *thin*, the other voiced, as in *then*. T is frequently silent before syllabic *l* or *n*, as in *wrestle, chasten, soften*. See *Pron.*, §§ 230–238. In cognate words English *t* corresponds to German *z* (= *ts*) or *t* (after *s* or before *r*), Gothic *t*, Latin *d*, Greek *d*, Sanskrit *d*, as in *stream*, G. *strom*; *tame*, G. *zahm*, Goth. *gatamjan* (to tame), L. *domare*, Gr. *daman*, Skr. *damayati* (he tames). English *th* (originally voiceless, later voiced in certain positions) corresponds to German *d*, Gothic *th*, Latin *t*, Greek *t*, Sanskrit *t*, as in *three*, G. *drei*, Goth. *threis*, L. *tres*, Gr. *treis*, Skr. *tri*. See ALPHABET, GRIMM'S LAW.
2. a An instance of the letter T, t, printed, written, painted, etc. **b** A printer's type, a stamp, etc., for the letter T, t. **c** The sound, or any sound, of the letter T. **d** [*cap.*] In medieval Roman numerals, 160, or, in the form T, 160,000.
3. Anything having the shape of the letter T. Cf. TEE, *n.*
4. As a *symbol*, used to denote or indicate anyone or anything arbitrarily or conveniently so designated, esp. as the nineteenth or (see K, *n.*, 4) twentieth in order or class.
5. As an *abbreviation:* see *Abbreviations*, in Appendix.
— *to a T.* As if measured with a T square; hence, perfectly; precisely; exactly; as, it suits me *to a T.* — *to cross the t's.* To be meticulous.

T, t, *adj.* **1.** Nineteenth or (cf. K, *adj.*, 1) twentieth in order or class.
2. [*cap.*] Having the form of capital T; as, a T bar.
☞ COMBINATIONS are:
T-formed, T-shaped.

T. See 1st SHOT, 11.

t'. **a** Contraction of TO, *prep.*, 15; — often in Middle English without apostrophe. **b** Dialect form of SAINT; — without apostrophe, as in *Tandry* (St. Andrew). **c** Dial. var. of THE, *definite article;* — often without apostrophe, as in *twasp, tother*.

Sense 6 (F. *talent*, ML. *talentum*) originated in the parable of the talents (Matt. xxv. 14–30); sense 3 is prob. from the inclination of the balance. See THOLE, *v.*, TOLERATE.] **1.** An ancient weight and money unit. The Babylonian talent for ordinary merchandise equaled 3,600 shekels (60 minas of 60 shekels each); for silver and gold, 3,000 shekels (60 minas of 50 shekels). In Syria and Palestine the talent of 3,000 shekels was the usual one. In Greece the talent was commonly reckoned as 60 minas or 6,000 drachmas, but not in early times; the talent of Homer was a smaller weight. With the Hebrew gold shekel (see SHEKEL, 1) of 252⅔ grains valued at **$10.88,** a Hebrew gold talent would be worth $32,640, or, on the basis of 25.8 grains .900 fine in the U. S. gold dollar, to $29,380. The silver talent would be worth ⅓ *s* of those amounts ($2176 to $1958.60). As a weight, the Attic talent was about 57.85 lb. av. (26.26 kg.), equivalent in coinage value in the United States in recent years to an amount between $250 and $630. See DRACHMA, 2 **a.** The estimated money value of the ancient talent however, varied greatly according to time and place. **2.** Hence, riches; money; wealth; property in general; also, an abundance. *Obs.* **3.** Inclination; desire; longing; appetite. *Obs. to an action or condition; as, to *talk* one into believing, out of a desperate deed, or over to a liberal view.

They would *talk* themselves mad. *Shak.*

Syn. — TALK, SPEAK, CONVERSE. SPEAK is, in general, the broader term, and may refer to articulate sounds, however broken or disconnected, whereas TALK implies connected colloquy or discourse; as, he could not *speak* above a whisper; he did not care to *talk*. But *speak* is also used of relatively weighty or formal speech, *talk*, of that which is more or less empty or frivolous; as, "a fool may *talk*, but a wise man *speaks*" (*B. Jonson*); "a good old man, sir; he will be *talking*" (*Shak.*); "Yet there happened in my time one noble speaker who was full of gravity in his *speaking*. . . . No man ever *spake* more neatly, more pressly, more weightily, or suffered less emptiness, less idleness, in what he uttered" (*B. Jonson*). CONVERSE implies an interchange in talk of thoughts and opinions; as "Words learned by rote, a parrot may rehearse, but *talking* is not always to *converse*" (*Cowper*); cf. "No, sir; we had *talk* enough, but no *conversation*; there was nothing discussed" (*Johnson*); "If we may not then be said to be able to *converse* before we are able to *talk* . . . so we may be said not to be able to '*talk*' before we are able to *speak*" (*H. James*).
